we live in the infinitely vast  
universe?

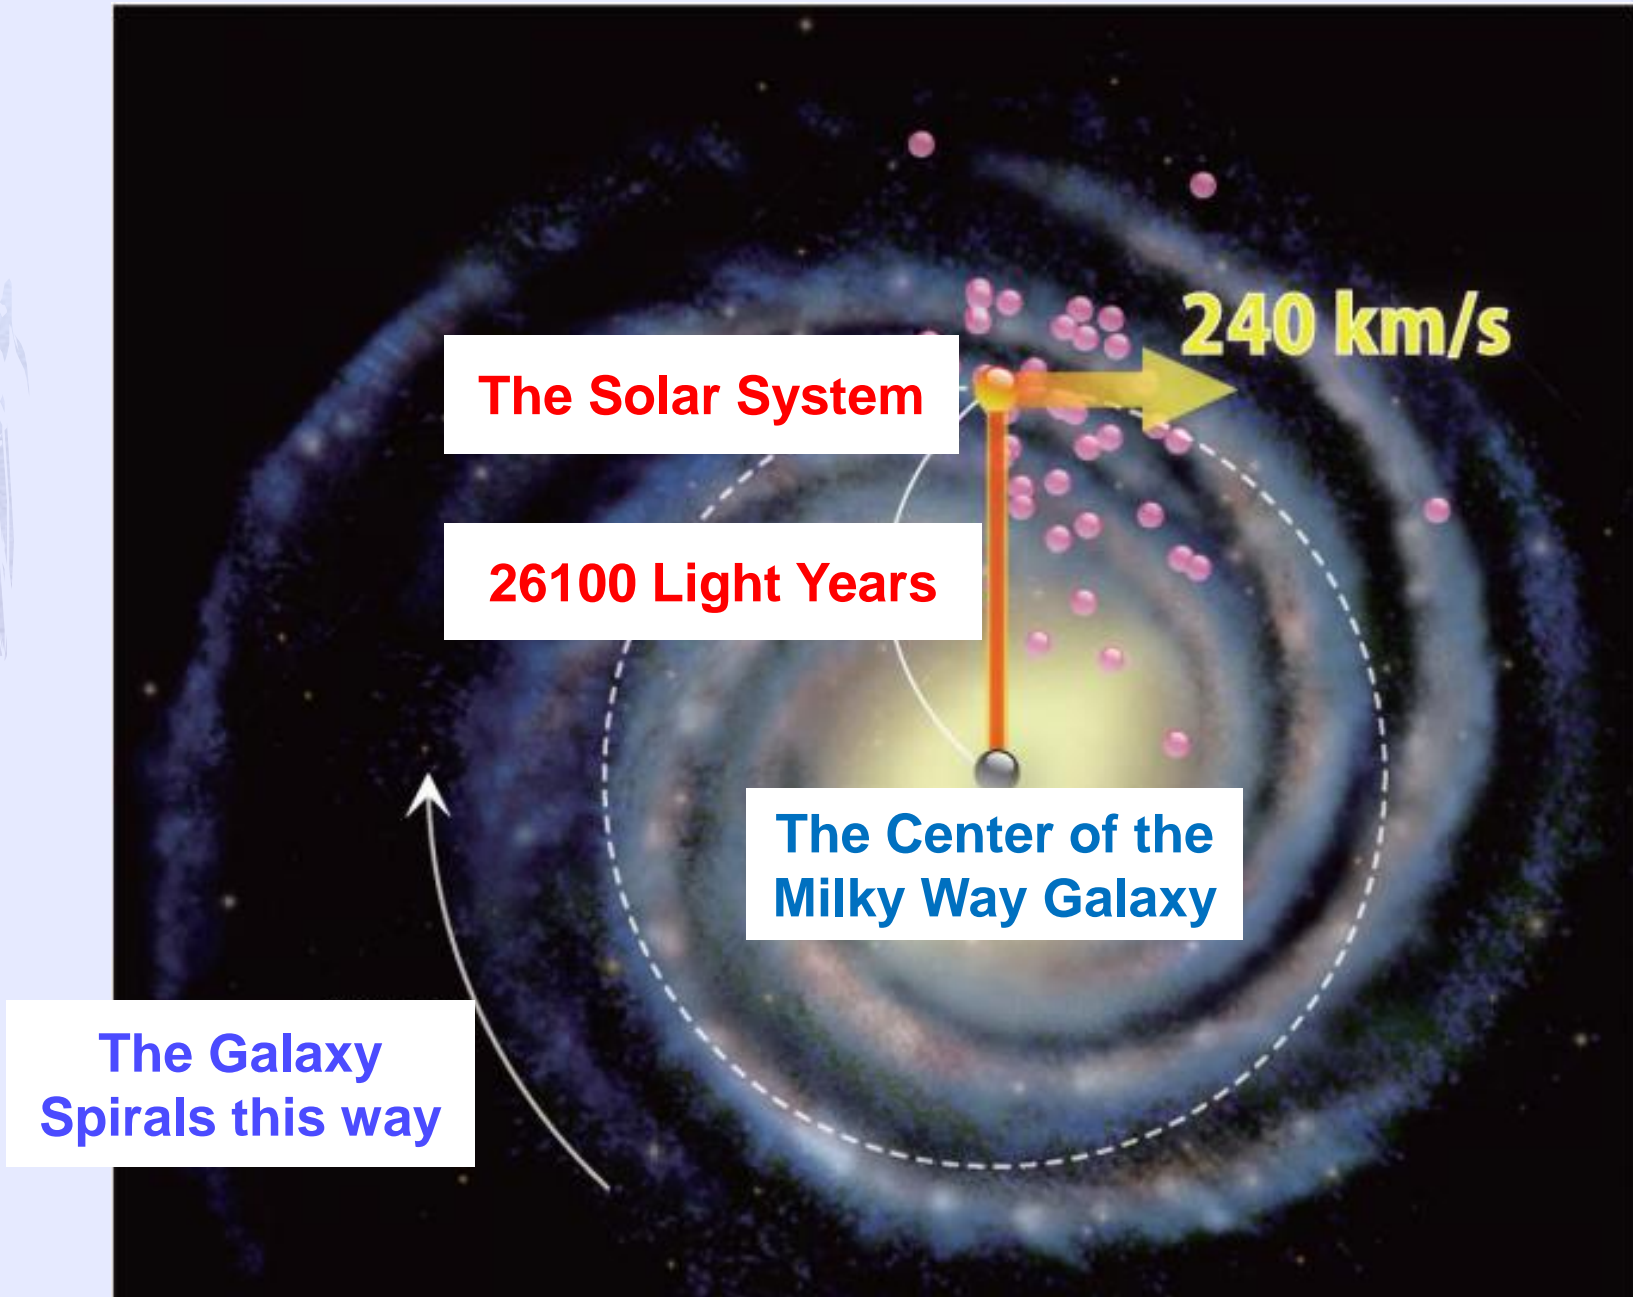

We live on a foundation of  
time and space that never  
goes to the same place

A complex diagram of a universe. A central yellow star is surrounded by numerous blue orbital paths. The paths are highly irregular and chaotic, with many loops and crossings, suggesting a dynamic and ever-changing environment. The background is black with scattered white stars.

# The Peak of Light

Materiality  
Is given  
priority over  
Spirituality

**When the era has faced  
the “peak of darkness”,  
the wisdom of those who  
lived at the “peak of  
light” has resurged.**

Spirituality  
Is given  
priority over  
Materiality

# The Peak of Darkness

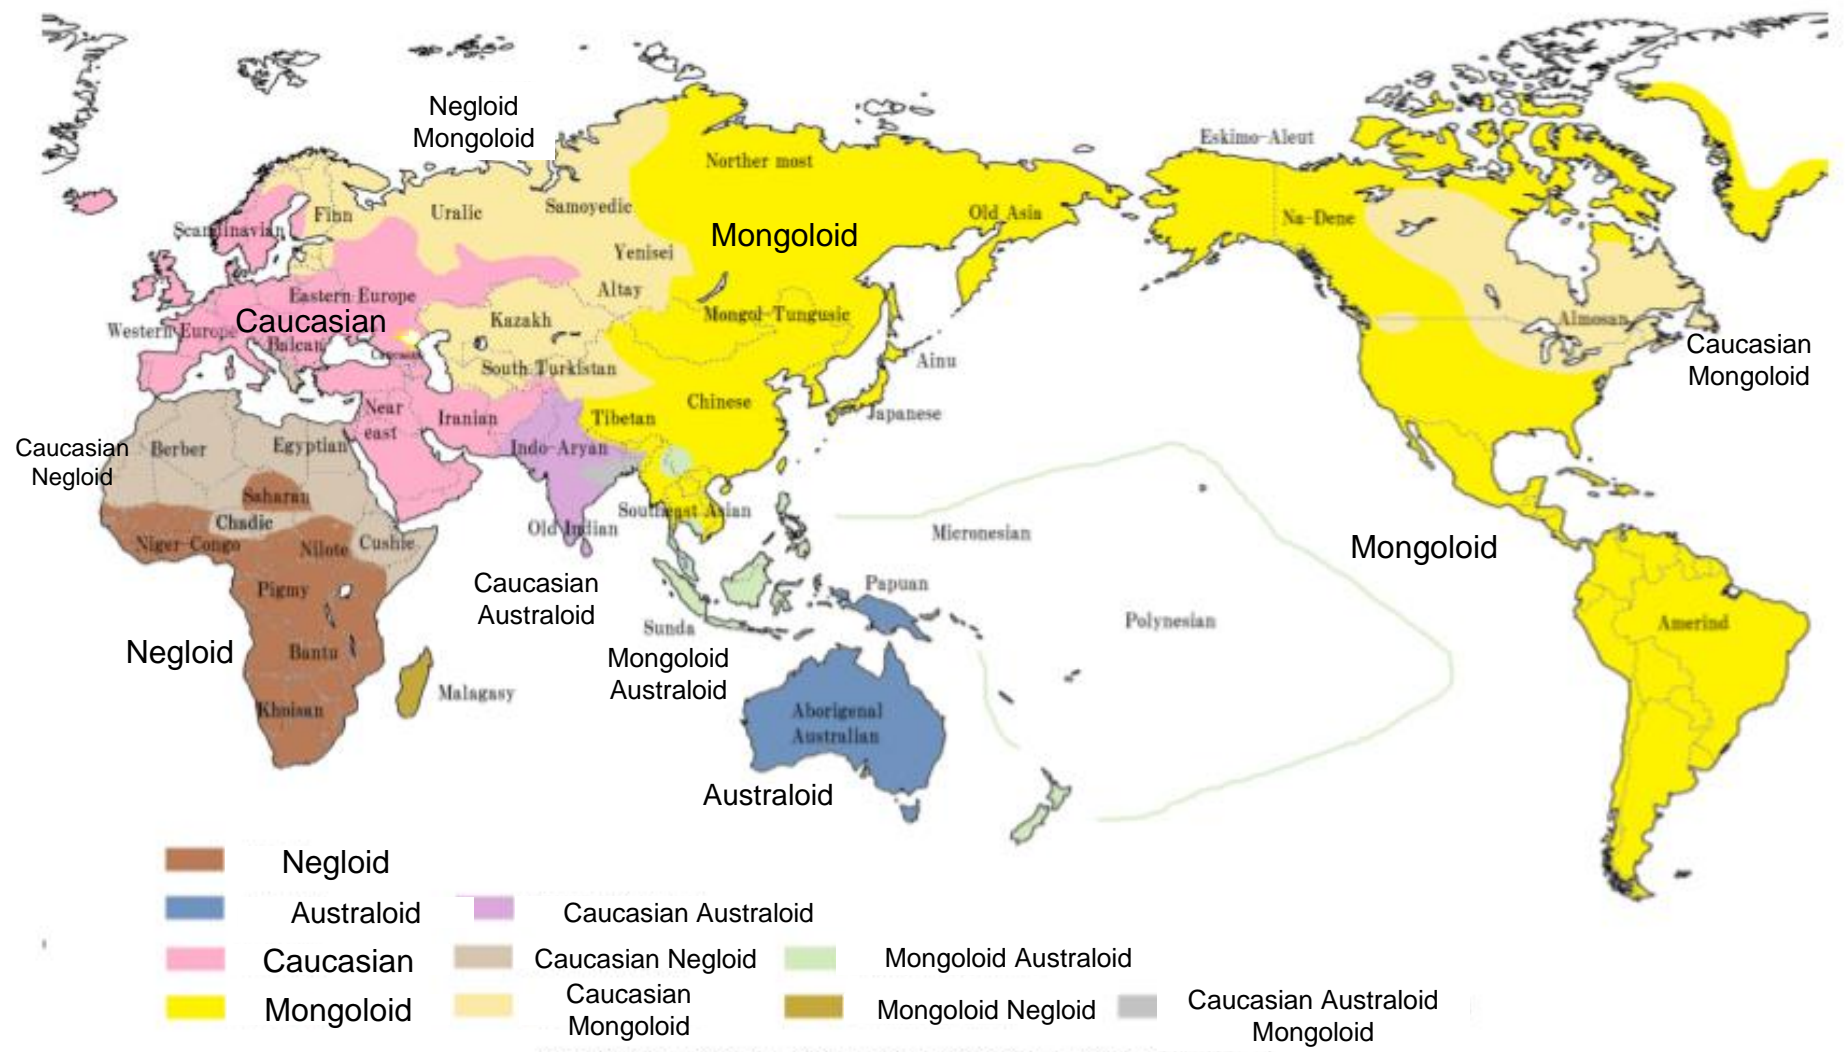

Once upon a time, there were people who lived as guards of the Earth, following the Divine law everywhere on the Earth. They communicated with stars, read the wind, hunted the animals, changed with nature, and lived with the spirit of oneness of the Divine and the Earth.

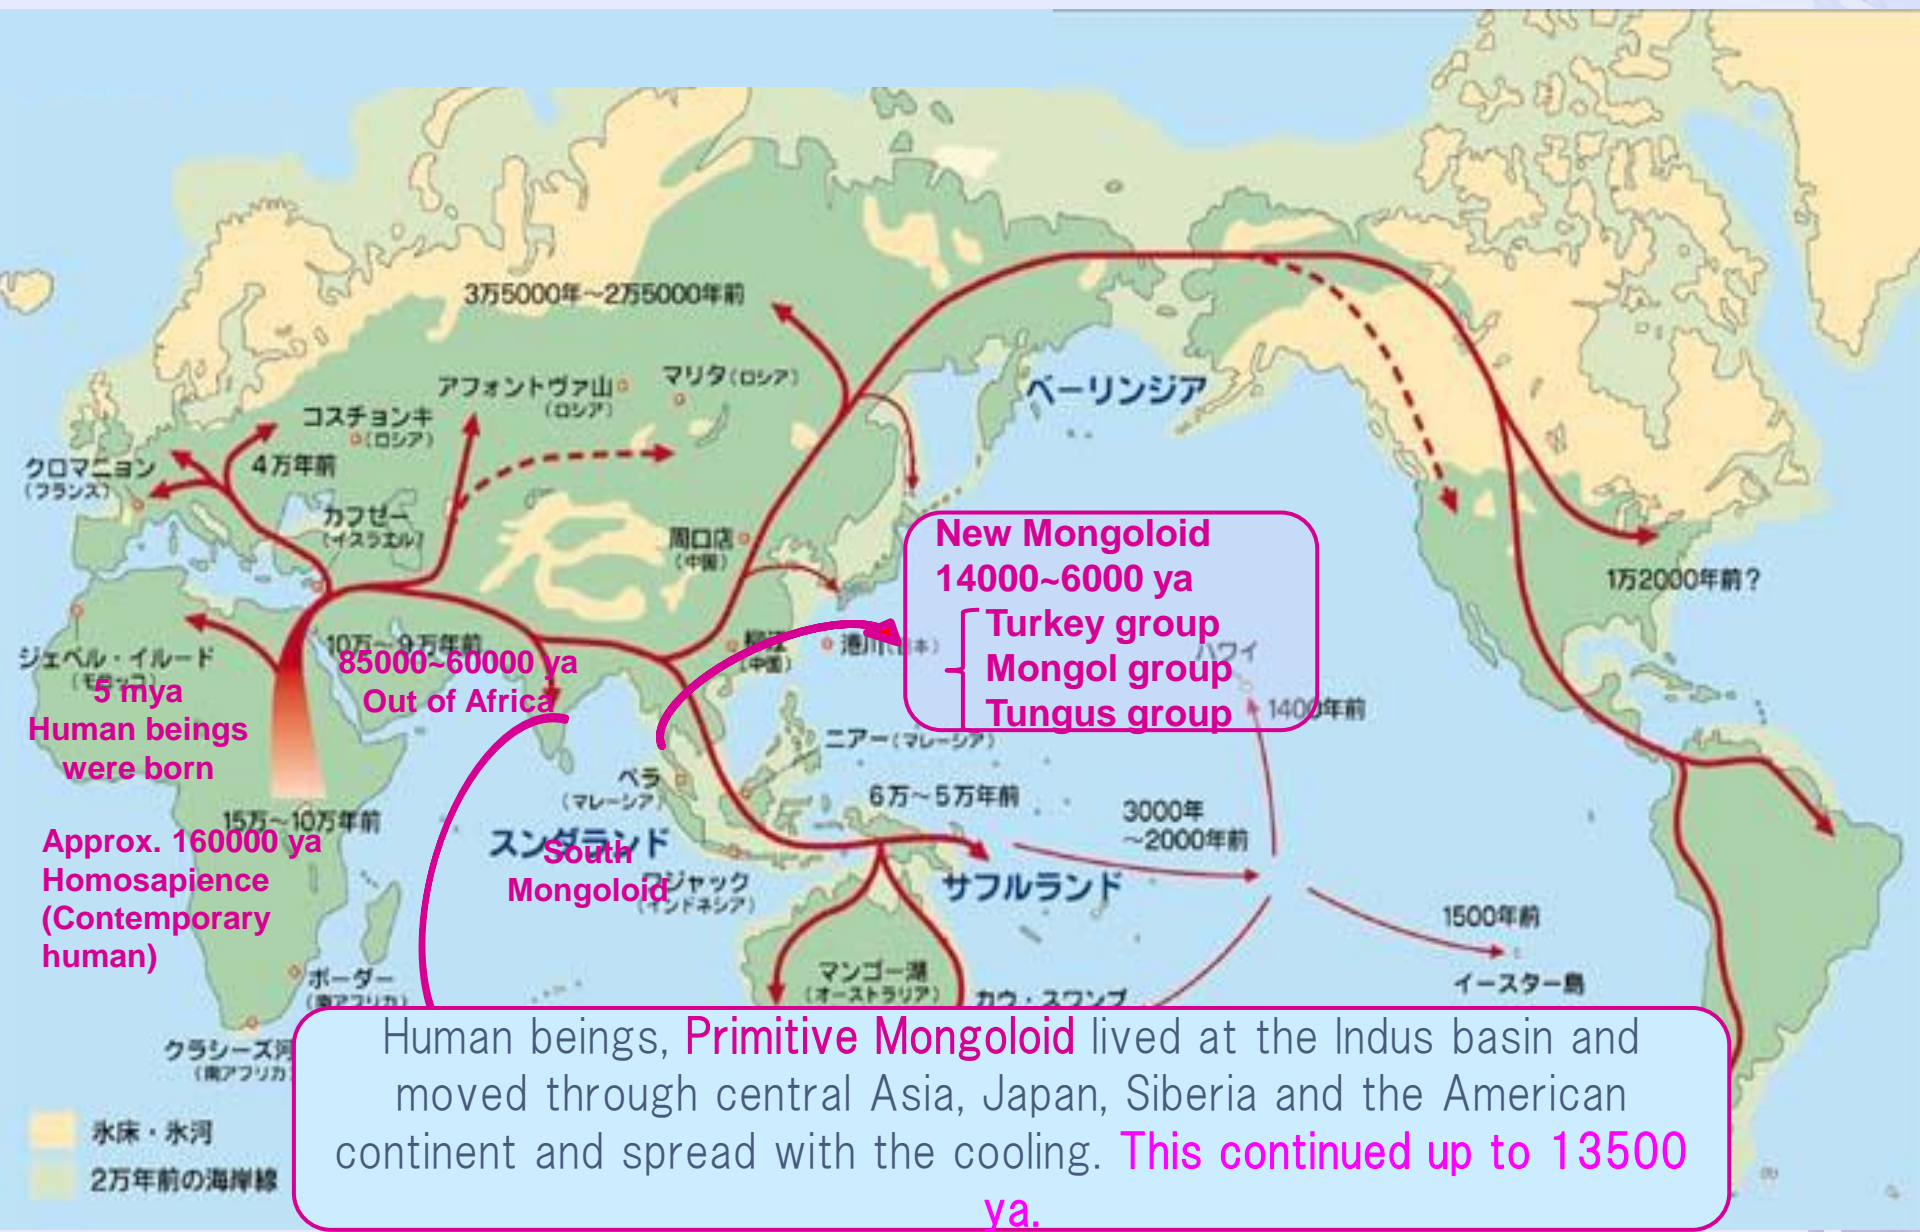

# Distribution Map of World Races

## ~ Widespread Mongoloids ~

# Genesis and Movement of Human Beings

Human beings, **Primitive Mongoloid** lived at the Indus basin and moved through central Asia, Japan, Siberia and the American continent and spread with the cooling. **This continued up to 13500 ya.**

# Move of Mongoloids

The race moved to the east = Mongoloids left Africa and arrived at "Sundaland", a continent in south-east Asia which was contiguous at that time (70000 - 50000 years ago) and adapted its climate.

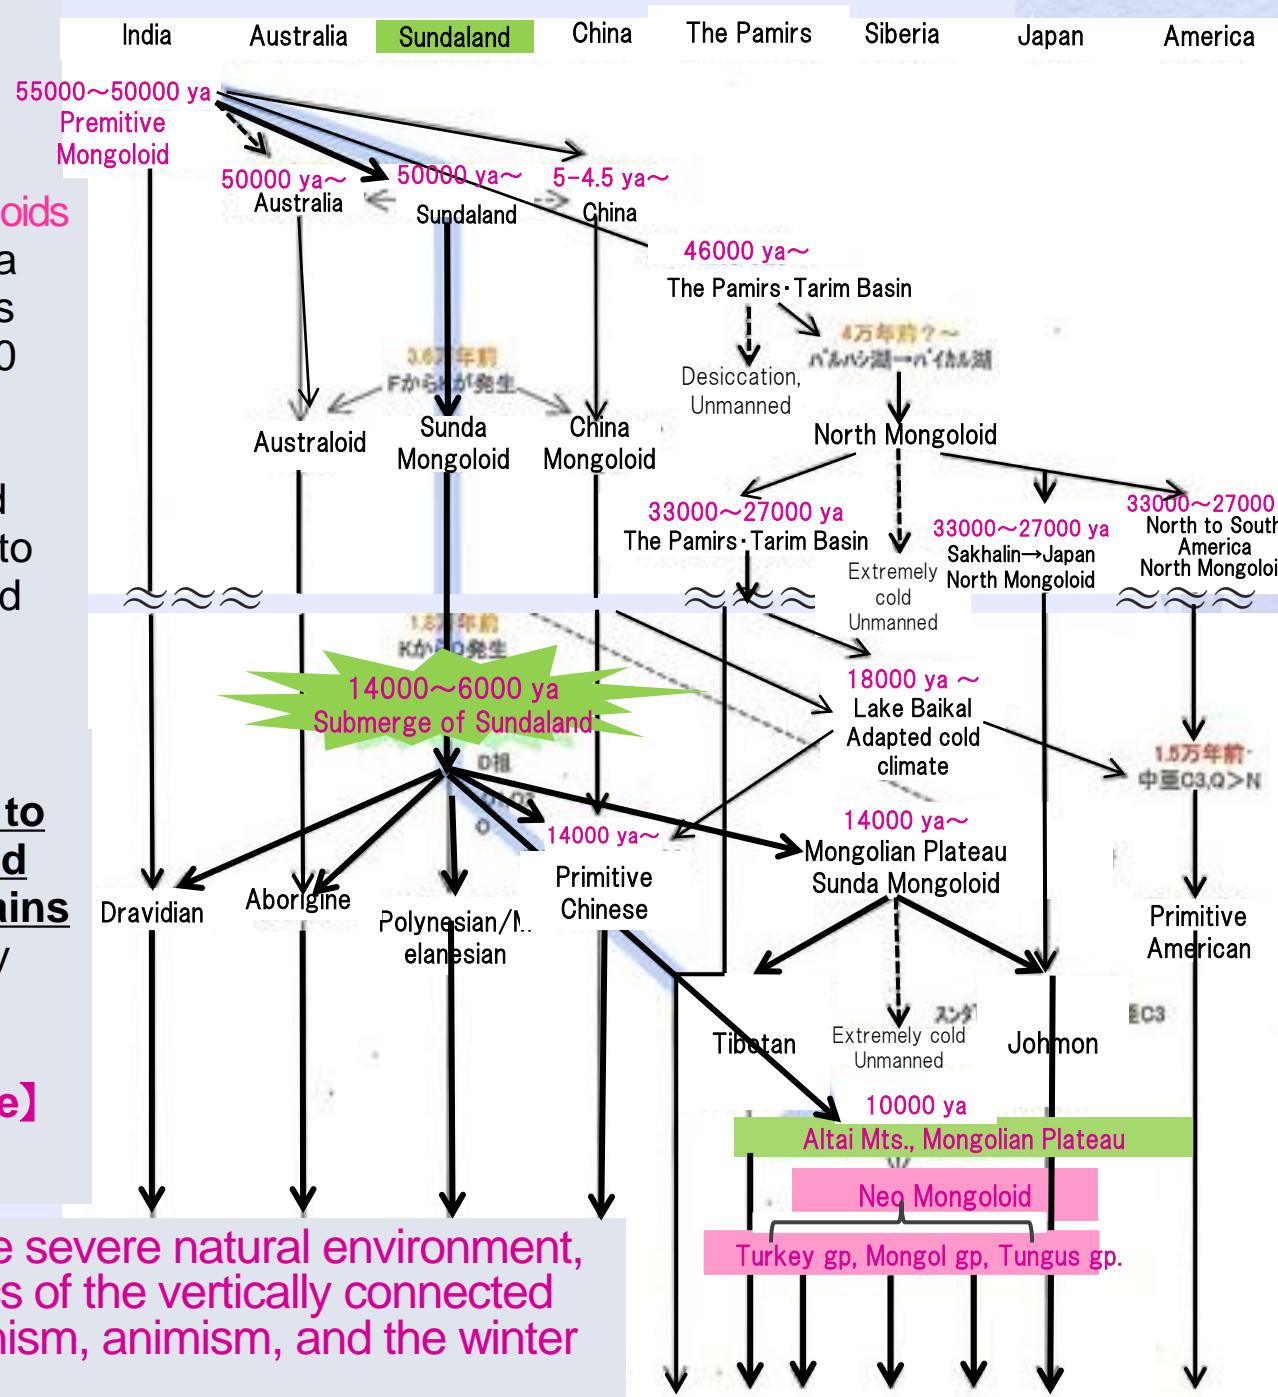

## (Sunda Mongoloid)

But, then Sundaland submerged during a warming period (14000 to 6000 years ago), and it separated into 6 main groups and spread around.

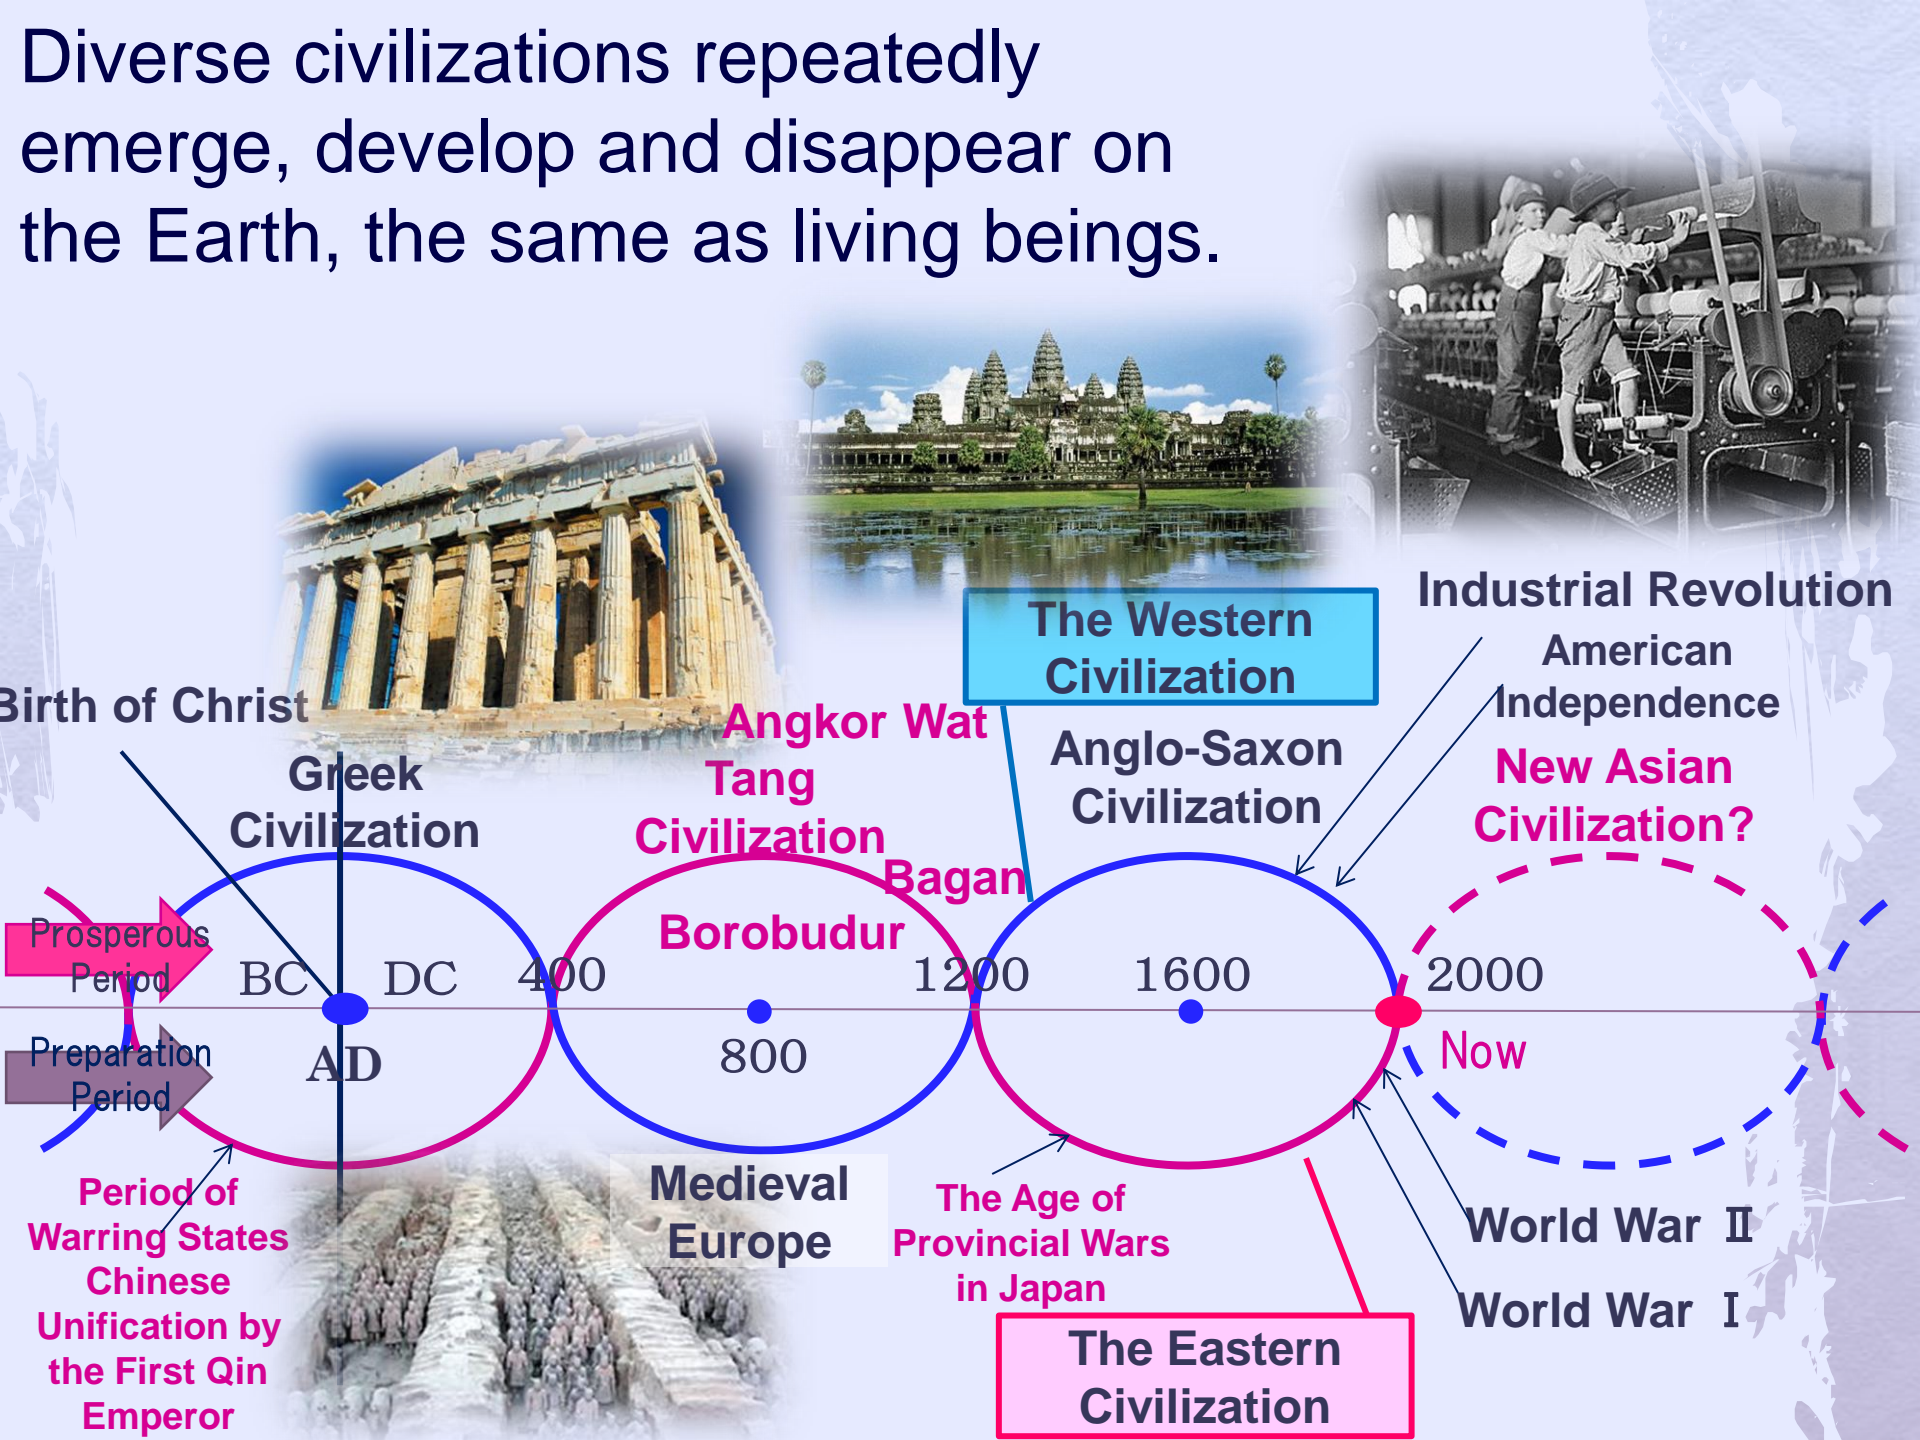

Mongoloids in the Tibetan Plateau to Tarim Basin moved to the north at the warming period and arrived at the Altai Mountains of the Mongolian Plateau. They increased their population, and made a fixed tribe.

## 【New Mongoloid(Prim. Altai Tribe)】

Through their adjustment to the severe natural environment, they adopted the characteristics of the vertically connected faith with the universe, shamanism, animism, and the winter festival.

Diverse civilizations repeatedly emerge, develop and disappear on the Earth, the same as living beings.

On one hand, material civilization exists, repeatedly emerging and disappearing. On the other hand, there are people who live according to universal circulation with the everlasting rhythm of life.

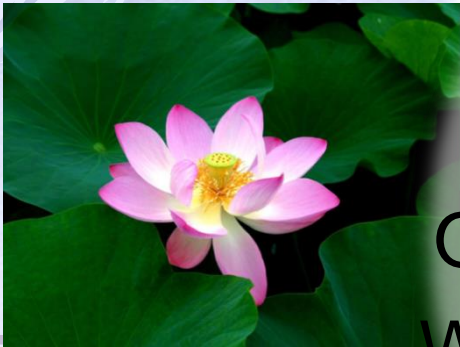

They know “they have enough” and live with what they receive. Also, they observe the nature and understand the structure of its circulation.

The divine and the five elements circulate naturally in the phenomenal world, and that world and potential world circulates in the universe.

Fire

Water

Wind

Humans have forgotten  
we are in the network of  
One life called the universe  
Which cannot be separated  
From ourselves.

Earth

Sky

Everything circulates,  
spirals, vibrates, and keeps  
moving in this world.

# Fractal Structure

Everything exists based on  
the same law and links with  
each other, no matter how  
infinitely it expands or  
contracts.

The great will exists in the back of this law.

# The Modern Society and the Earth has faced some Great Turning Points

Now that it has been 13.8 billion years from the creation of the universe and 4.6 billion years from that of the solar system and the Earth, we have faced some Great Turning Points.

The relationships of stars create various cycles and they have faced the turning points simultaneously.

What do these overlapping turning points show us?

# One Spiral of Pluto of 248 Years

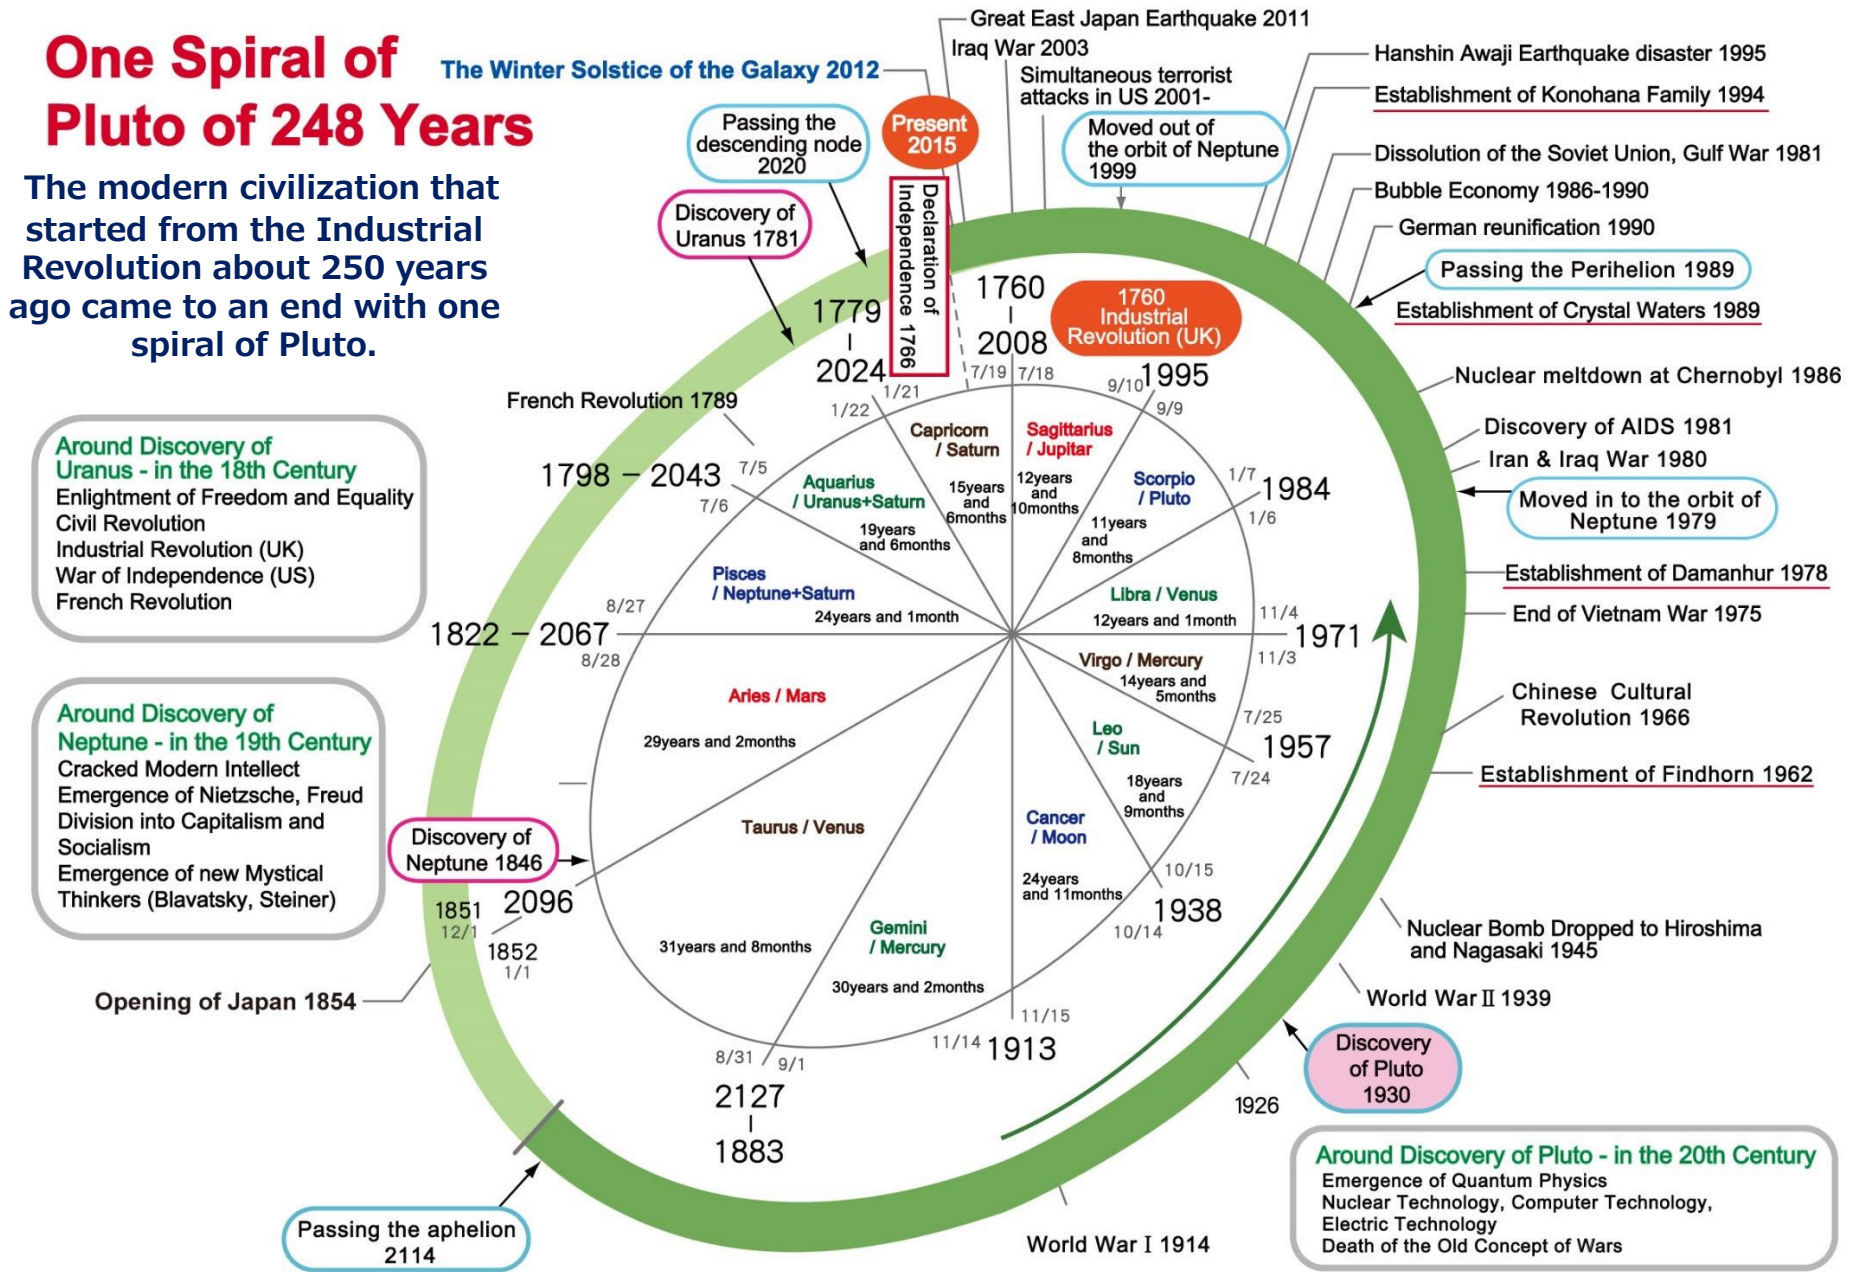

The Winter Solstice of the Galaxy 2012

The modern civilization that started from the Industrial Revolution about 250 years ago came to an end with one spiral of Pluto.

 Electric Technology  
 Death of the Old Concept of Wars

Since the Industrial Revolution, which occurred in the UK 250 years ago, the world population has increased explosively and the big wave of industrialization has come.

The world centered on Western countries have developed the material civilization with economic priorities that has ignored the global environment. As a result, various issues have been revealed on the current earth.

# Flow of the Era of the Discovery of Pluto

## 【Generation assumes the Era】

As we see the characteristics by each generation that is described below by Pluto, we can see a tendency every two generations. That tendency creates the flow of the era.

### Generation of Peak of Light

Generations that create a harmonious world

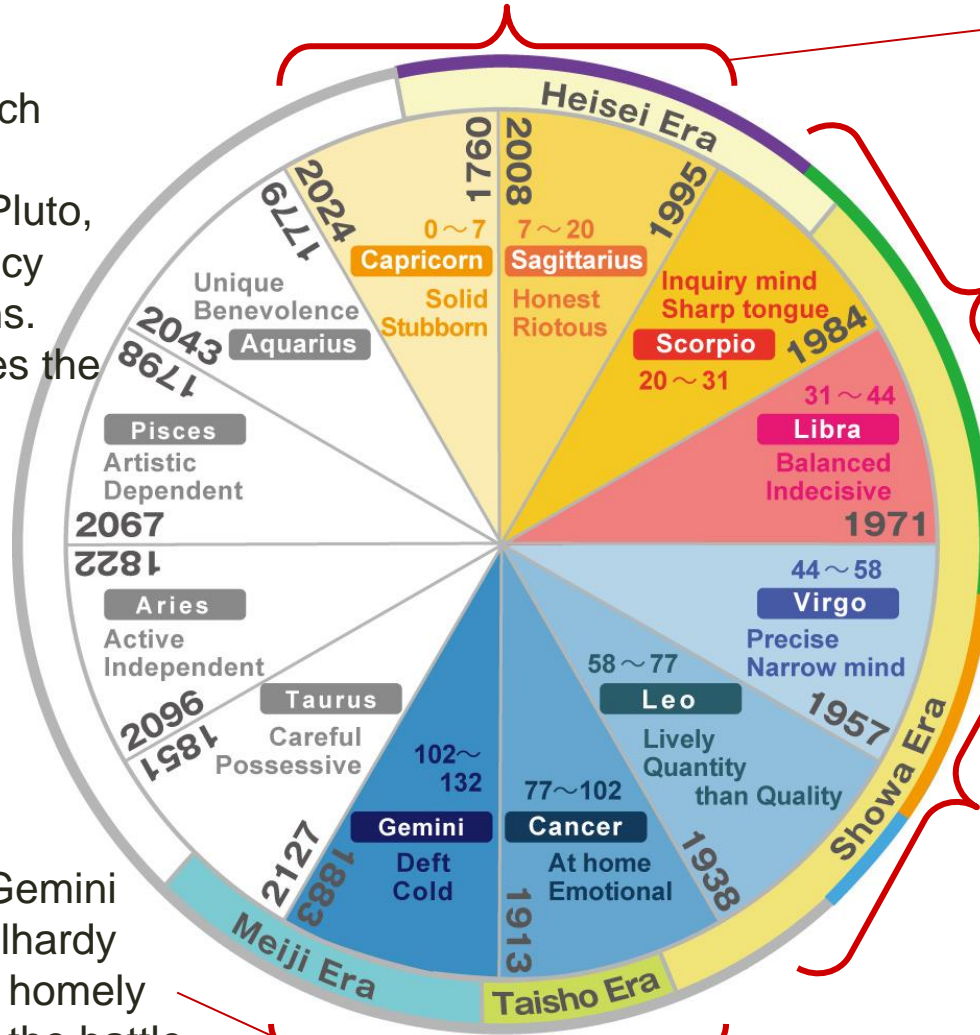

The Sagittarius generation spreads dreams, and the Capricorn will surely manifest.

### Bridging Generation

The Libra generation hovers on between materialism and spirituality. There are a lot of NEET and the stay-at-home in this generation. The generation of Scorpio is in the big evolution of spirituality. This generation does not have attachment for material, but searching for the next era.

### Prosperity After the War

The Leo generation successfully completed the establishment of the country and the Virgo generation made the country as a strong economic country.

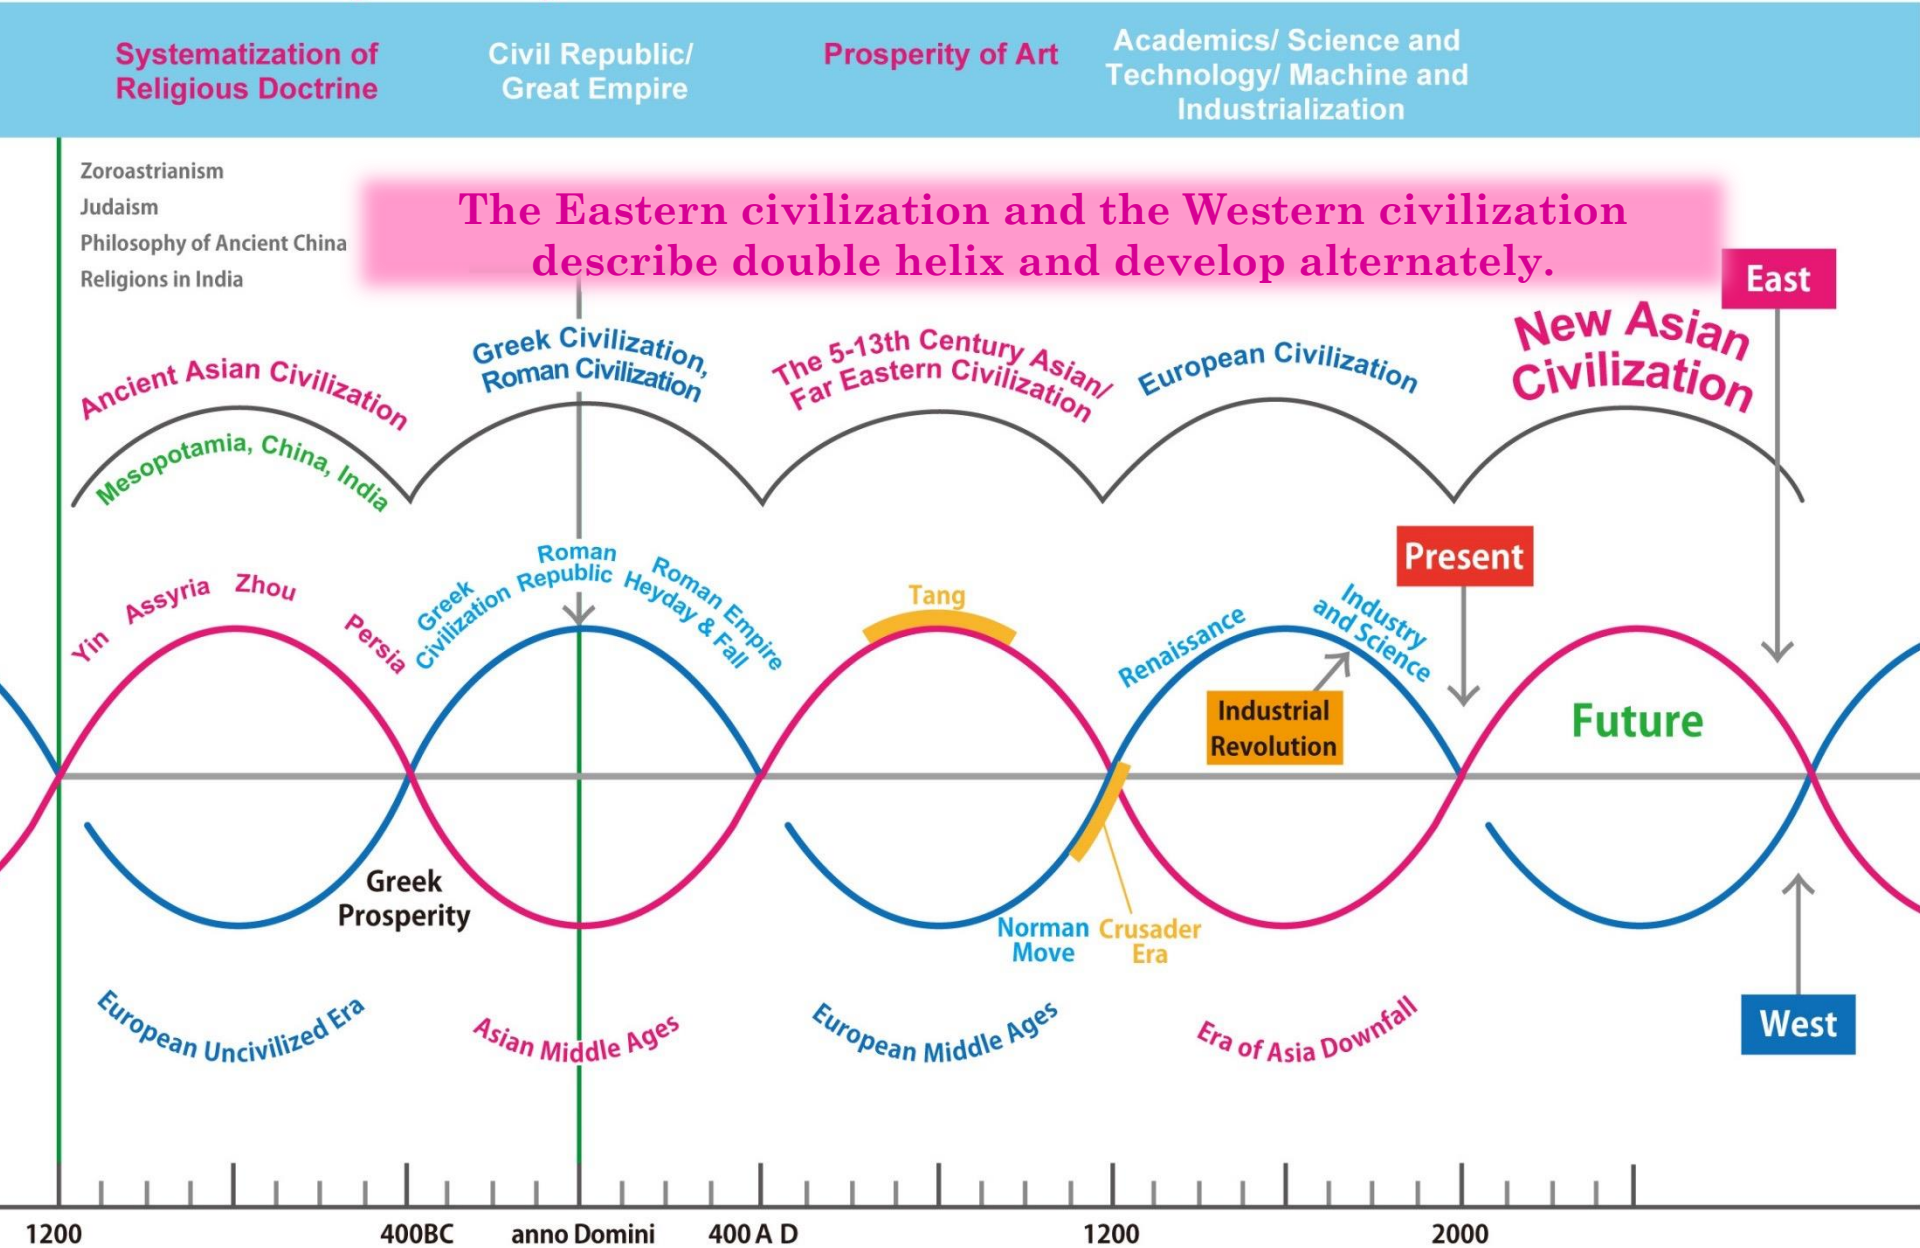

### Generation of Peak of Darkness

Generation that made World War I and II

The cold and clever Gemini generation began foolhardy warring, and sent the homely Cancer generation to the battle front of war.

**The modern Western civilization has only a 250-year history which is just a second for the Earth that has lived for 4.6 billion years.**

**And the modern people are living upon it.**

**Now, we stand at the position  
where we are able to see all

**What we should do is to have a broad  
worldview and analyze the flow of the era.**

# Knowing the Reality of the Current Earth

What has the economic development generated by human desires brought to the Earth?

What environment have we been in?  
What burden have we received and have we brought to society?

# 1, The Reality of the Global Environment

That the rapid economic growth has brought to the Earth

The energy-consuming society

Global warming

# Natural disasters accompanying industrialization and large-scale agriculture

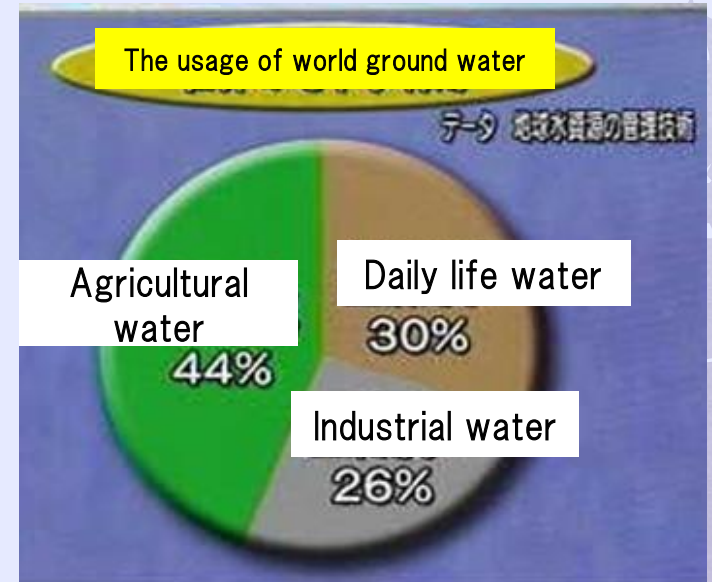

Water pollution in China  
“Rainbow water”

Depletion of ground water by large-scale irrigation project

Deforestation (Burnt field, paper making, lumber, pasturing)

Although the medical treatment has developed, more incurable and rare diseases have emerged.

Although satiation exists, poverty and starvation still exist.

# The Population Growth and Food Crisis

1.2 billion people satiate themselves and 0.8 billion people suffer from food shortages and are starving on the current Earth. The food that is produced could support twice the amount necessary for all people in the world. In US, 40% of food is disposed of and the obesity rate of the North American people (6% of world population) is 34%. The cause of the world starvation, poverty and food shortages is over-satiation of the wealthy.

# Relationship of the Solar Movement and the Magma of the Earth

The relationship among stars creates the era, and at the same time, it influences the natural environment of the earth.

It is said that the movements of sunspots and the shift of the Earth's axis influences the movement of earthquakes and volcanos, and influences the climate of the earth.

As the environment changes the movement of the star changes, it also influences the economic movement of people. The earth is constantly changing by these complex factors.

Also, the cycle of solar movement extended from 11 years to 12.6 years. What will this abnormal change bring to the earth? It is important to observe the solar wind and strength of cosmic radiation.

# Euro Crisis - Does Europe become one?

The EU was established with the goal of forming the united Europe without any more wars in 1993. Currently 28 countries are in partnership. In 1999, the EU launched the single European currency, "Euro", and 17 countries including Greece introduced it and formed the Euro Area.

Greek faces economic meltdown by handouts finance. High wage, low tax, and generous social security for many civil servants. It covers own deficit financing with the loan from the each EU country.

As a result, it brought credit deterioration of Euro, and spread the economic crisis to the entire EU. It is required an effort of Greece and leadership of Germany.

# The Most Major Car Company in Germany Volkswagen's "Emission Cheating Issue"

The German car maker has been installing "defeat devices" - software that allows cars to cheat in emissions tests, making them appear cleaner than they actually are. The vehicle equipped the defeating software is 8 million cars in the 28 EU countries among 11 million cars in the world. This issue directly hit the car industry in Europe which devoted to the diesel car.

The nation of Germany is at their wits' end with this largest car company in Germany's injustice since one in seven people of total working population works for the car industry in this country. It can be more serious crisis than the EU financial crisis.

# Series of Terrorist Attacks in Paris

Islamic State jihadists on Saturday claimed a series of coordinated attacks by gunmen and suicide bombers in Paris that killed at least 128 people in scenes of carnage at a concert hall, restaurants and the national stadium.

French President Francois Hollande also blamed the Islamic extremist group for the bloodshed and called the coordinated assault on Friday night at six different sites an "act of war" (AFP, Paris)

Later, France attacked the capital of the Islamic State for retaliation.

# “Proxy war” over Pipeline of Underground Resources in Syria

There is a theory behind of the emergence of the IS which has been kept mysterious, the United States, CIA, NATO and Israel as the hidden power organizations. By creating the dummy's terror group as IS, let them invade Syria, and US is repeating an aerial bombardment in Syria in the name of "Eradication of IS". The purpose is said to be underground resources in Syria. When the originally located Arabian pipeline would be completed, the EU countries could get resources irrespective of Russia.

However, Syria agrees to make an Islam pipeline with Iraq and Iran. This situation gives advantage to Russia, and the EU countries don't want to make this happen.

# The “Village of Bodhisattvas” The Realization of the World over Religion and Ideologies

No matter how superior the method is, it should not be considered scripture. If people depend too much on such a thing, they will not be able to attain the same spiritual level as those who revealed it. The path to further evolution will also be closed. Those who seek this become believers and the group then becomes organized religion. Organizations remove people’s freedom. Therefore, do not make an organization. What we should make instead is people’s bond free from egos and a place to gather and talk.

Living in the universe is taking the path of eternal evolution, growth and change. It is important for each individual to become aware of it through his or her own independent will, and then to connect with each other (as in the figure of the universe and the global ecosystem).

This is the embodiment of Utopia as expressed in the 21<sup>st</sup> century, in the Buddha of community and in the “Village of Bodhisattvas.”
