

**The 10<sup>th</sup> *Otona* Summit**  
**The Earth Summit at Konohana Family**

# The Dawn of the Galaxy

**From July 16<sup>th</sup> to 18<sup>th</sup>, 2016**  
**The Village of Bodhisattvas, Konohana Family**

# The First Part: Introduction

The Sun which orbits the galaxy and spirals with a cycle of 25800 years has now ushered in “the Era of Integration.”

On this planet where representatives of stars travelling in the universe gather, each one of us becomes awakened and returns to the original figure as HITO.

This is the awakening of stars which consist of the galaxy.

That is, the dawn of the galaxy.

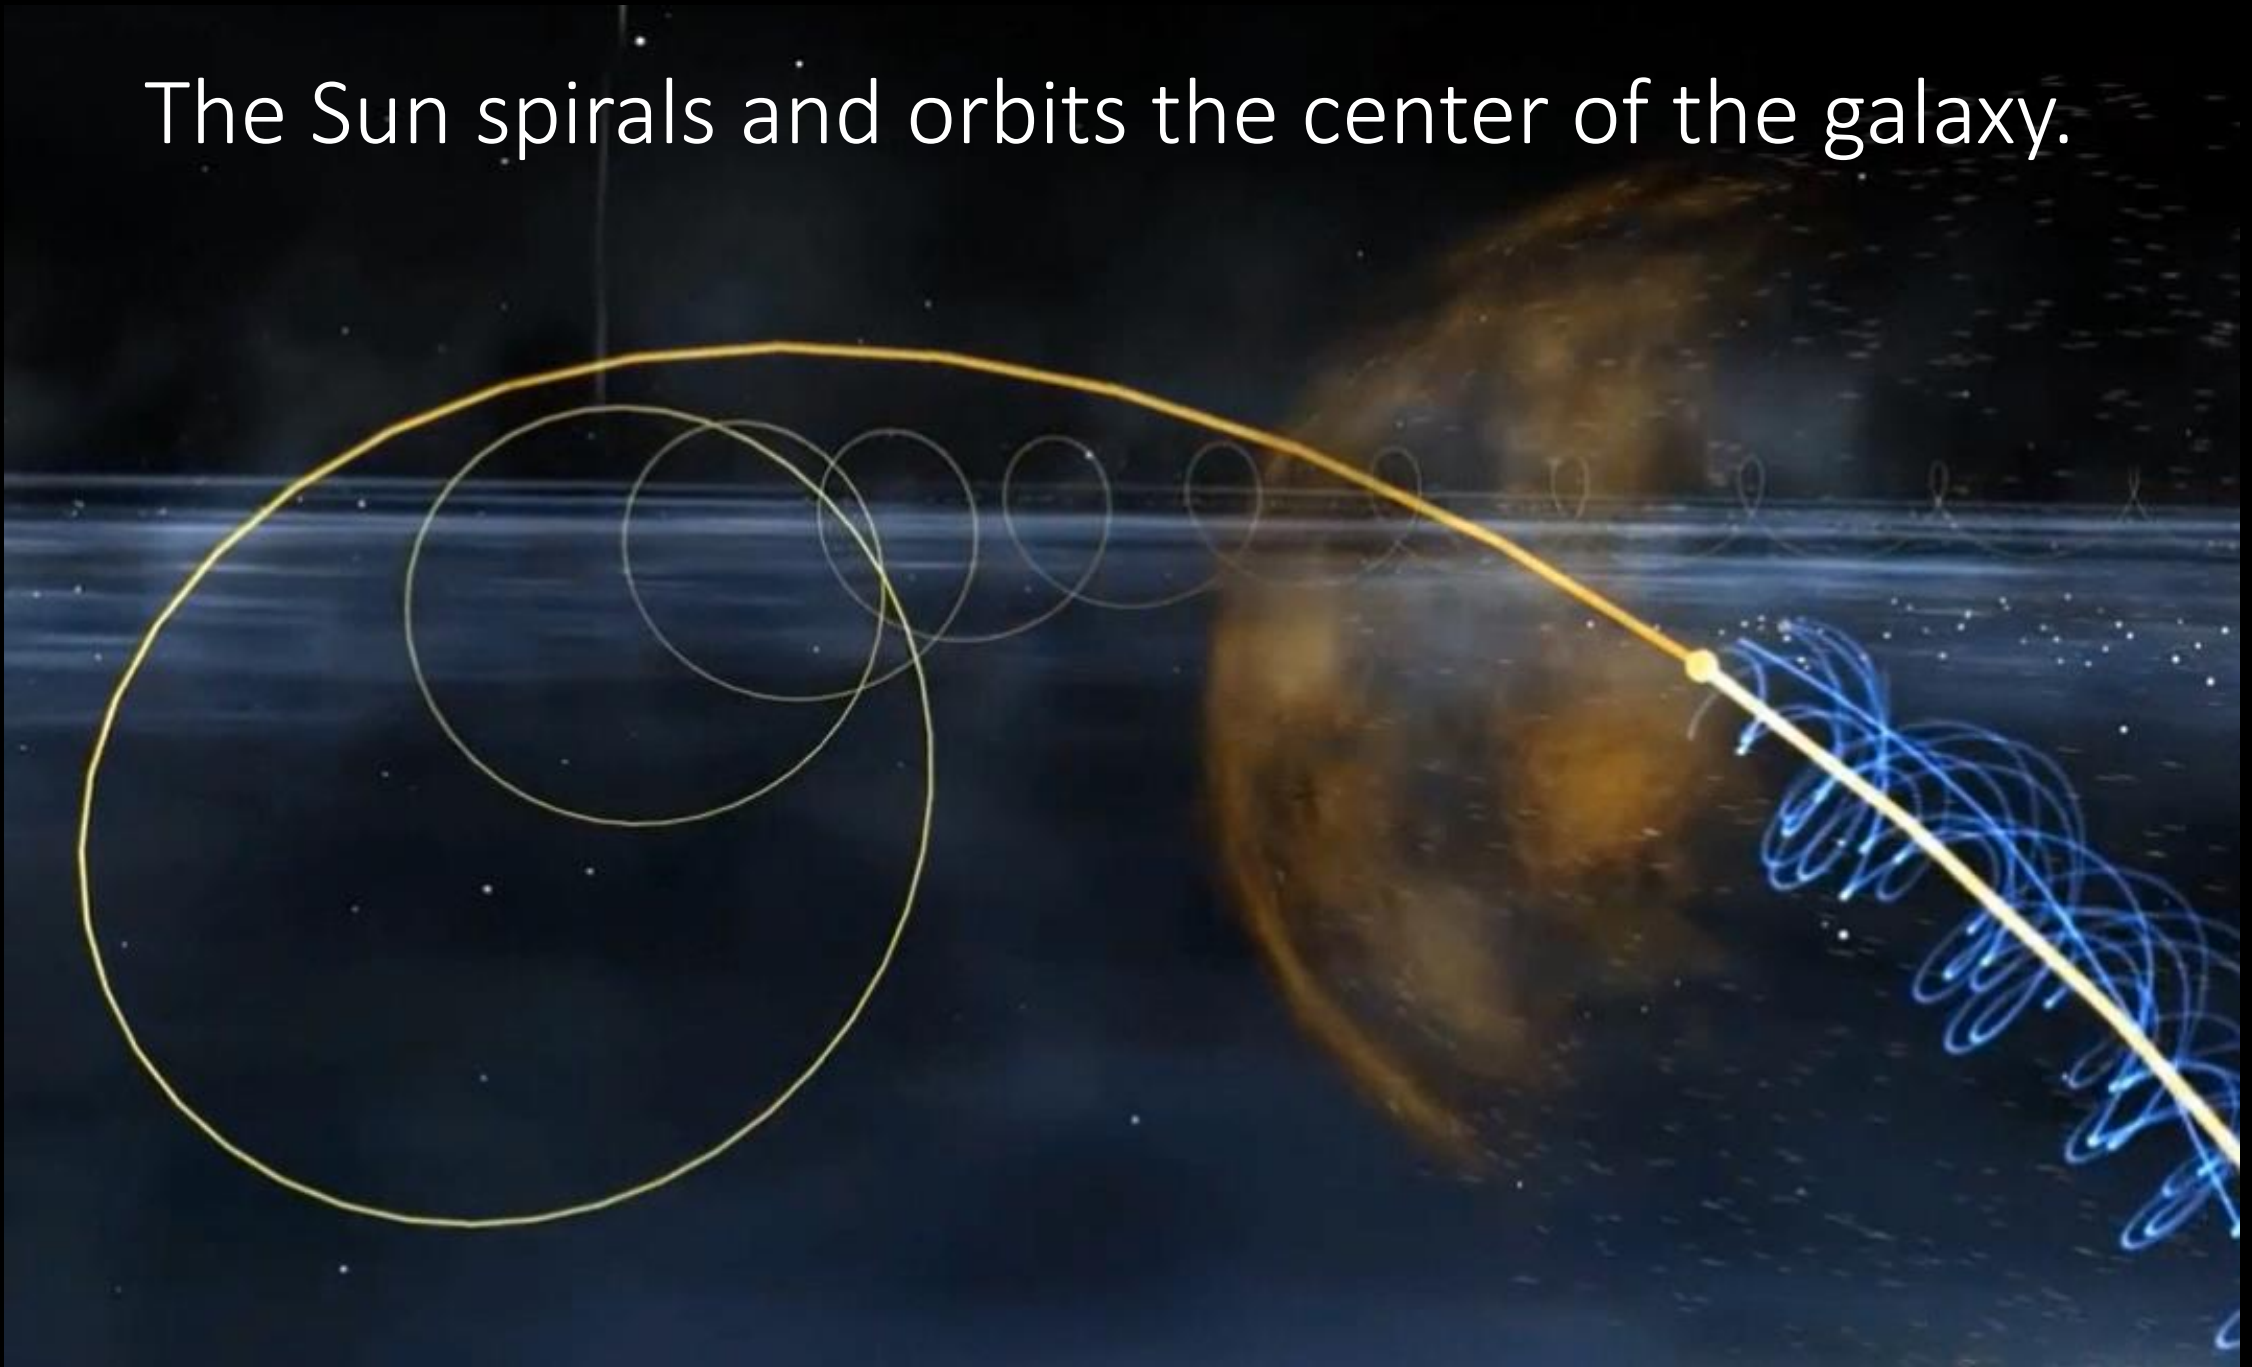

When the timing comes,  
there is something  
which comes into sight.

The Sun guides the planets  
and moves in the universe.

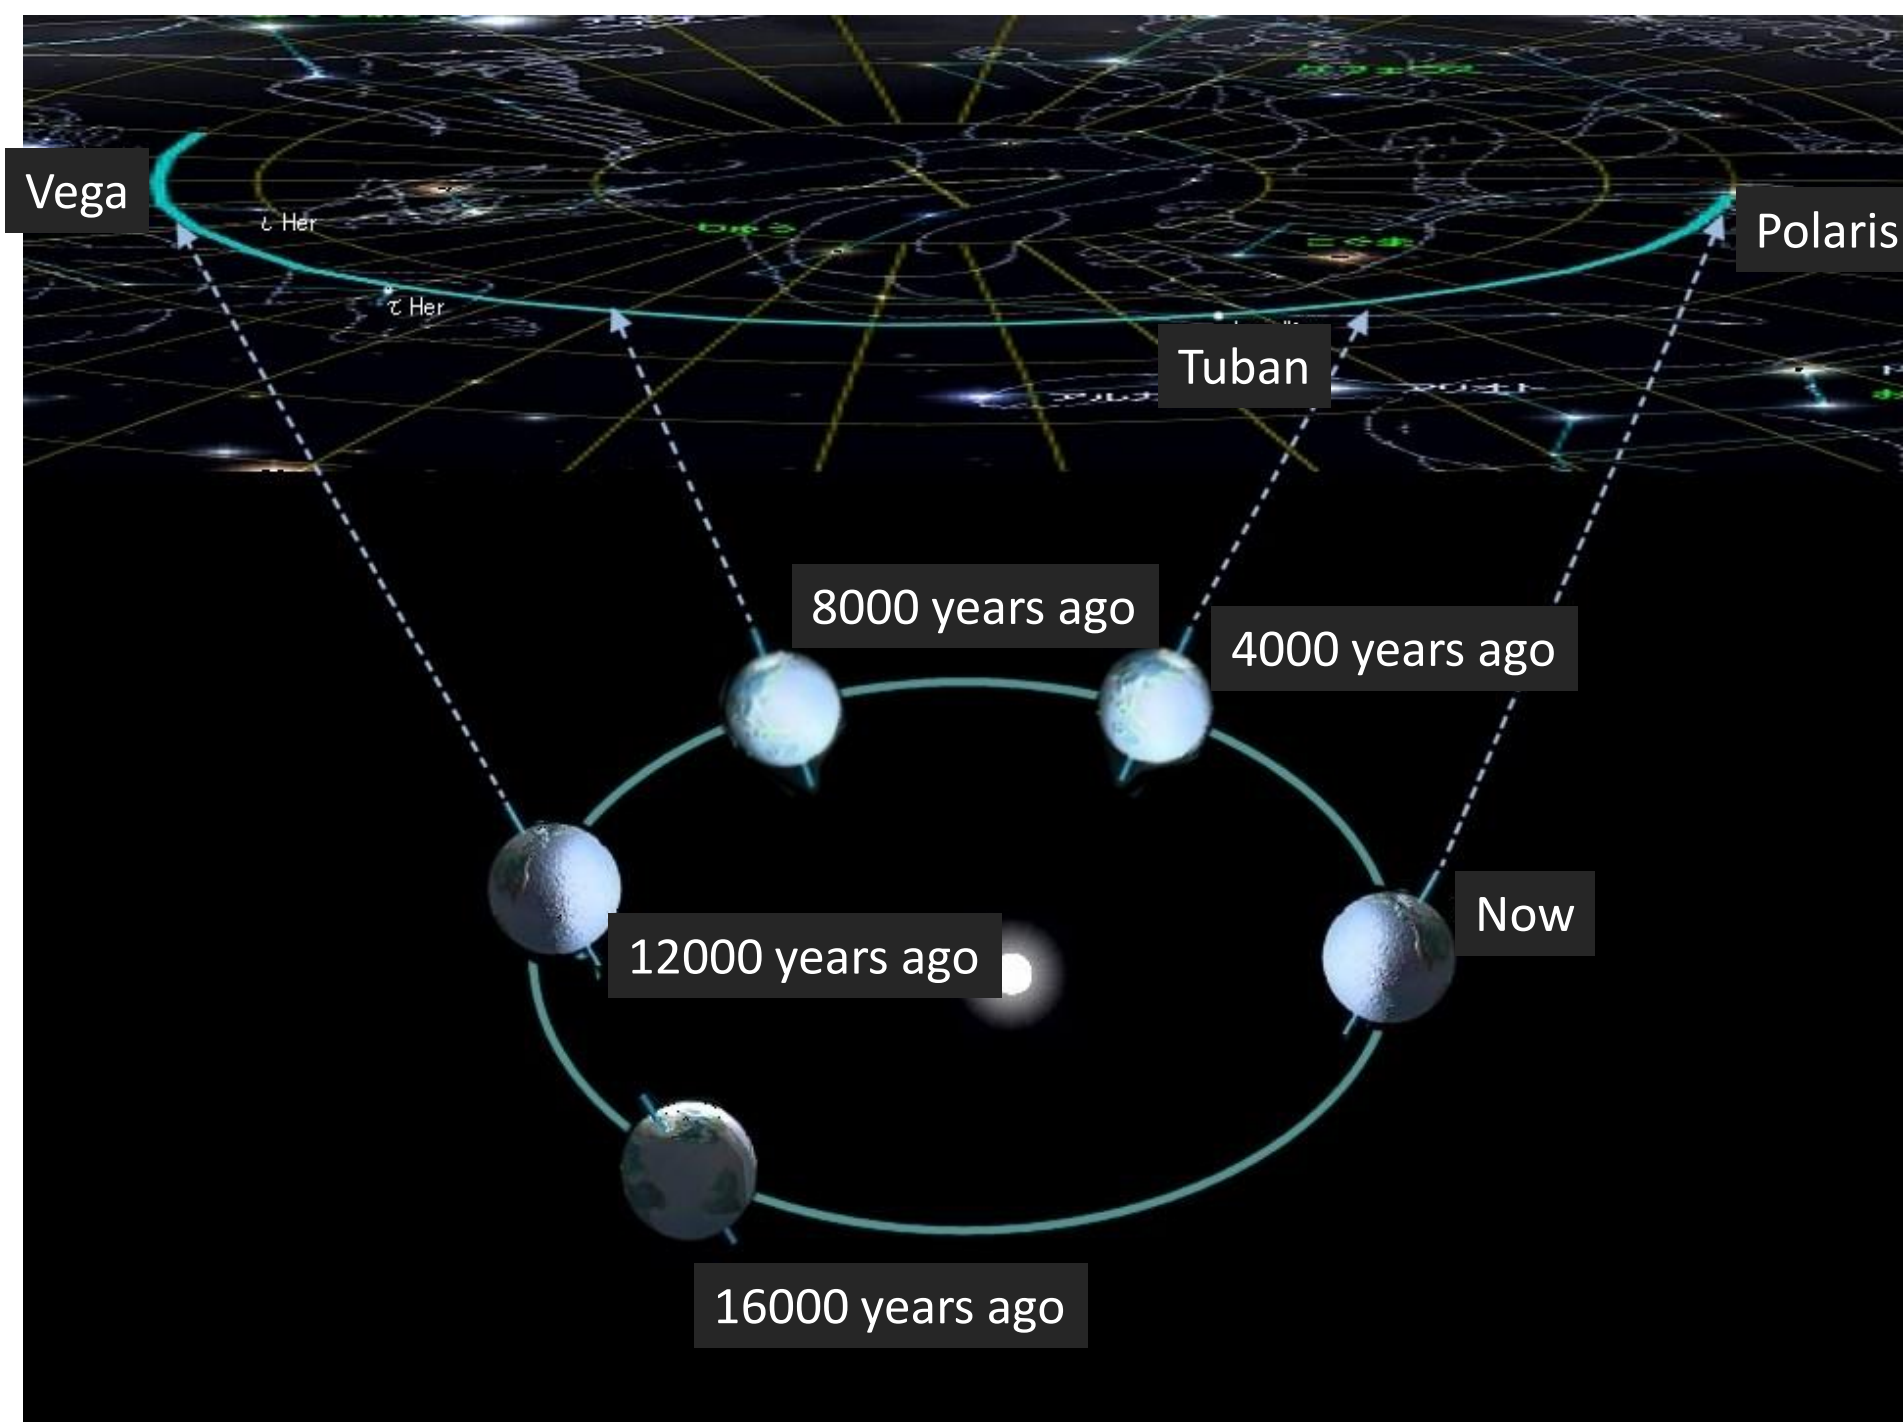

The Sun spirals and orbits the center of the galaxy.

The polar axis shifts along with the era, by the precession movement of the earth.

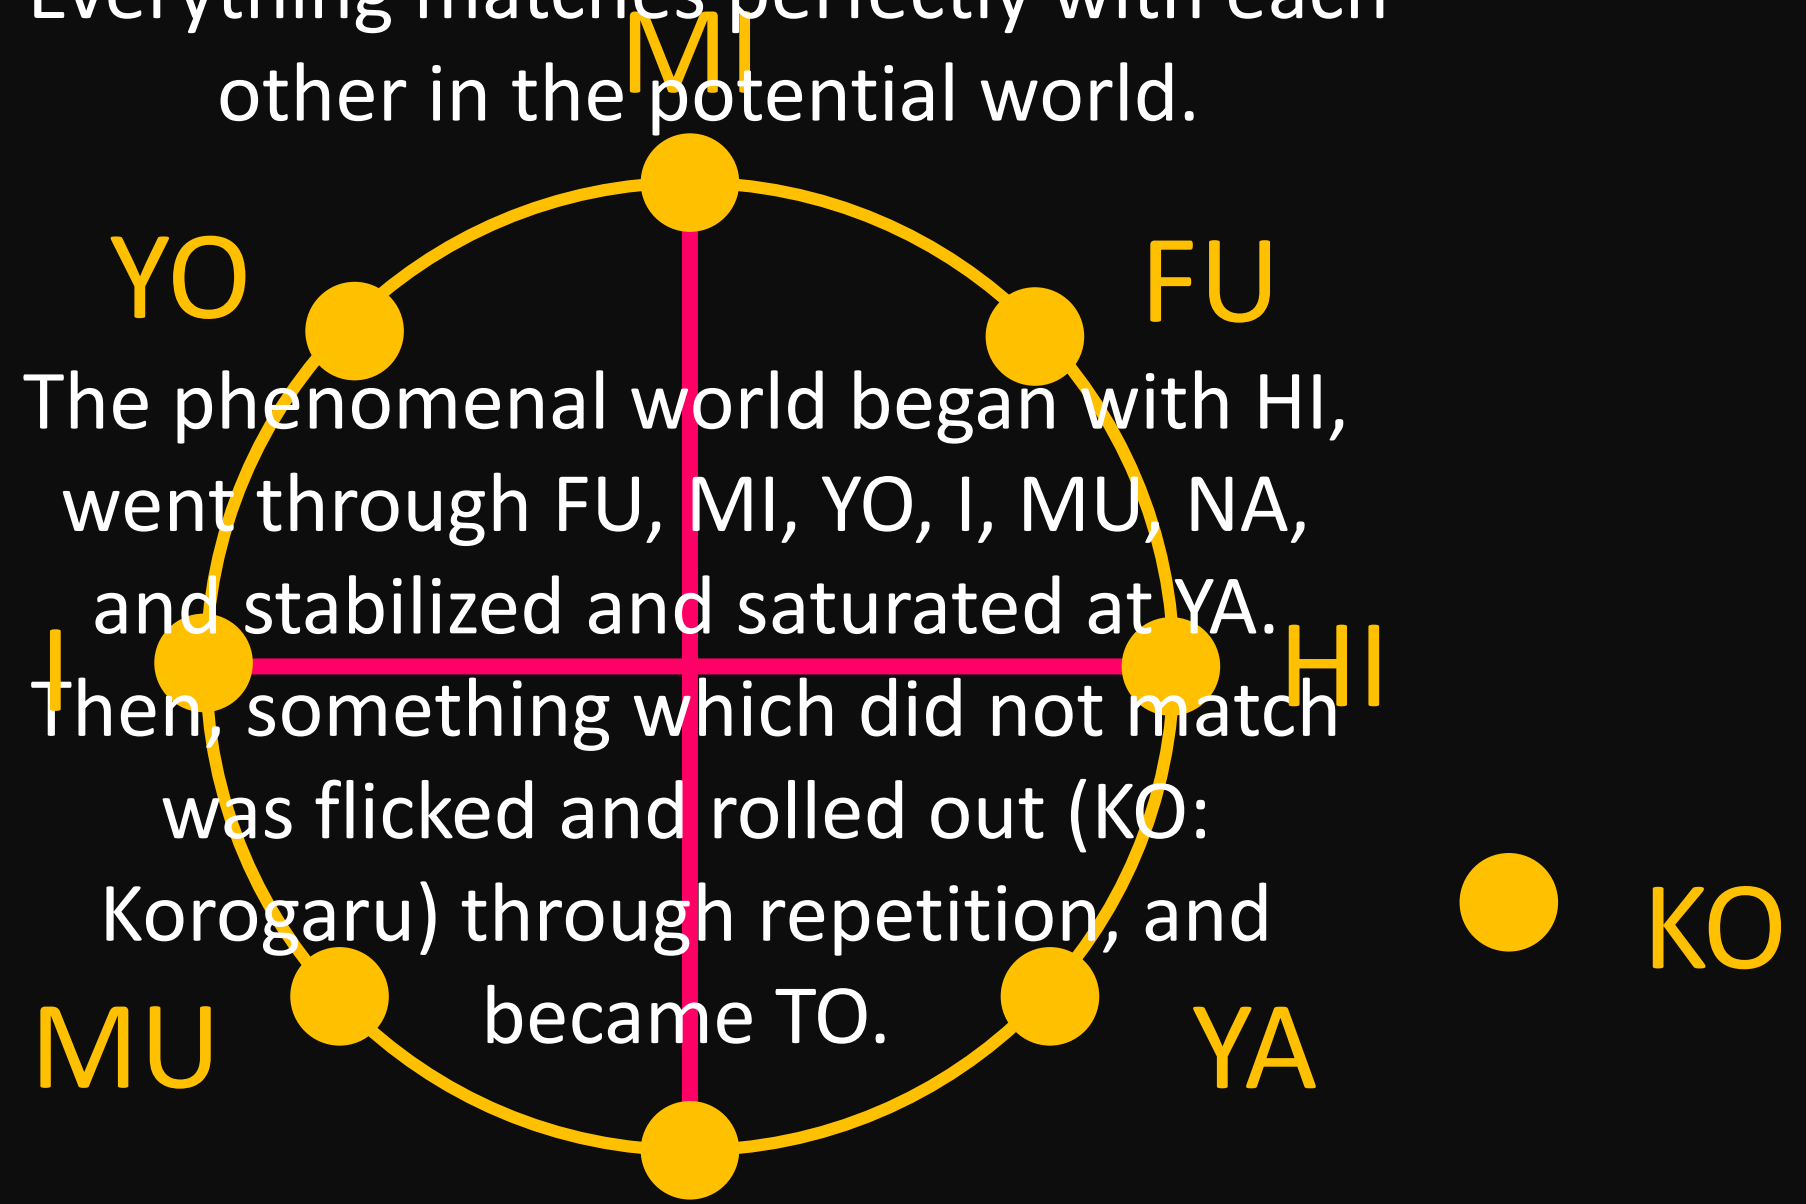

We were created into the world with existence  
(the phenomenal universe )

From an error of the world with non-  
existence (the potential universe).

Everything matches perfectly with each other in the potential world.

The phenomenal world began with HI, went through FU, MI, YO, I, MU, NA, and stabilized and saturated at YA. Then, something which did not match was flicked and rolled out (KO: Korogaru) through repetition, and became TO.

The creation of the world began in this manner.

Humans are in the process of moving toward HITO.

Humans (NINGEN) = “Two-dimensional (NIGEN)” existence

HI FU MI YO I MU NA YA KO TO

HITO (1+10) = MIKOTO (existence to integrate HITO)

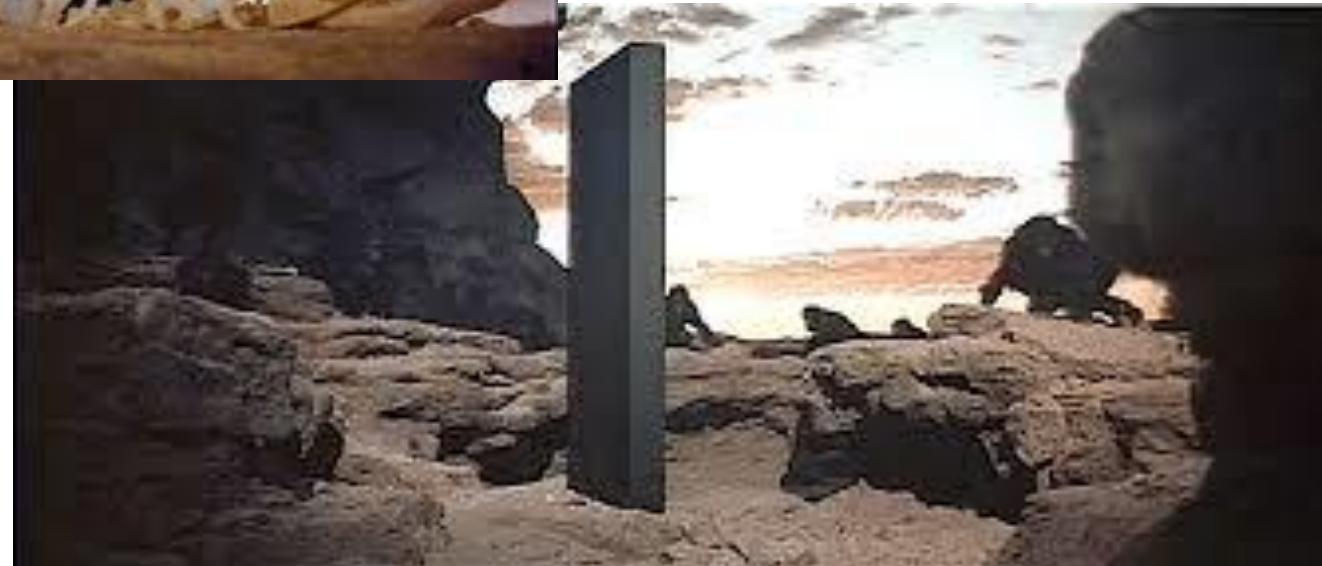

The time has arrived when we make a leap toward an integrated existence.

HITO is the one who understands the universal principle of numbers from HI to TO.

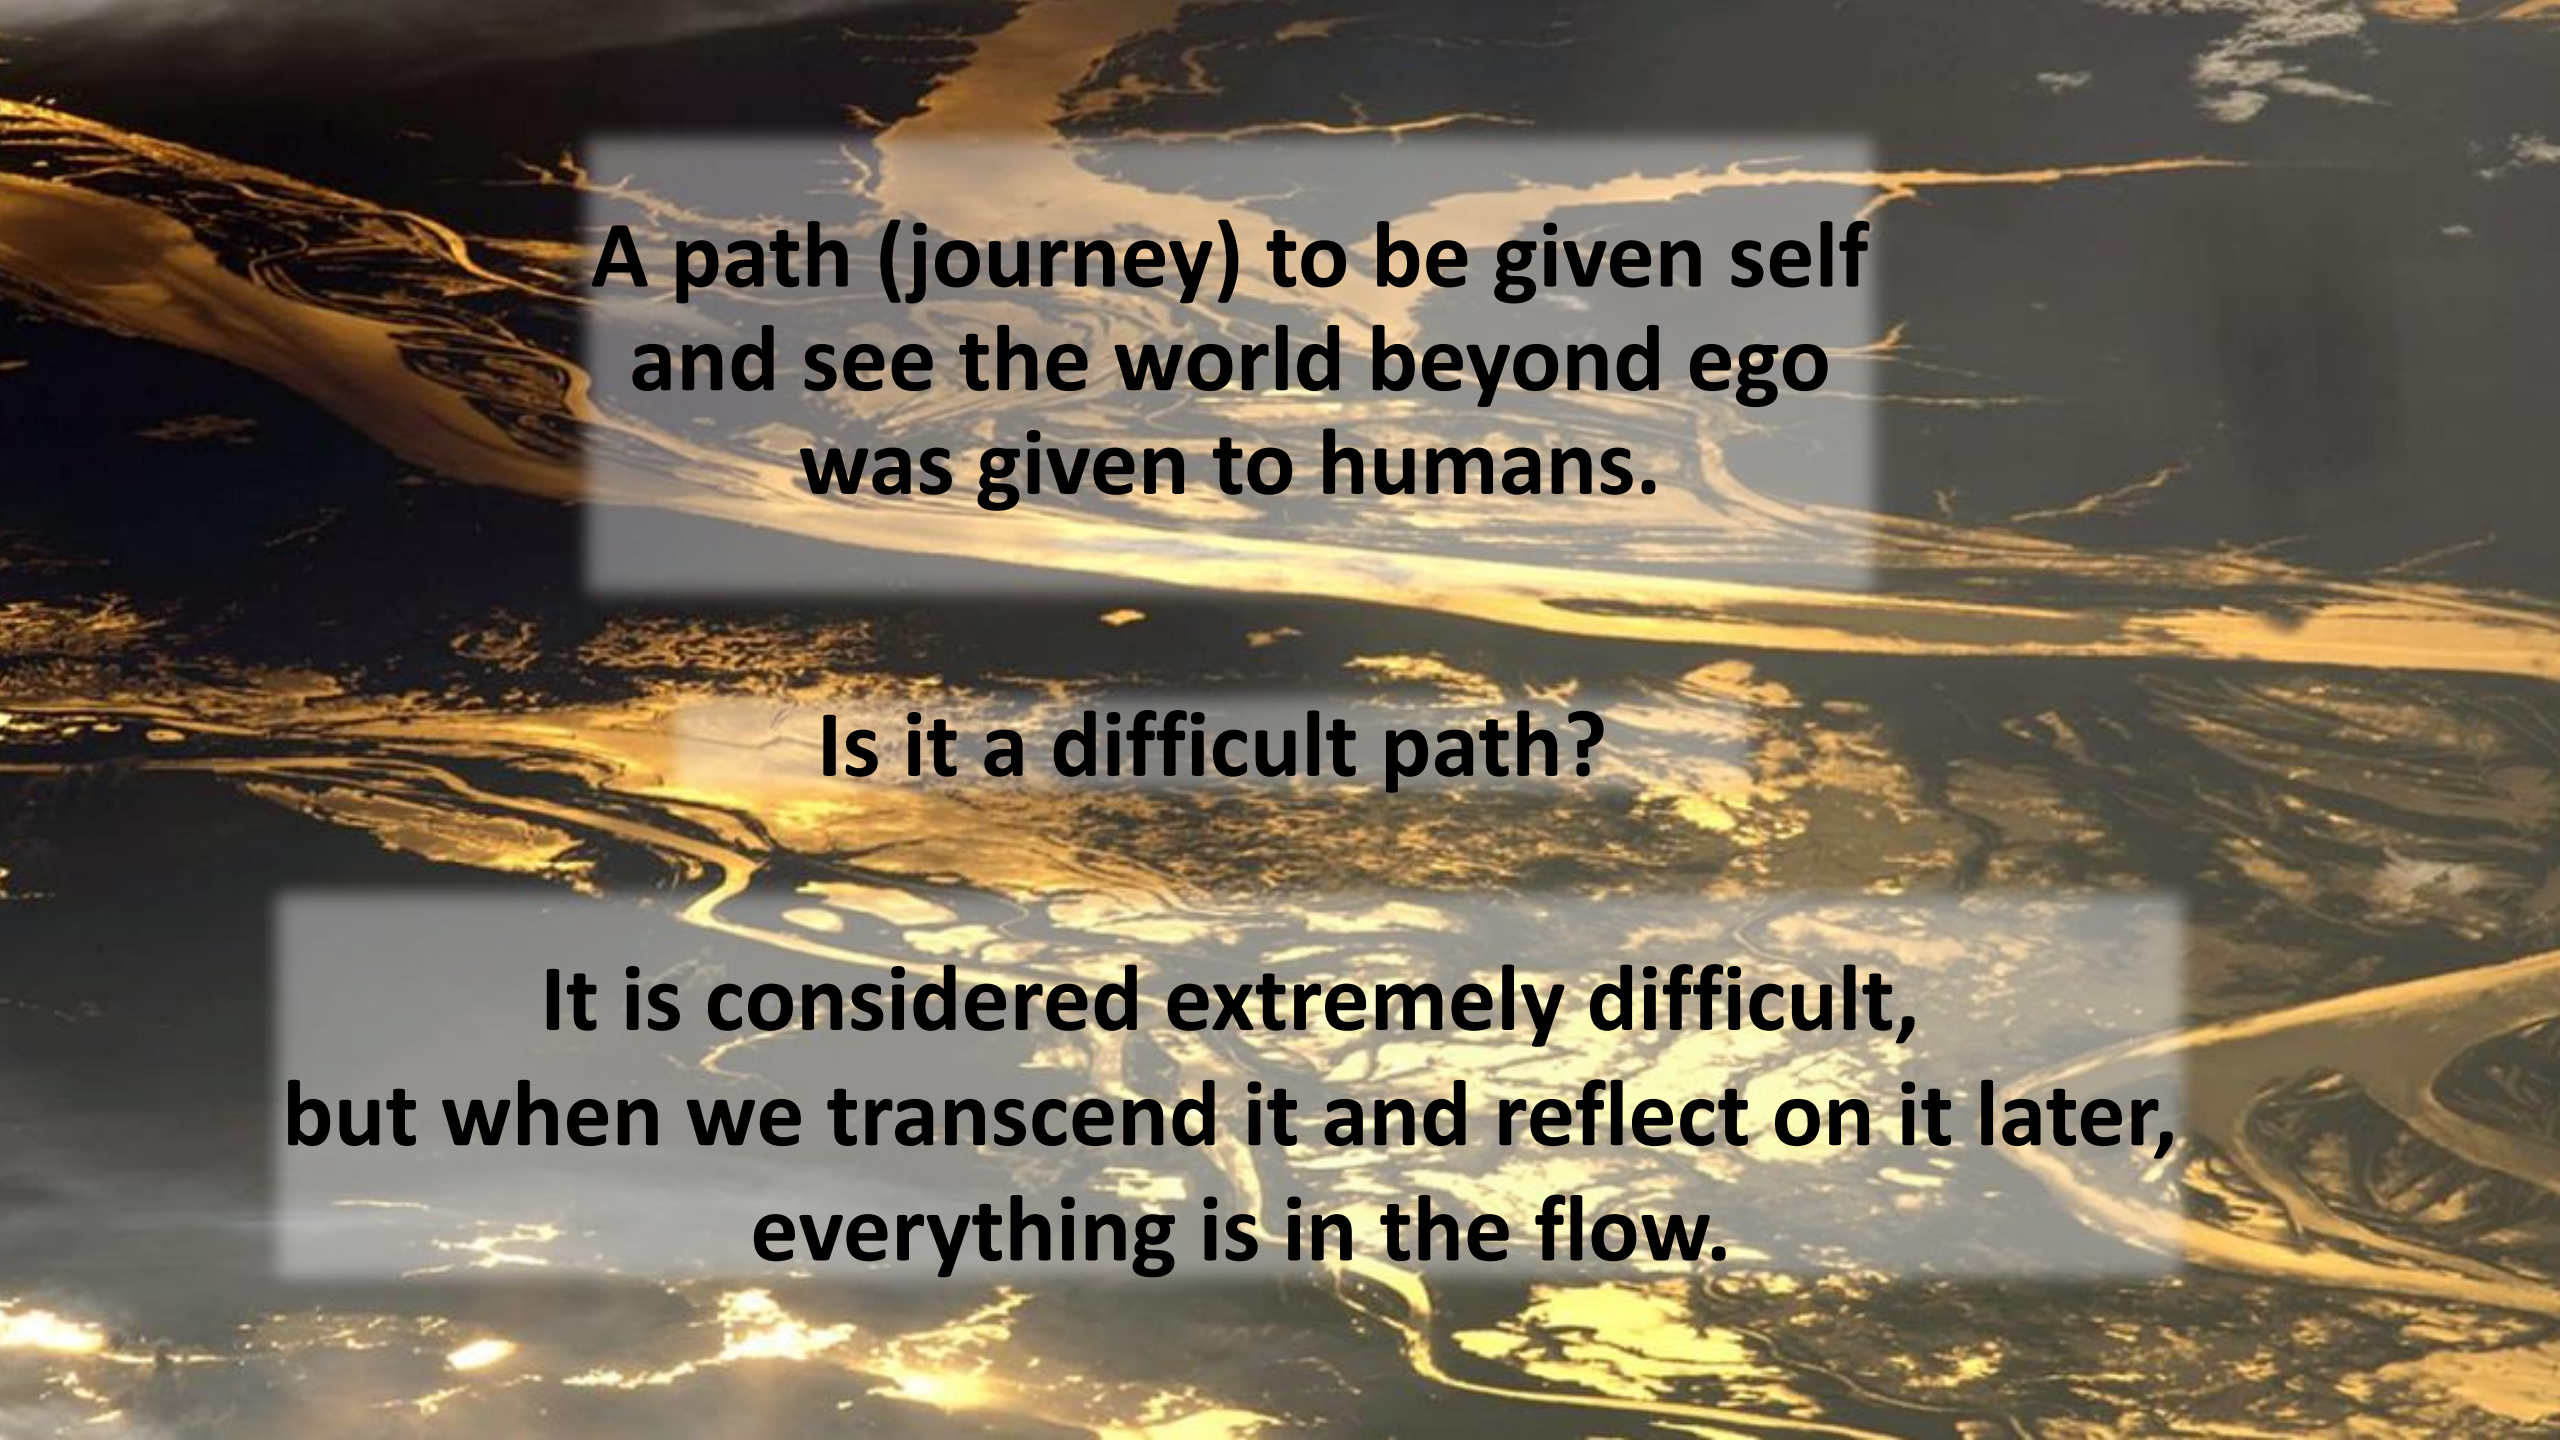

**Originally, one was divided, and individuals emerged. Then, humans were born from its diversity.**

**Egos were born in the diversity, and “the freedom of creation” was given in an extension of ego.**

**A path (journey) to be given self  
and see the world beyond ego  
was given to humans.**

**Is it a difficult path?**

**It is considered extremely difficult,  
but when we transcend it and reflect on it later,  
everything is in the flow.**

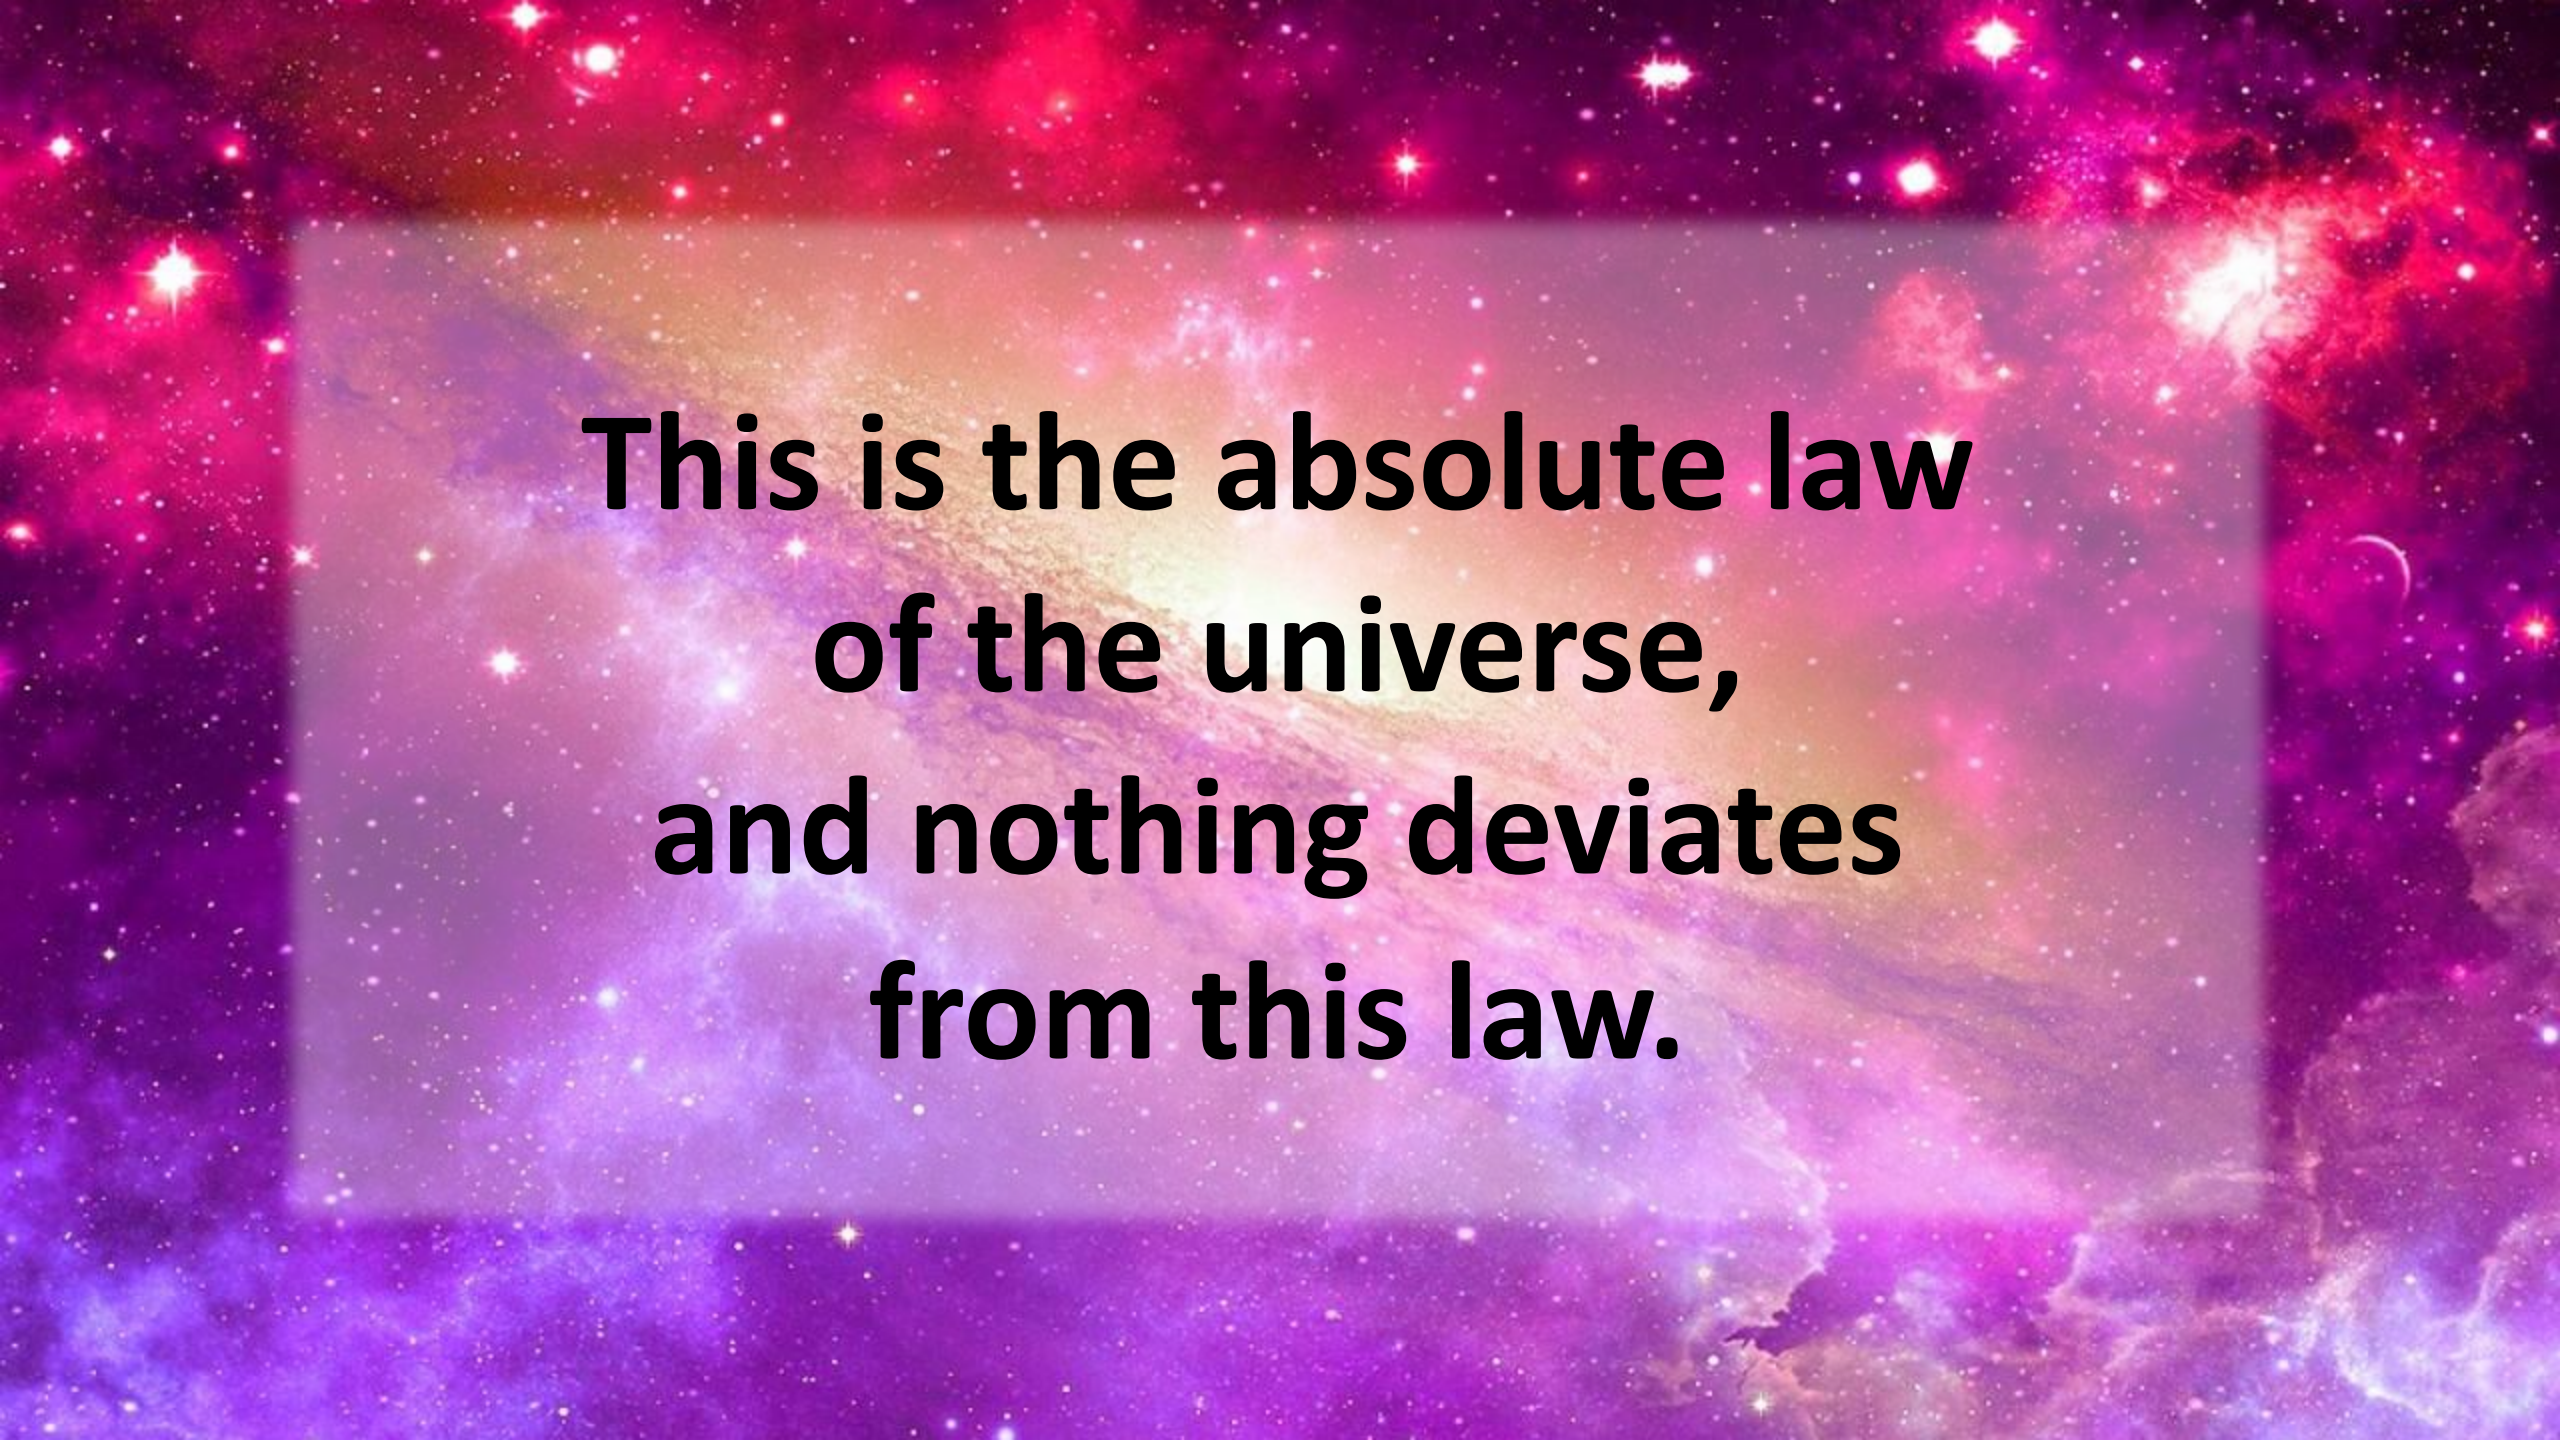

We never stay in the universe  
even for a moment, and  
continue to change.

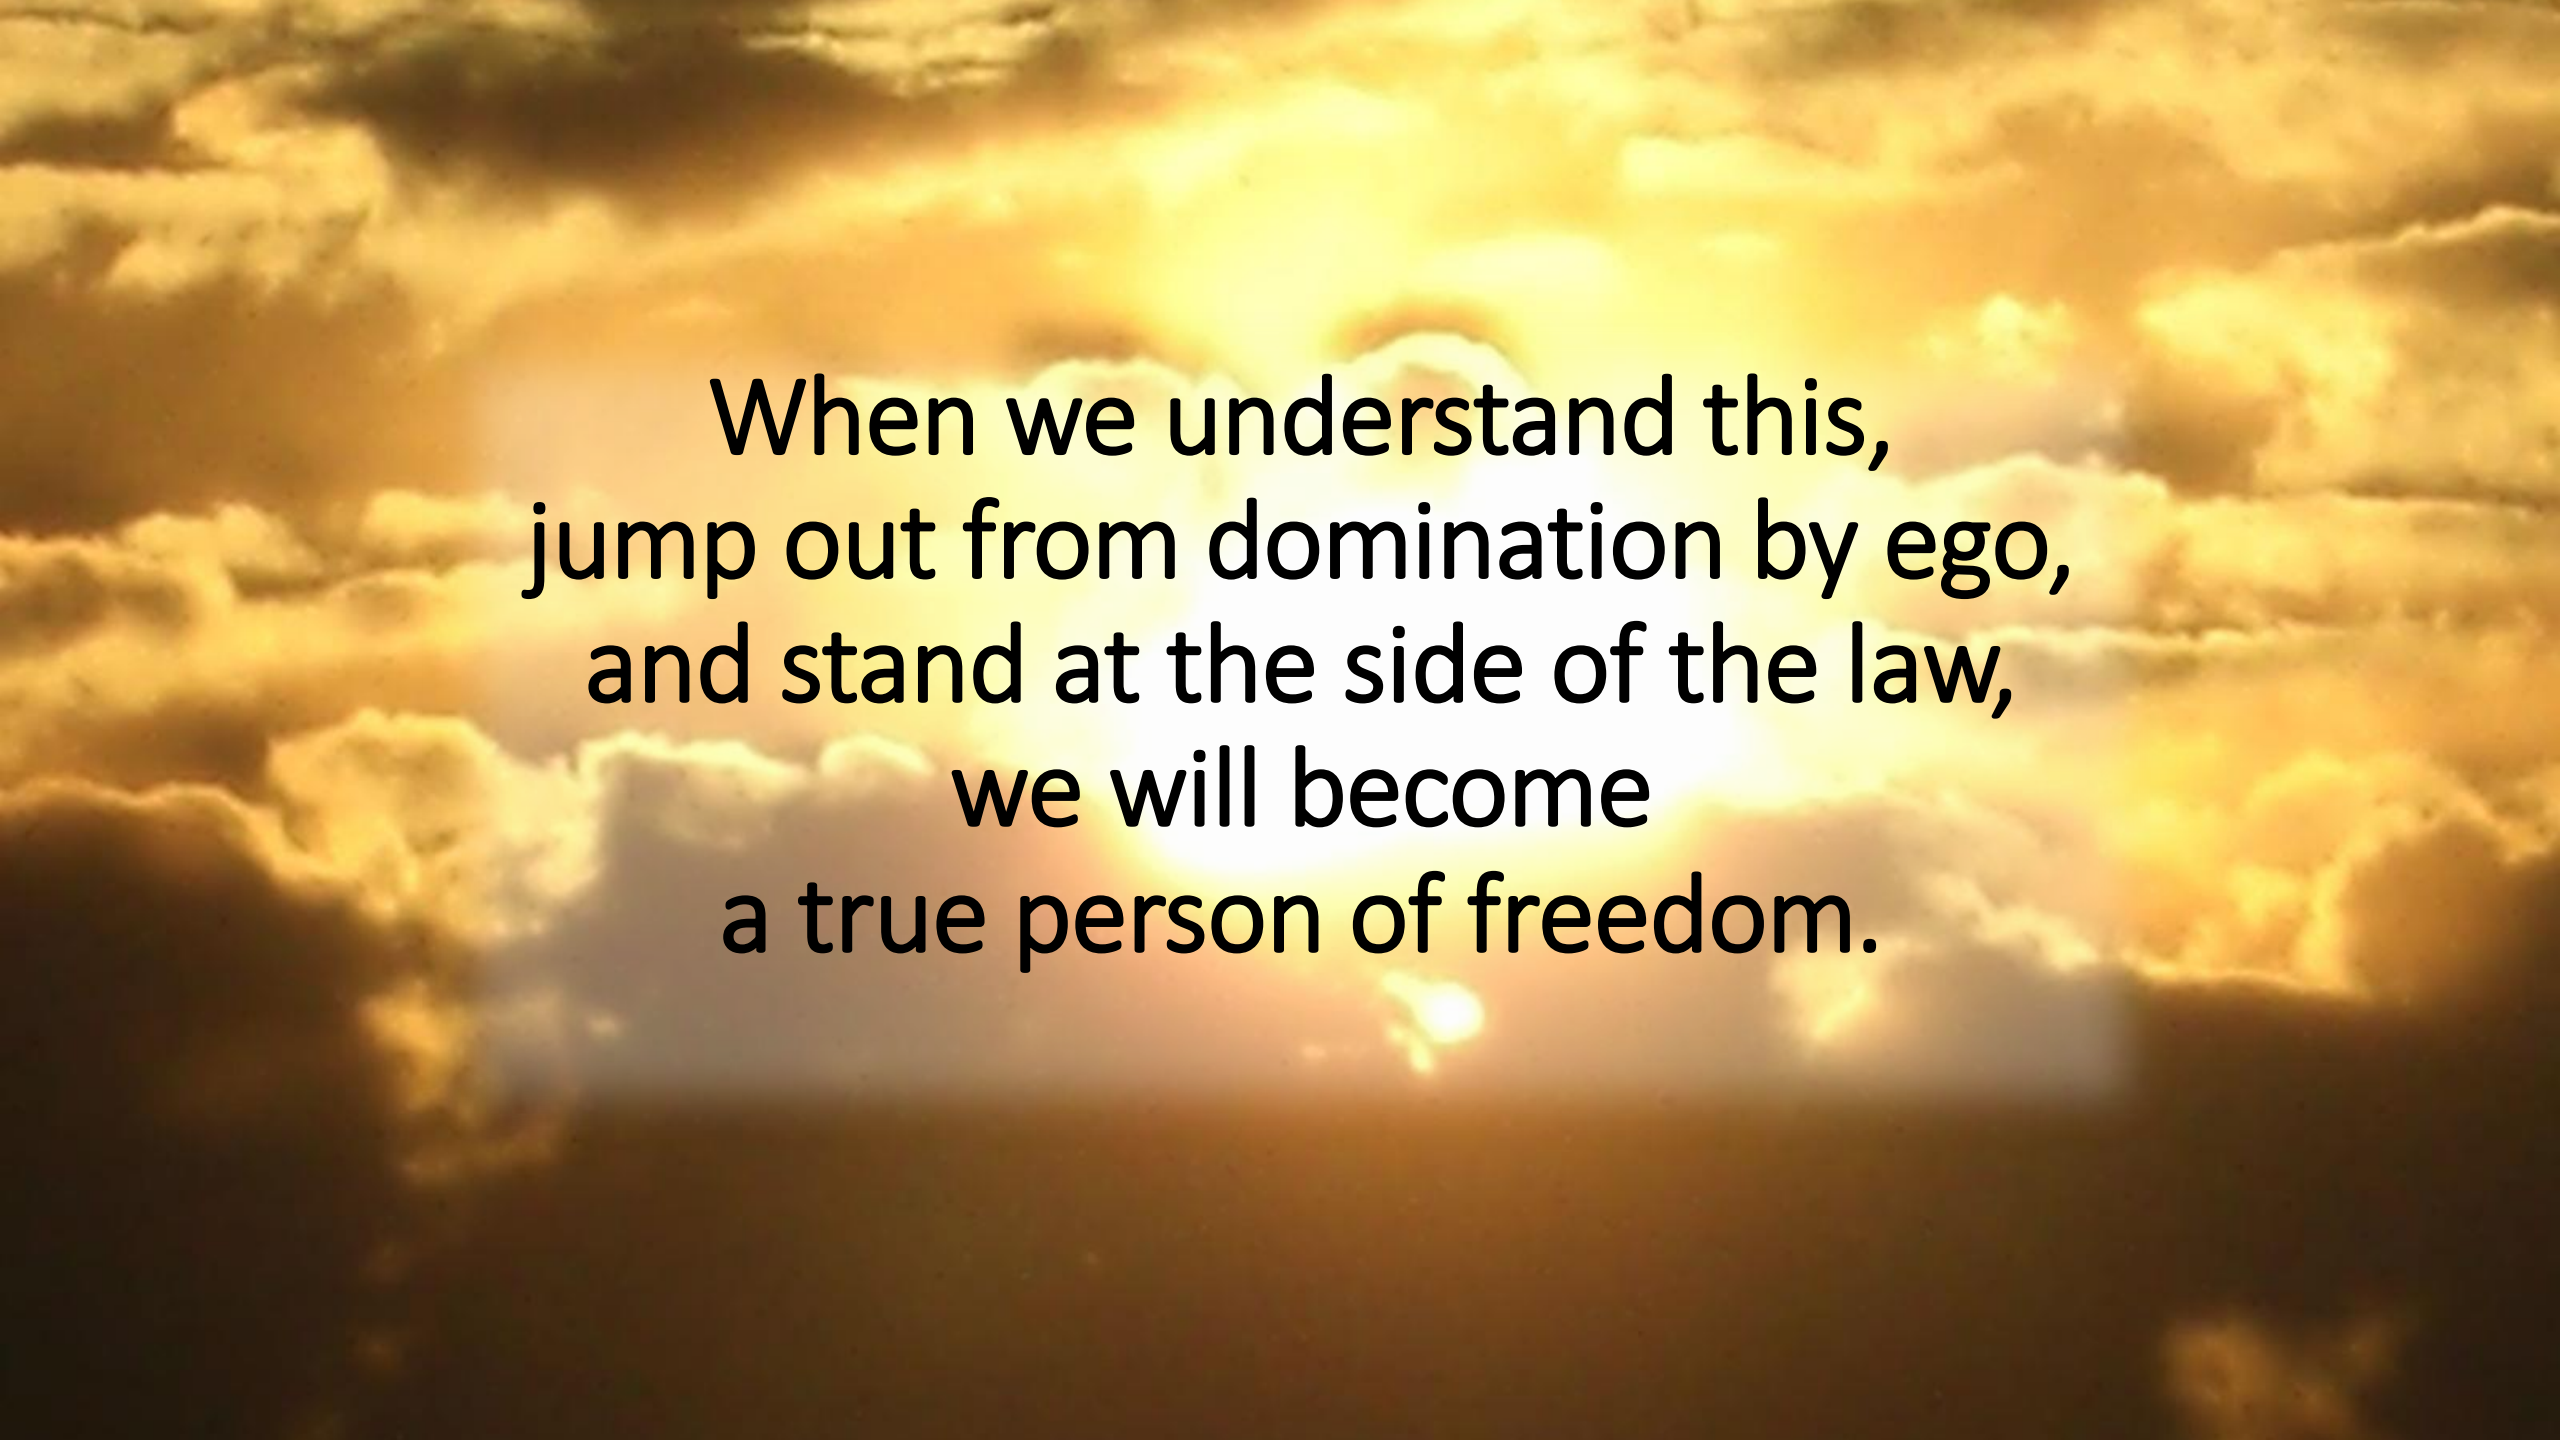

**A world where even  
truth changes along with  
the changes of the era**

**This is the absolute law  
of the universe,  
and nothing deviates  
from this law.**

A dramatic sky with a bright sunburst breaking through a layer of golden, textured clouds. The sun is positioned centrally, creating a strong lens flare and illuminating the surrounding clouds with a warm, golden light. The clouds are dense and have a soft, ethereal quality, with some darker areas where the light is less intense. The overall mood is one of hope, clarity, and enlightenment.

When we understand this,  
jump out from domination by ego,  
and stand at the side of the law,  
we will become  
a true person of freedom.

# The 2<sup>nd</sup> Part: Knowing our Position in the Era The Modern People Living at the Great Turning Point

Now that it has been 13.8 billion years since the universal creation of the Big Bang, and 4.6 billion years from the creation of the solar system and the earth,

We have been experiencing a time of severe changes when many turning points overlap along with the earth through a relationship woven by the planets.

What recognition should we face the current era with?

Peak of Light

Since the era passed  
“the peak of darkness”  
with a solar spiral of  
25800 year cycle, “the  
Night of Dawn” has  
begun.

Materialism  
is given  
over  
spirituality:  
Separation

Spirituality is  
given over  
materialism:  
Integration

The era of awakening began here.

Peak of Darkness

Three and half years after “the winter solstice of the galaxy” is called “the night of dawn.”

Integration

Turning Point from darkness to light

Midst

Resurgence of Katakamuna  
Era of People's Awakening

In July, 2009  
Beginning of Morning of “Dawn of Galaxy”

On December 21<sup>st</sup>, 2012

On June 21<sup>st</sup>, 2016

Winter Solstice of Galaxy Peak of Darkness

Summer Solstice of Galaxy

Morning of Dawn (3.5 years) Night of Dawn (3.5 years)

These 7 years (meaning a qualitative shift) is “Dawn of Galaxy”

## The Golden God says as follows:

At “the unexpected time after the midst,” a new system begins and so does the purification of Japan. It is “a difference between HITO (an awakened one) and JYU (a monster).”

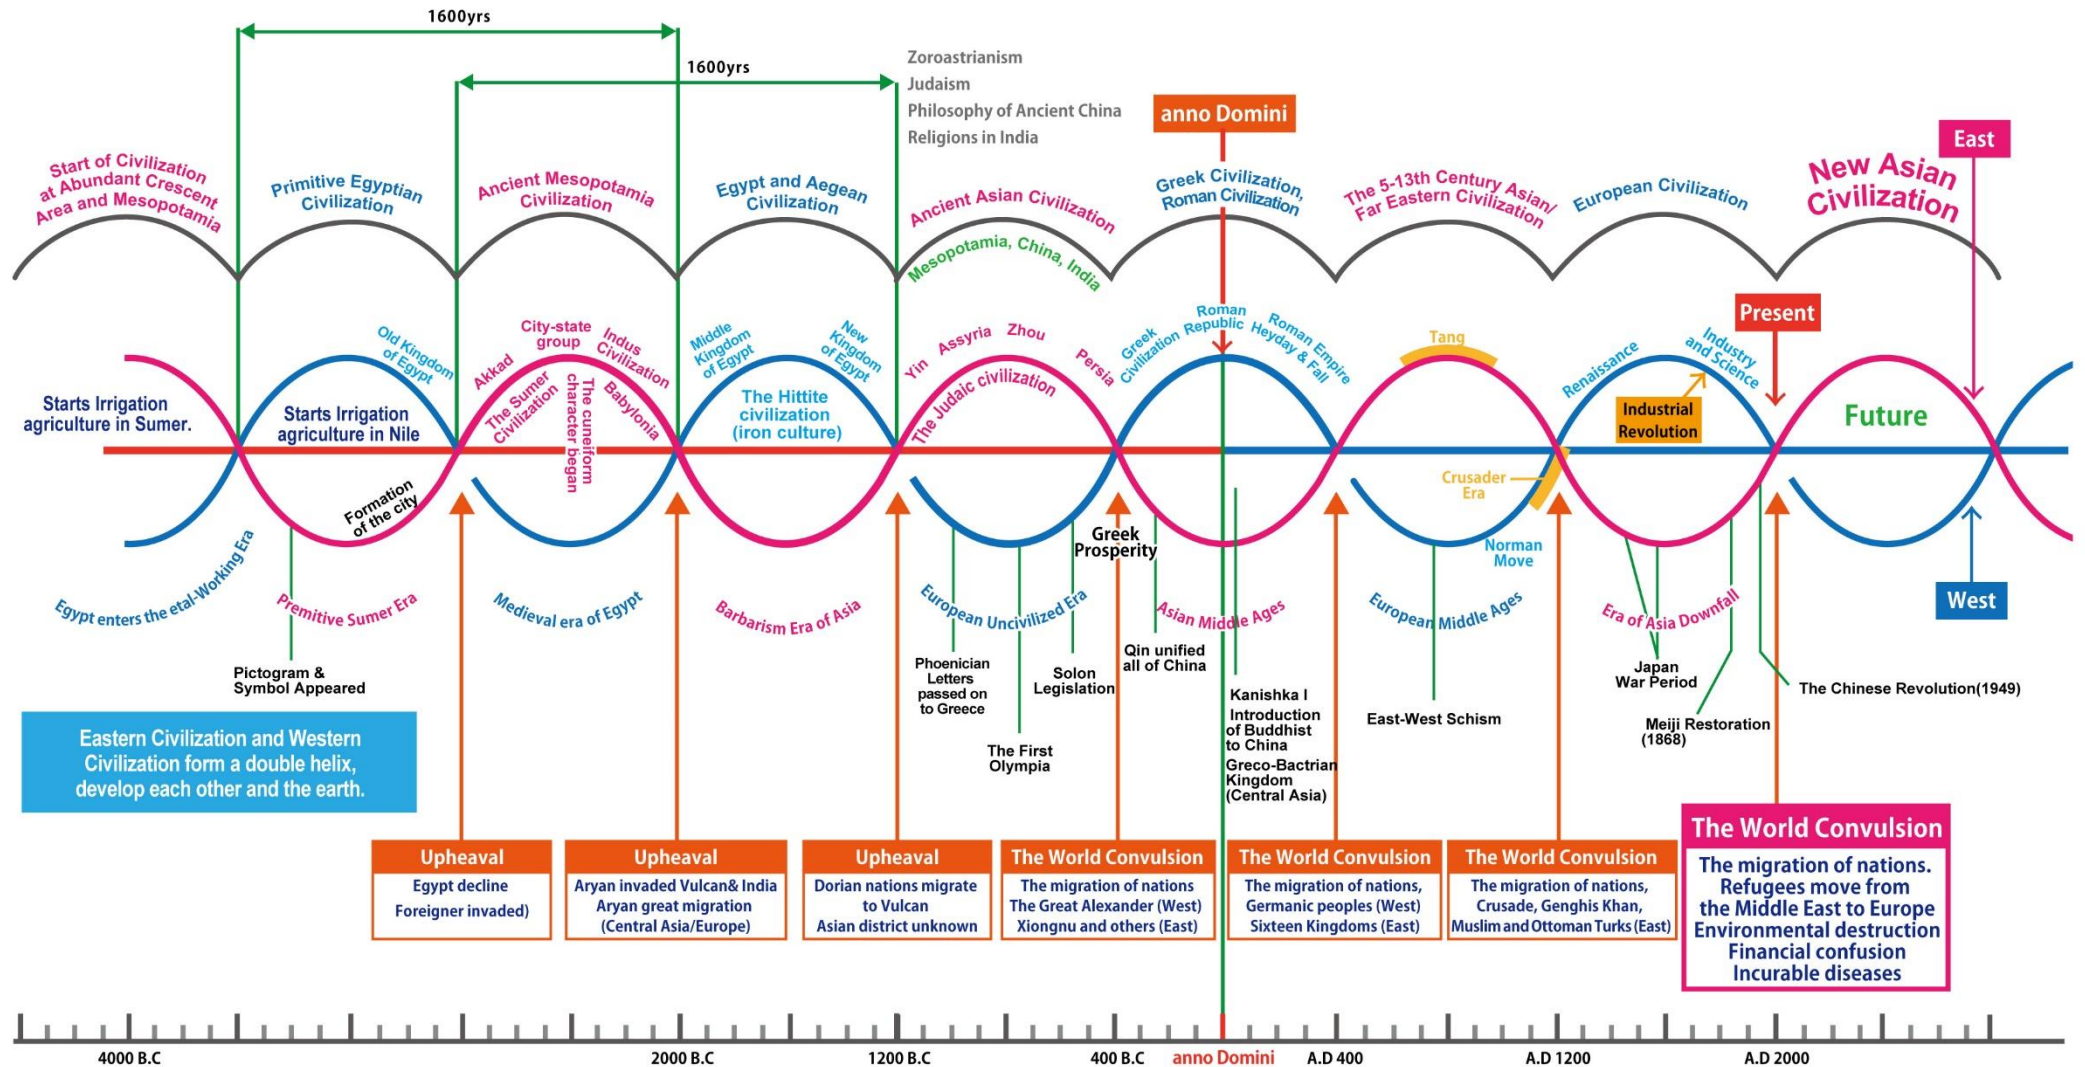

“Over three years, your minds and spirits should endure what is difficult to endure and improve in your place what has been transformed into a battlefield. Please listen before a new system begins. Once it begins, God will not intervene at all over three years.”

The midst means “the winter solstice of the galaxy.”

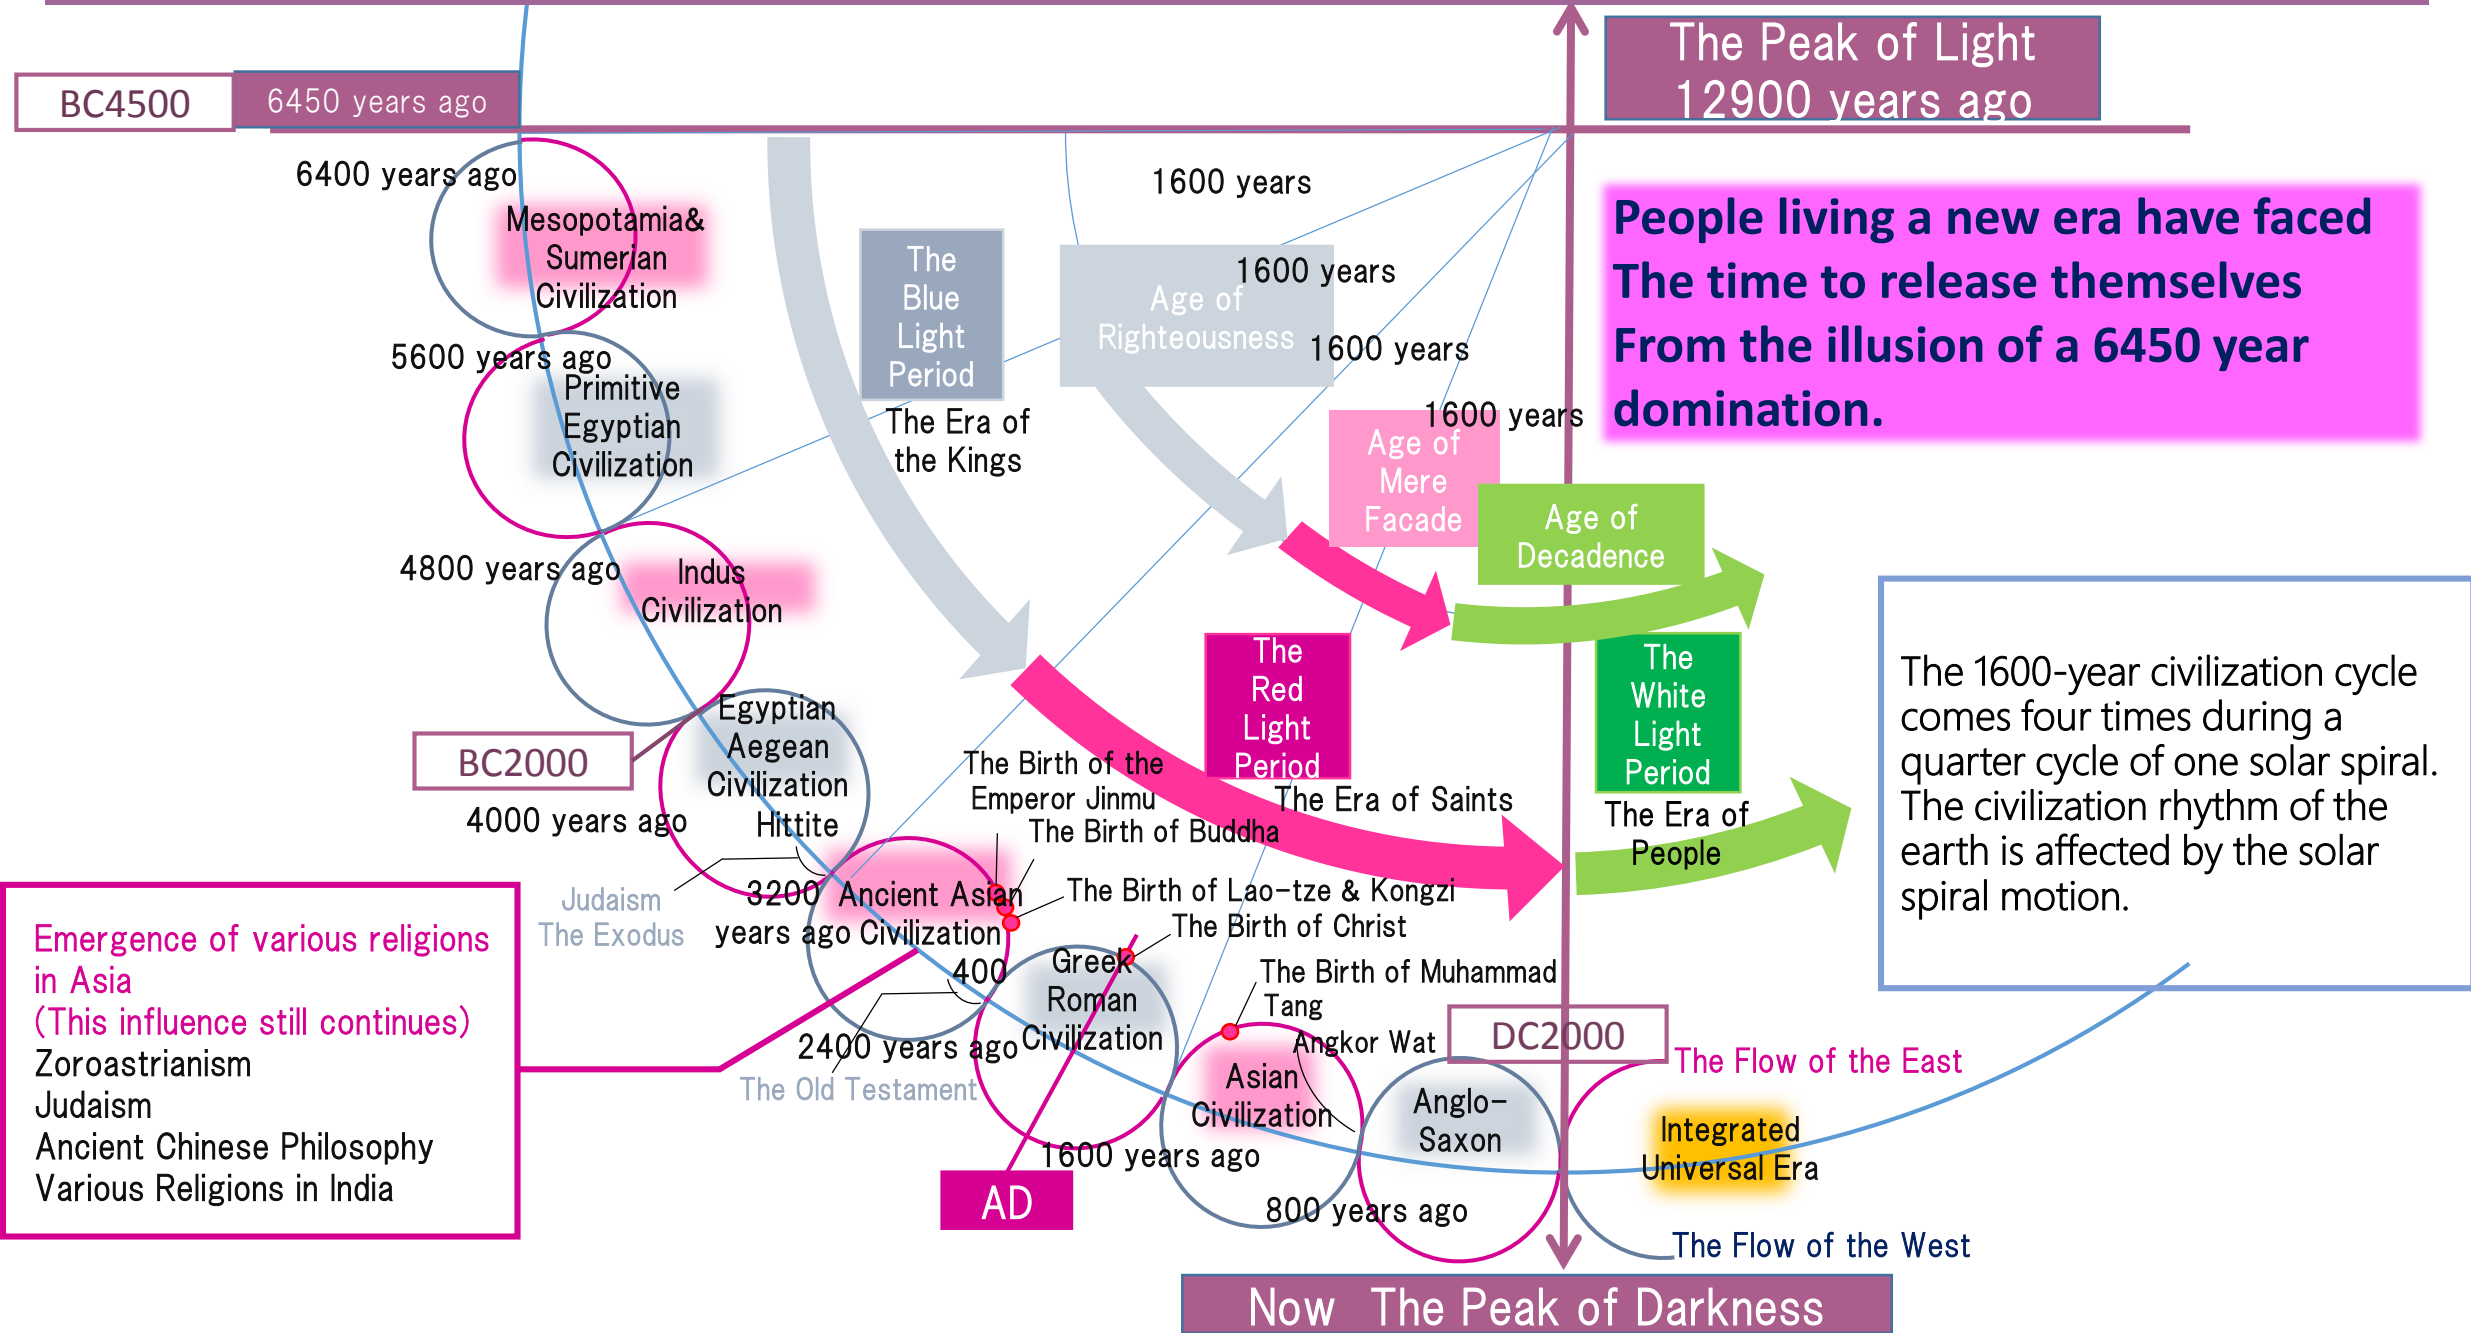

“The unexpected time after the midst” and “a three year period when a new system begins” means “the night of dawn” after “the winter solstice of the galaxy.”

# The 1600-year Cycle of the Eastern and Western Civilizations

Characteristics of Each Civilization	Spiritual Civilization	Civilization of the Bishop and Aristocrat in Every City	Civilization of the Bishop and Royal Authority	Systematization of Religious Doctrine	Civil Republic/ Great Empire	Prosperity of Art	Academics / Science and Technology / Machine and Industrialization	Integrated Univers View
--------------------------------------	------------------------	---	--	---------------------------------------	------------------------------	-------------------	--	-------------------------

# Quarter Cycle of One Solar Spiral “The Era of Emerging Civilization”

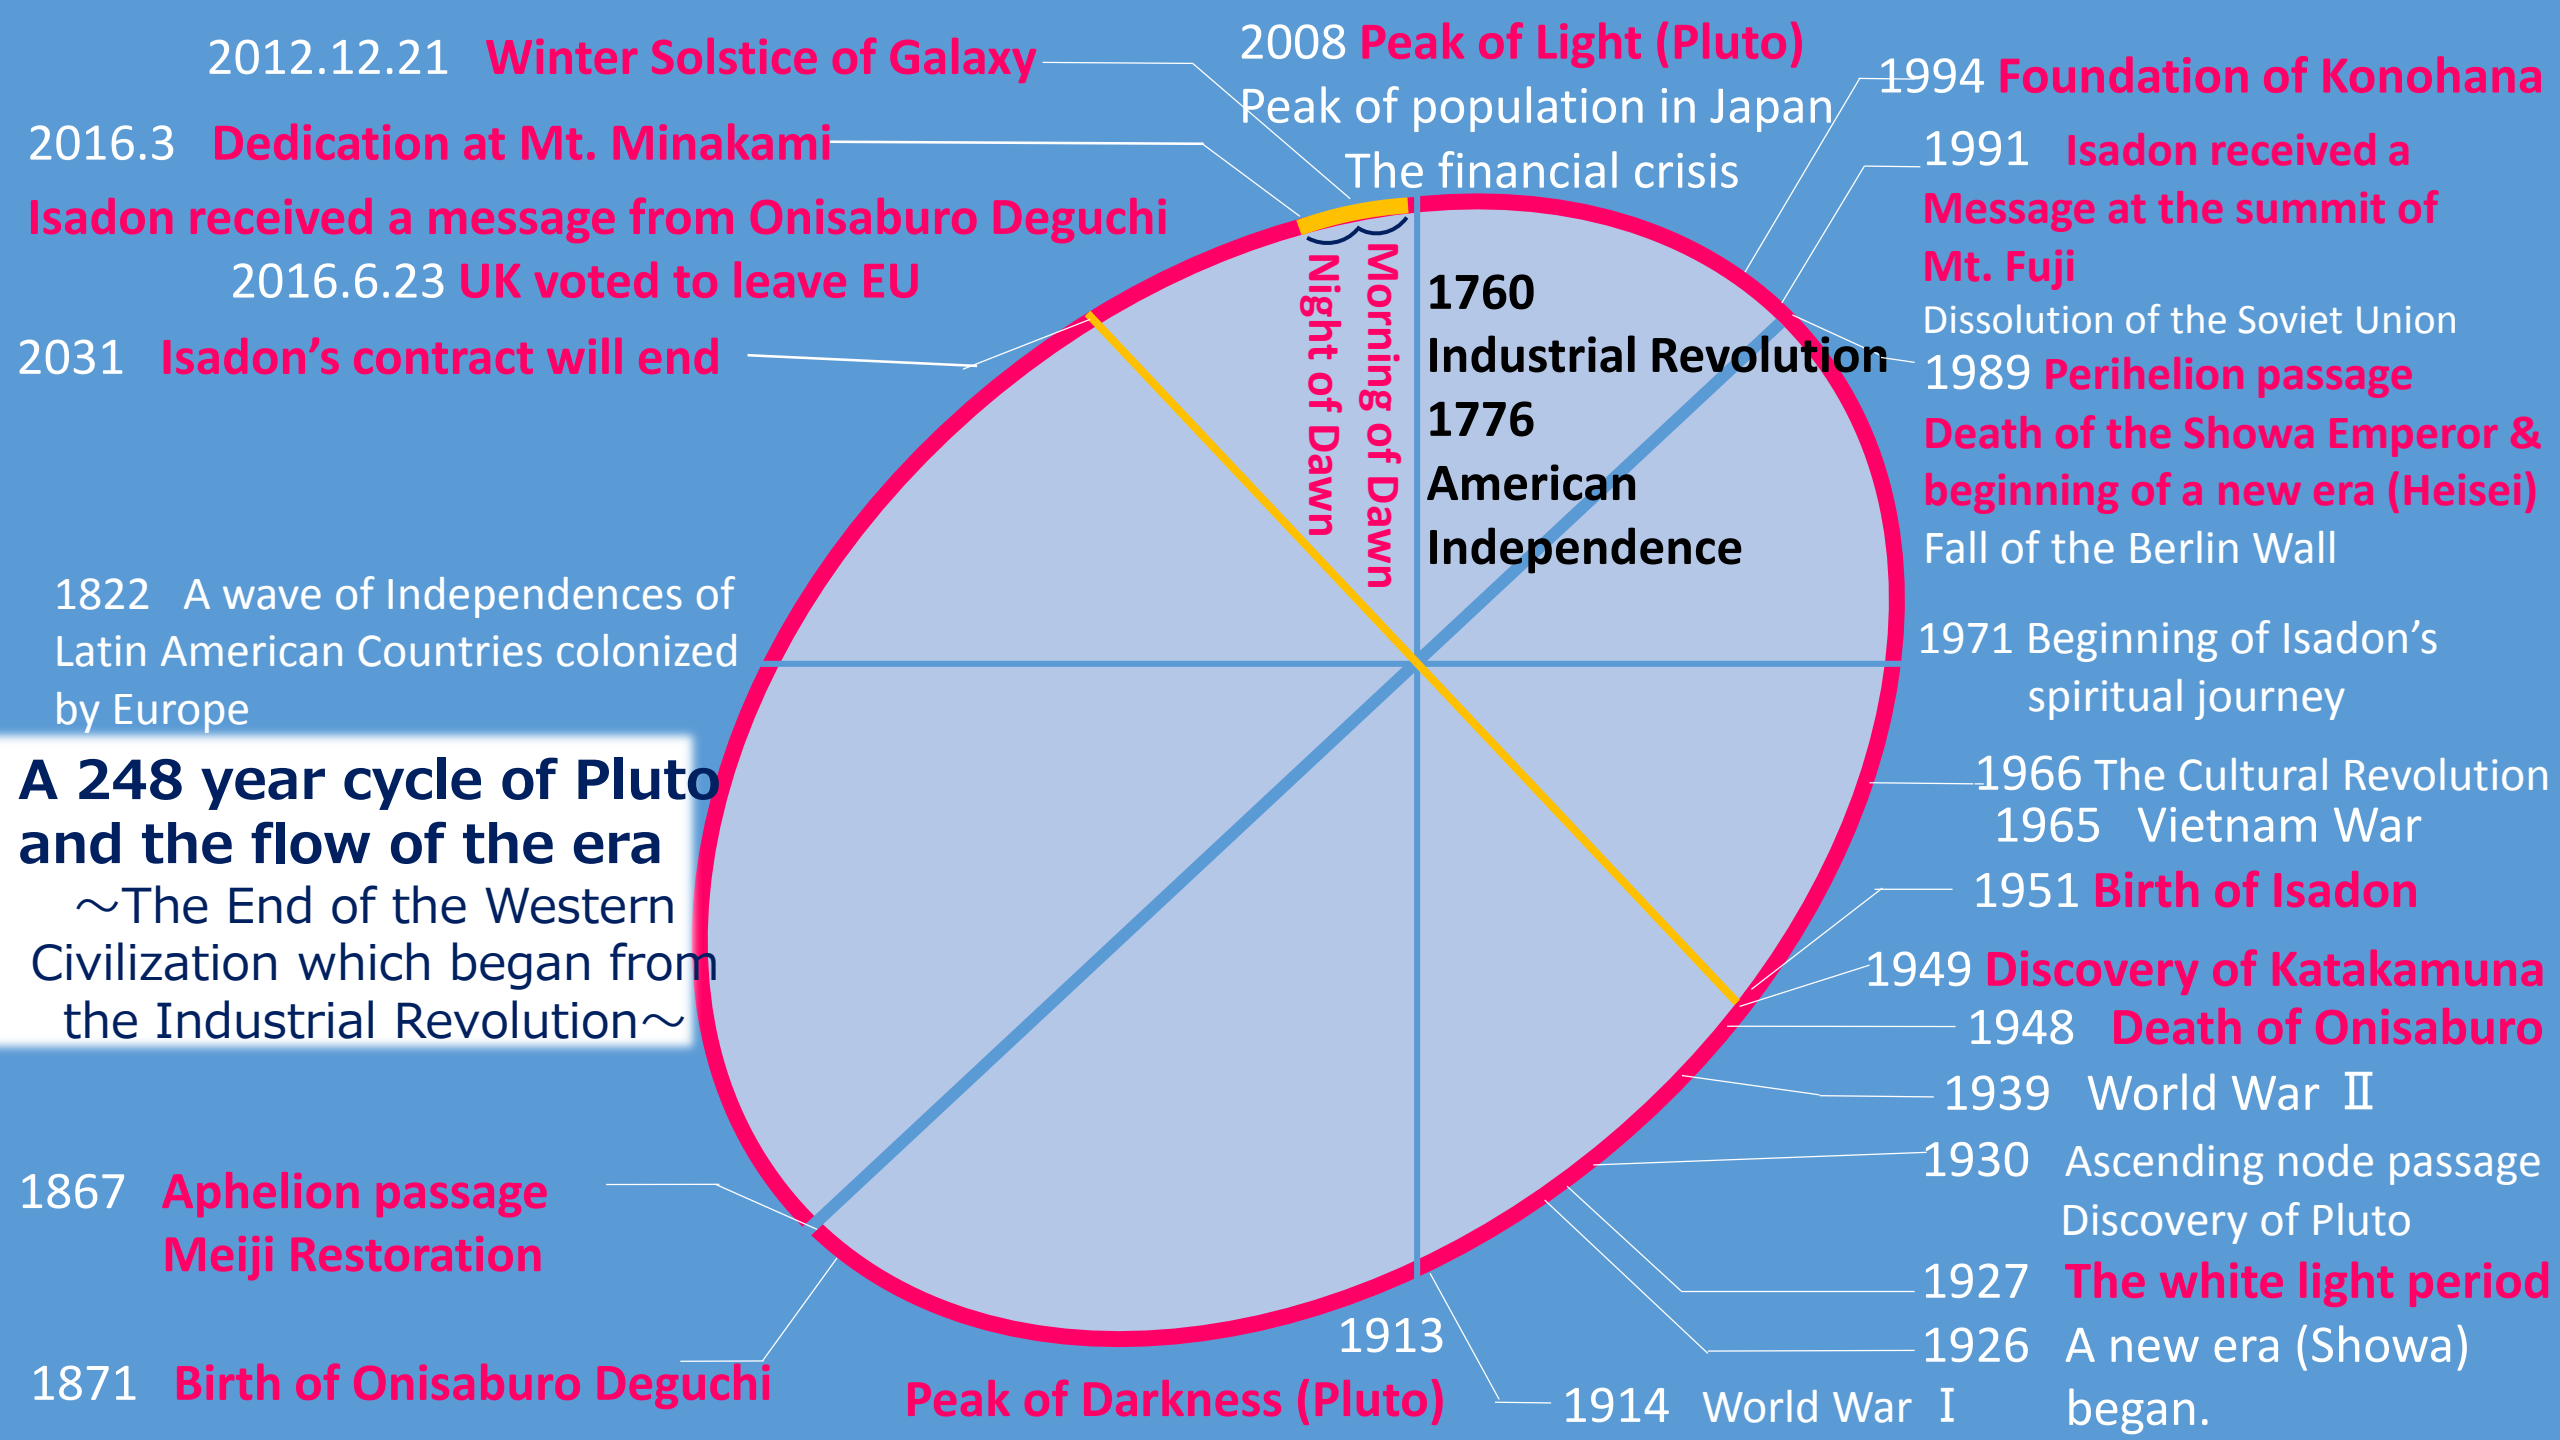

Emergence of various religions in Asia (This influence still continues)  
 Zoroastrianism  
 Judaism  
 Ancient Chinese Philosophy  
 Various Religions in India

People living a new era have faced The time to release themselves From the illusion of a 6450 year domination.

The 1600-year civilization cycle comes four times during a quarter cycle of one solar spiral. The civilization rhythm of the earth is affected by the solar spiral motion.

Emergence of various religions in Asia (This influence still continues)  
 Zoroastrianism  
 Judaism  
 Ancient Chinese Philosophy  
 Various Religions in India

# **The 3<sup>rd</sup> Part:**

## **Knowing the Reality of the Current Earth**

**What has economic development brought to the earth?**

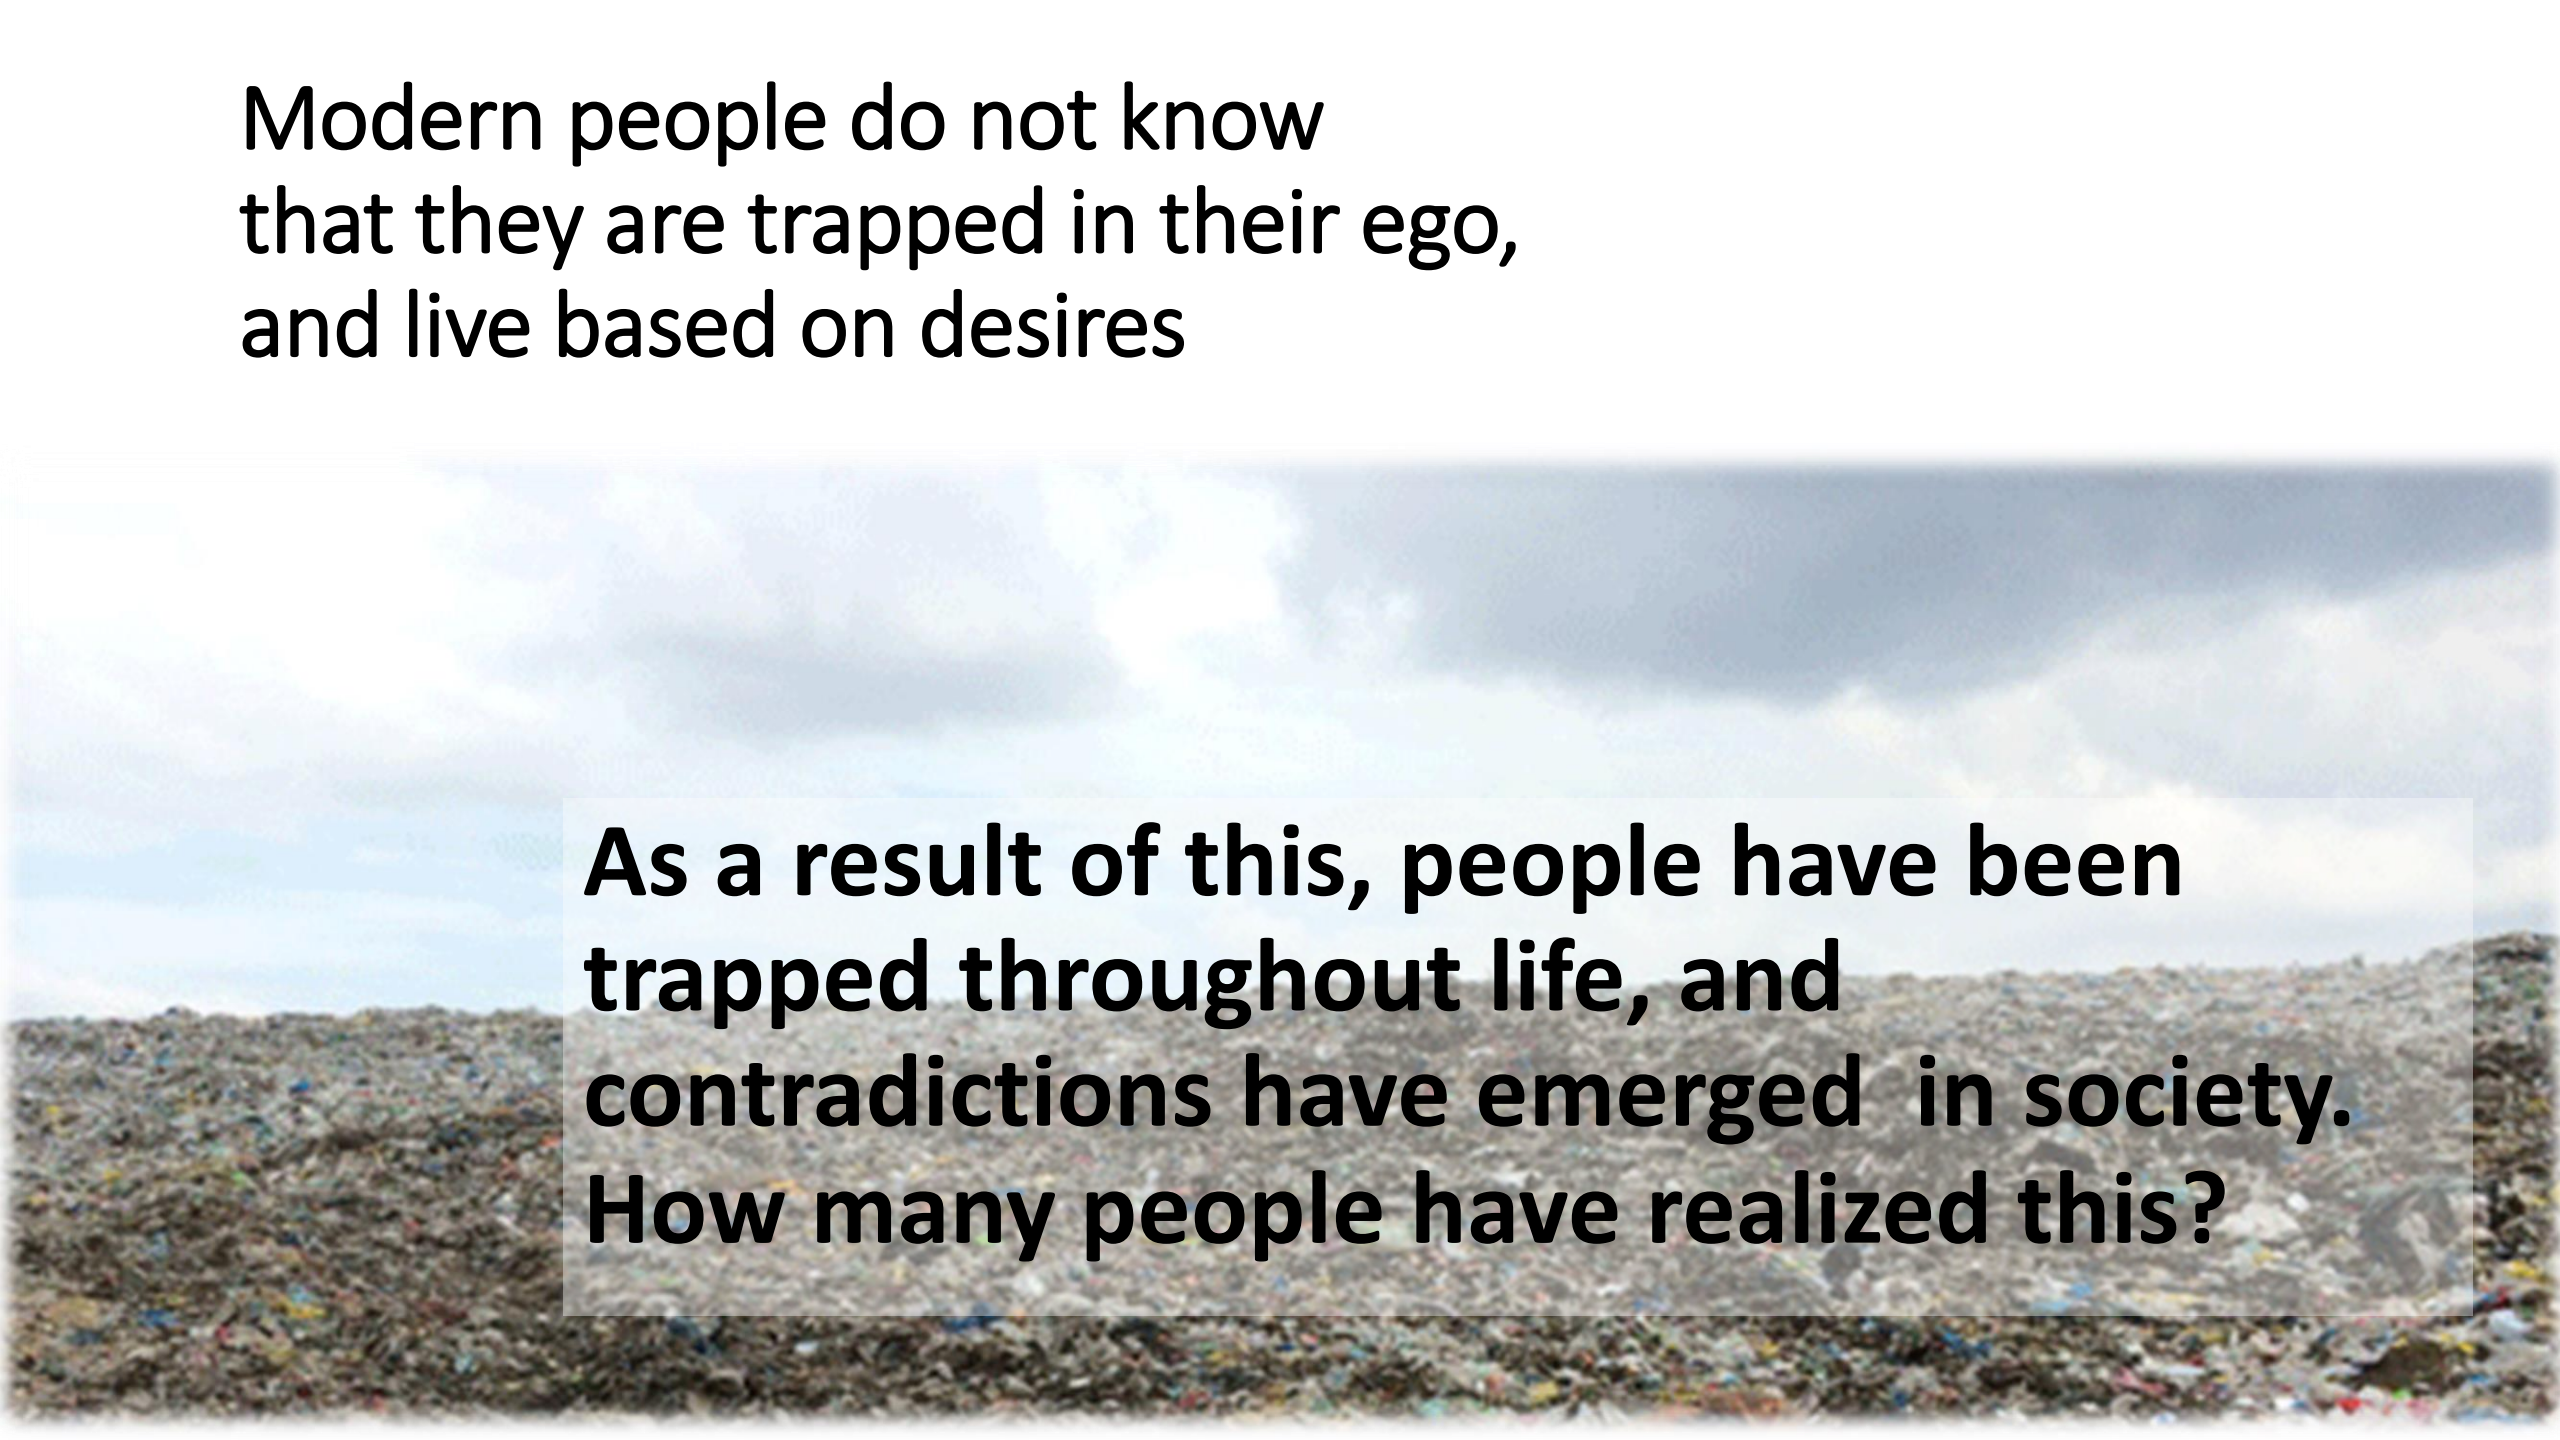

**What environment have we been in, what burden have we received, and what burden have we brought to society?**

- 1. The Reality of the Global Environment**
- 2. The Mental Darkness of the Modern People**
- 3. Chaotic World Affairs**

Modern people do not know  
that they are trapped in their ego,  
and live based on desires

A photograph of a vast, flat landscape covered in a thick layer of multi-colored trash, likely a landfill or a large-scale waste dump. The sky above is filled with heavy, grey clouds, creating a somber and oppressive atmosphere. The text is overlaid on a semi-transparent white box in the lower half of the image.

**As a result of this, people have been  
trapped throughout life, and  
contradictions have emerged in society.  
How many people have realized this?**

# 1. The Reality of the Global Environment

**The capitalist economy has created an energy-consuming society, and**

**brought various realities to the global environment.**

**We humans have stopped communicating with nature,**

**“Control by the Demon of Artificial”**

**And have distorted and destroyed it conveniently.**

In an extension of human desires,

**Humans continue to give pain to various animals.**

**Although medical treatment has developed, more incurable and rare diseases have emerged.**

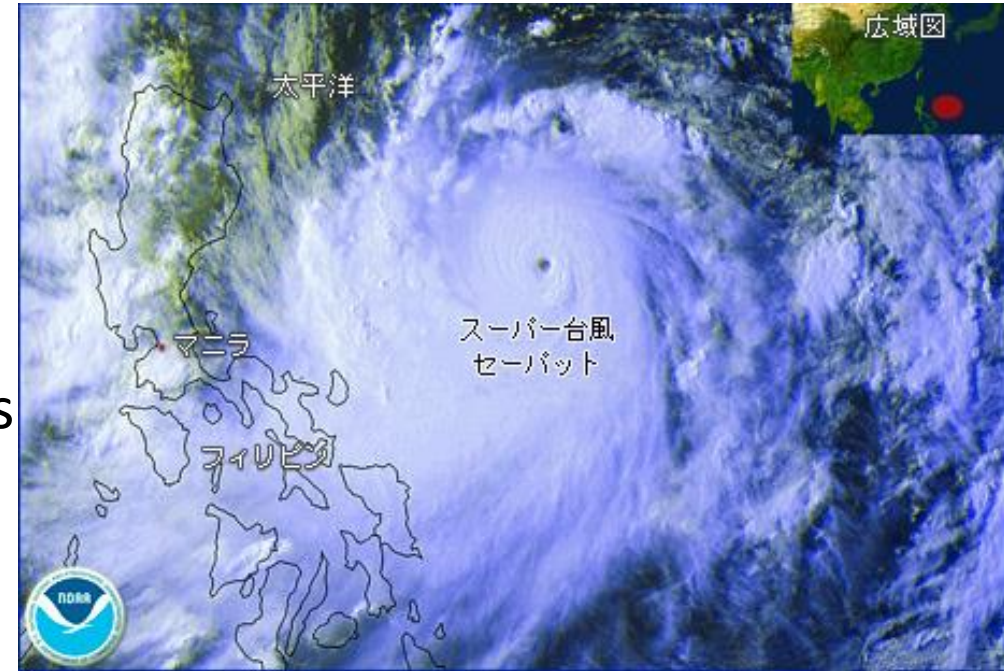

**Although satiation exists, poverty and starvation still exist.**

# Global warming has brought various abnormal phenomena.

- Super typhoons
- Rising tidal levels
- Concentrated heavy rains
- Food shortages
- Droughts
- Extinction of species

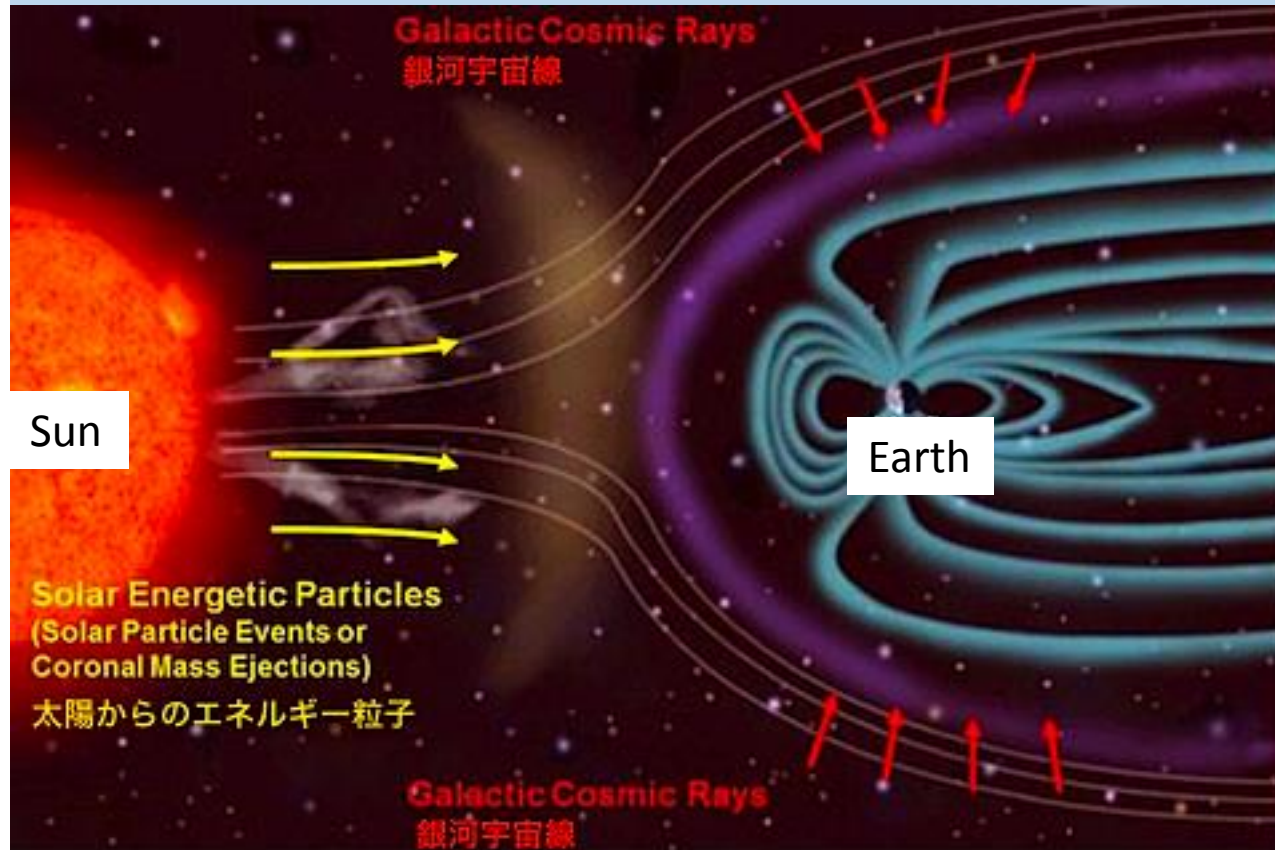

Flood of Kinu River by concentrated heavy rain in 2015

# The Relationship between Solar Activity and the Magma of the Earth

The relationship among the stars create the era, and at the same time, it affects the natural global environment.

It is said that the activity of sunspots and the shift of the Earth's axis

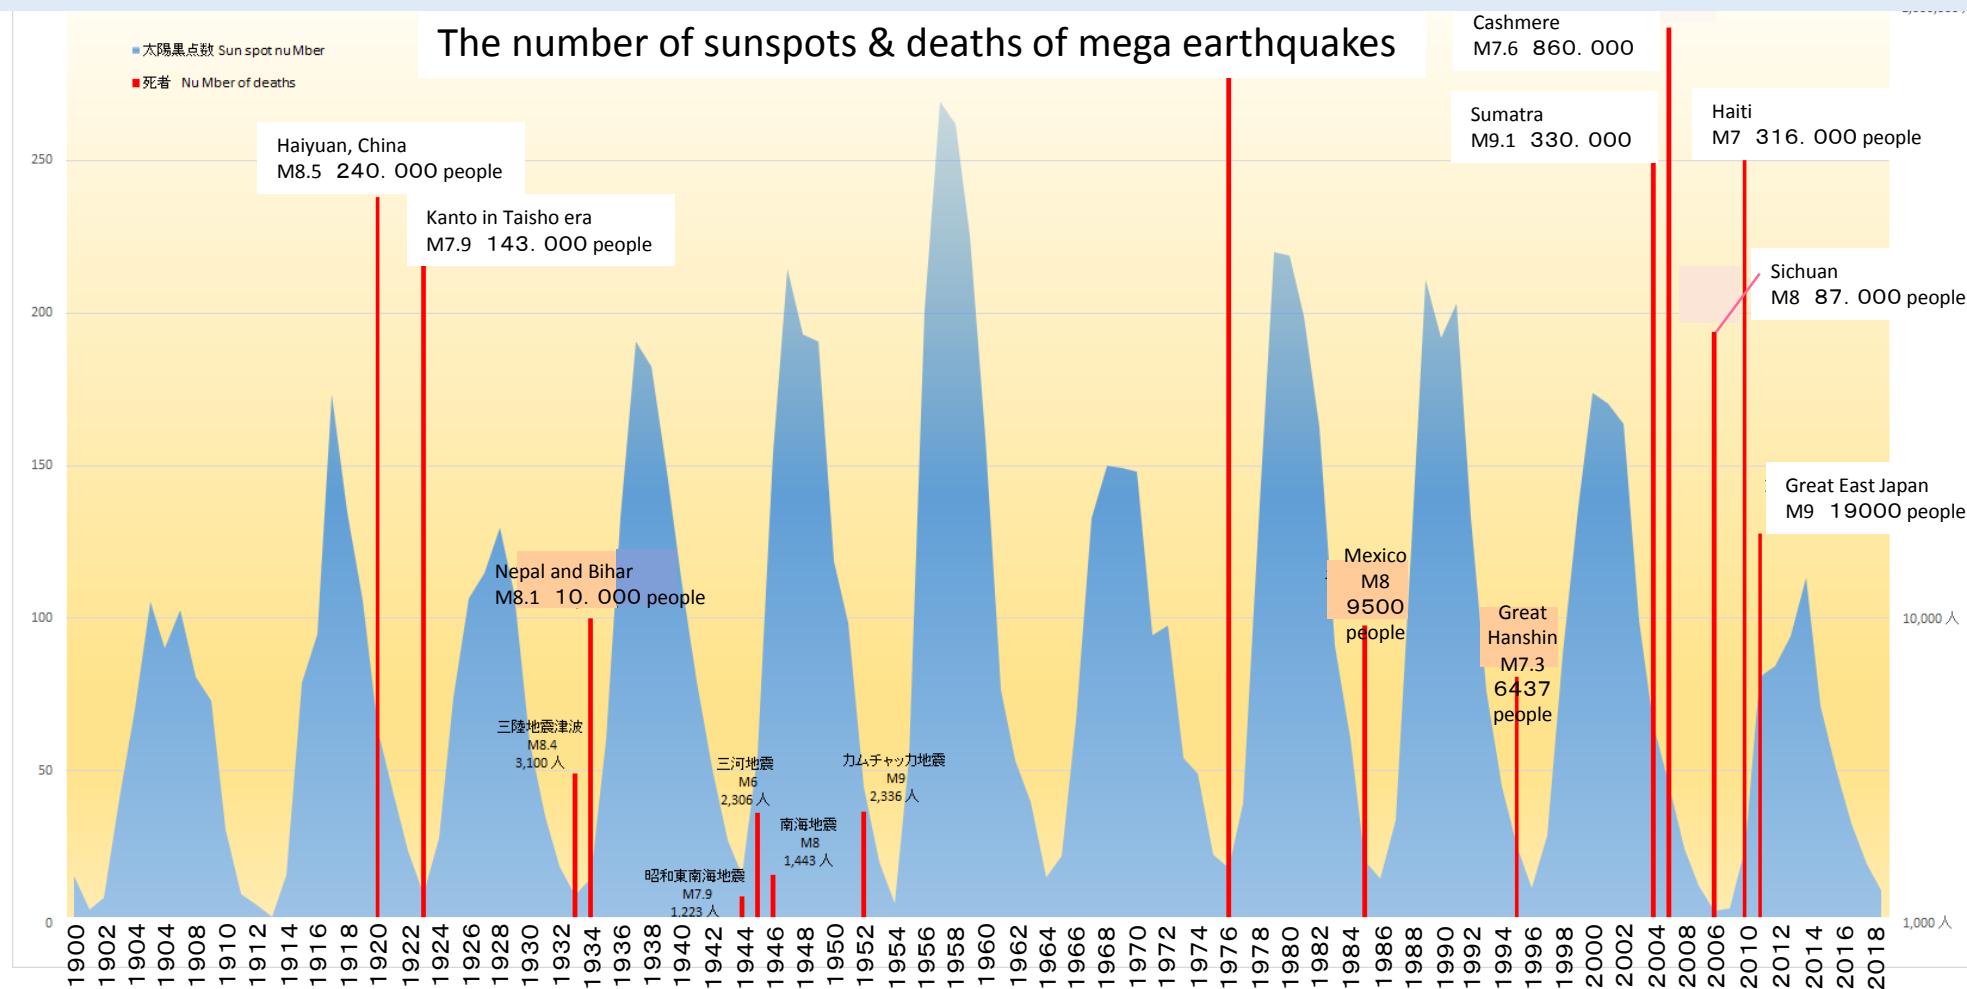

affect the activity of the magma of the Earth, activate earthquakes and volcanos, and also affect global warming.

The environment changes with the planetary movement, which simultaneously affects human economic activity. The Earth constantly changes due to such complex factors.

# The Relationship between the Sunspot Activity and Occurrence of Earthquakes

The number of sunspots repeatedly increases and decreases with an 11 year cycle. When the number of sunspots decreases, the solar activity remains static and the solar magnetic field weakens. Therefore, the hard galactic cosmic rays, which could not penetrate the solar system, come to reach the earth. When these cosmic rays heat the inside of the earth, the amount of heat energy which is emitted from the outer core increases. So, it is assumed that activities of earthquakes and volcanos become active.

# Frequent Natural Disasters

The Great East Japan Earthquake  
on March 11<sup>th</sup>, 2011  
Magnitude 9.0  
Deaths 18,455 people  
The biggest earthquake  
on record in Japan

## 2. The Mental Darkness of People Living in the Modern Society

Japanese patients with mental disorders:

3.2 million people

An increase of mental disorders and drug addictions

Various dependencies

Increase of suicides  
30000 suicides annually in Japan

Various poverty

- Poverty of women and children
- Poverty of elderly people
- Poverty of parents and children under the phenomena where elderly NEETs have become parasitic on their parents' pension

Aging  
Homecare murder

# An Issue which Occurs in the Aging Society: Homecare Murder

The reality which came to be seen as a result of research on “Homecare Murder” where people become tired of care, and kill their partners and parents.

◆ 24% of people have thought, “I want to die together,”  
“I want to kill my family.”

◆ 138 cases of Homecare Murder have occurred for the past 6 years since 2010. (confirmed with investigation and includes failed attempts)

【Notes of a woman in her 70s who committed Homecare Murder】

“I could not fall asleep fully any more. I was woken up after 2 hours of sleep, and could not endure physically. I was getting really panicked mentally. I did not know what I was doing. I wanted to leave my husband and the hell. That was my genuine desire.”

Serving prison time, she still continues to live in the same room where she took her husband’s life. As for the murder, she said, “I think it was wrong, but I did not have any other choice. I have no regret.”

# 3. Chaotic World Affairs

Peak of Light

**We entered the cycle of love and harmony (the Era of Light) from the time of separation and conflict (the Era of Darkness) on December 21<sup>st</sup>, 2012, that was the “Winter Solstice of the Galaxy” after 25800 years.**

**As the light gradually comes into the peak of darkness, the darkness of the social structure becomes obvious, and it seems that the status of human society goes from bad to worse as the status of the earth gets worse.**

Peak of Darkness

Winter Solstice of the Galaxy

**What is Behind this Current Situation?**

UK's Referendum to Leave EU, 2016

Industrial Revolution, 1760  
Foundation of US, 1766

The countries that have led the world after the Industrial Revolution have fallen into confusion.

This indicates the end of the materialistic world that continued for 250 years.

Downfall of US  
Confusion of UK

Humans cannot find the next vision.

# Chaotic World Affairs: World Leaders who Act with Profit and Loss

## EU Crisis

Disagreement among nations on outflow of Syrian refugees and nonstop terrorist attacks , EU's referendum to leave EU

## Russia with Ambitions for Superpower Revival

Putin's bet rising toward confusion of Western countries

## US, Shaken Superpower

President Obama said, "The US is not the world policeman." Mr. Trump's radical statements through presidential election

**Syrian refugees broke 4 million people**

## Islamic Confusion

- Proxy war among nations over underground resources in Syria
- Rise of radical terrorist groups, Islamic State
- Iran vs Saudi Arabia

## The 4<sup>th</sup> Nuclear Test & Ballistic Missile Launch

North Korea cannot bridge the gap with major nations, and in an unprecedented solitary state.

# President Obama's Visit in Hiroshima

On May 27<sup>th</sup>, 2016, President Obama, who has appealed for abolition of nuclear weapons, visited atomic-bombed Hiroshima for the first time as the incumbent American president.

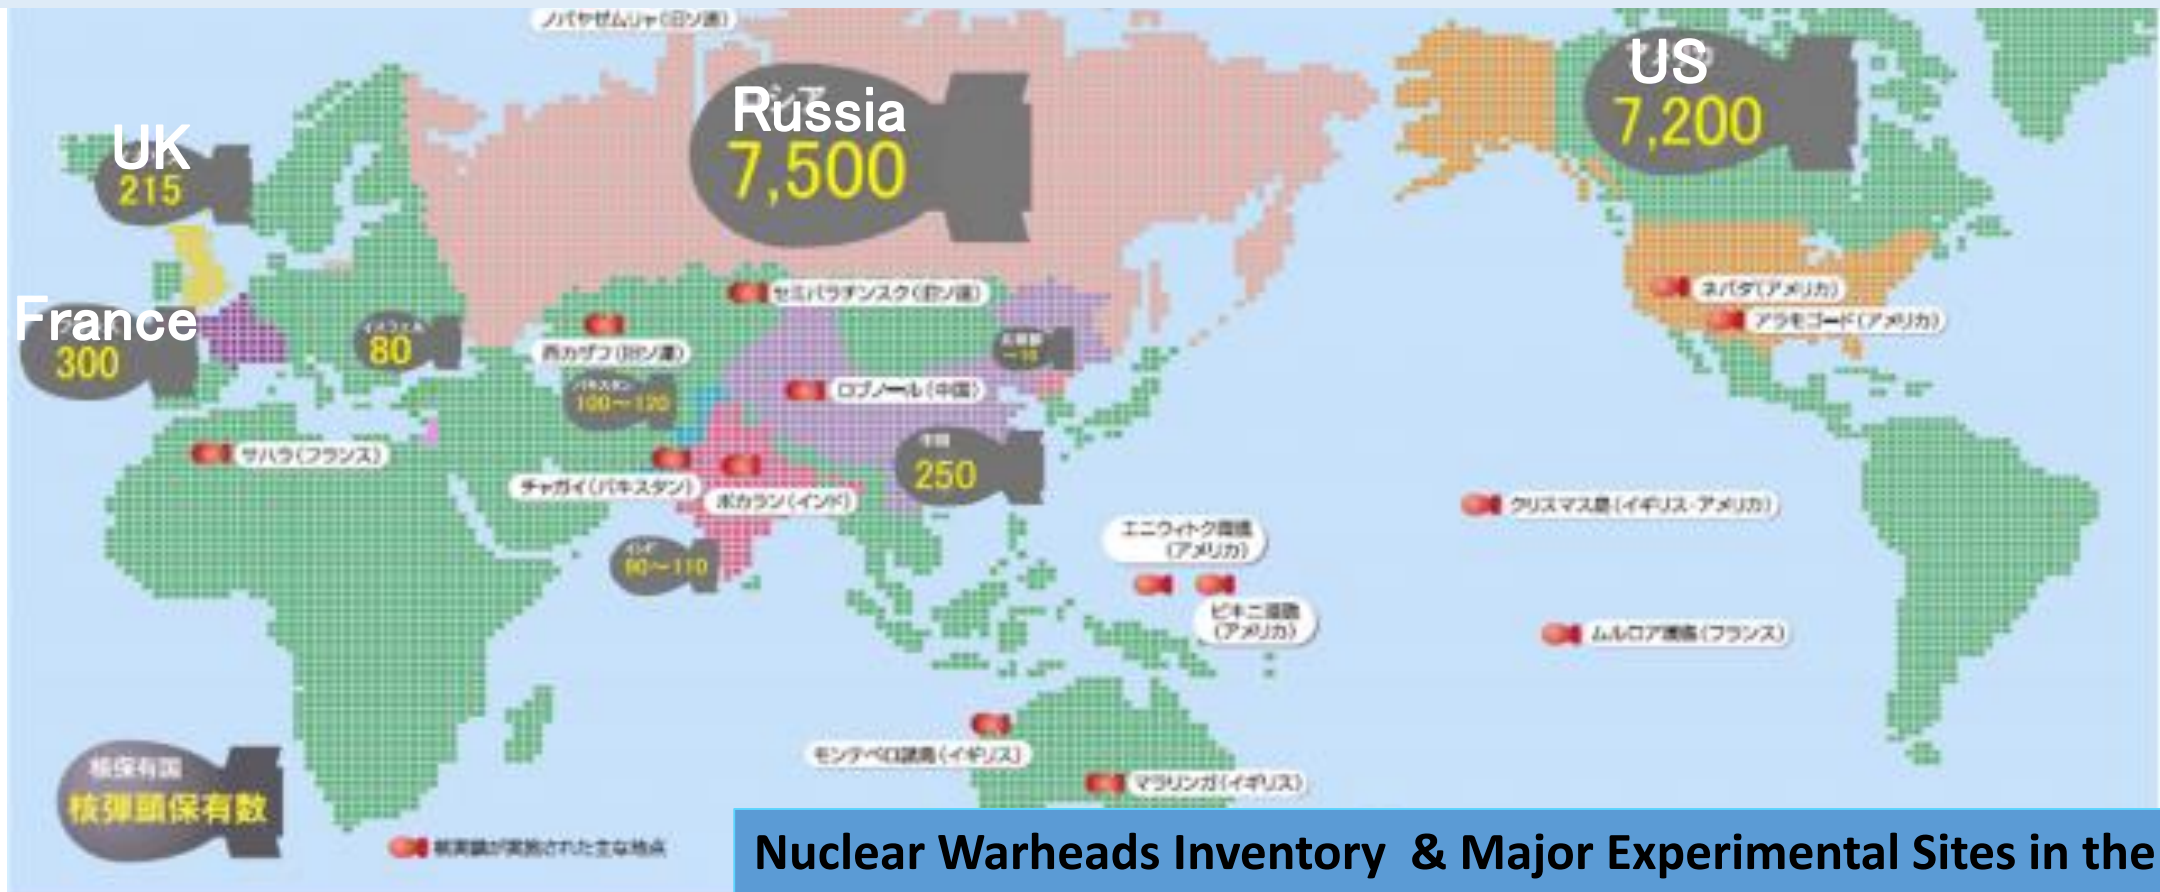

He appealed for abolition of nuclear weapons and peace in Praha as his first speech after he became the president, and received the “Nobel Peace Prize.” Also, he made a speech to appeal for the same in Hiroshima, and both the US and Japan put mostly favorable articles about it. The Japan Broadcasting Corporation took a survey toward 321 bomb survivors, and 231 people (72%) answered. Its 90% said they can appreciate his visit in Hiroshima because “it is meaningful for him to see the reality of victims,” or “he decided to visit in contrary public opinion within the US.”

On the other hand, **President Obama has reduced nuclear warheads least of all, and plans to improve them with a large amount of budget in the future.** Also, during his visit in Hiroshima, he carried “the Nuclear Football”, an business case to launch a nuclear missile. Therefore, there is a contradiction.

# The Number of Nuclear Weapons and Experimental Sites in the World

President Obama appealed for “a world without nuclear weapons” in Hiroshima. However, the US has begun an experiment to drop new types of nuclear bombs, “B61, 12 type” which has more electronic devices than the current one and makes pinpoint bombing possible, from an in-flight bomber since 2015. They plan to improve the performance of nuclear weapons with 1 trillion dollars in the coming 30 years.

# Panama Papers Leak

## Tax Saving of Big Companies & World Leaders Utilizing Tax Haven

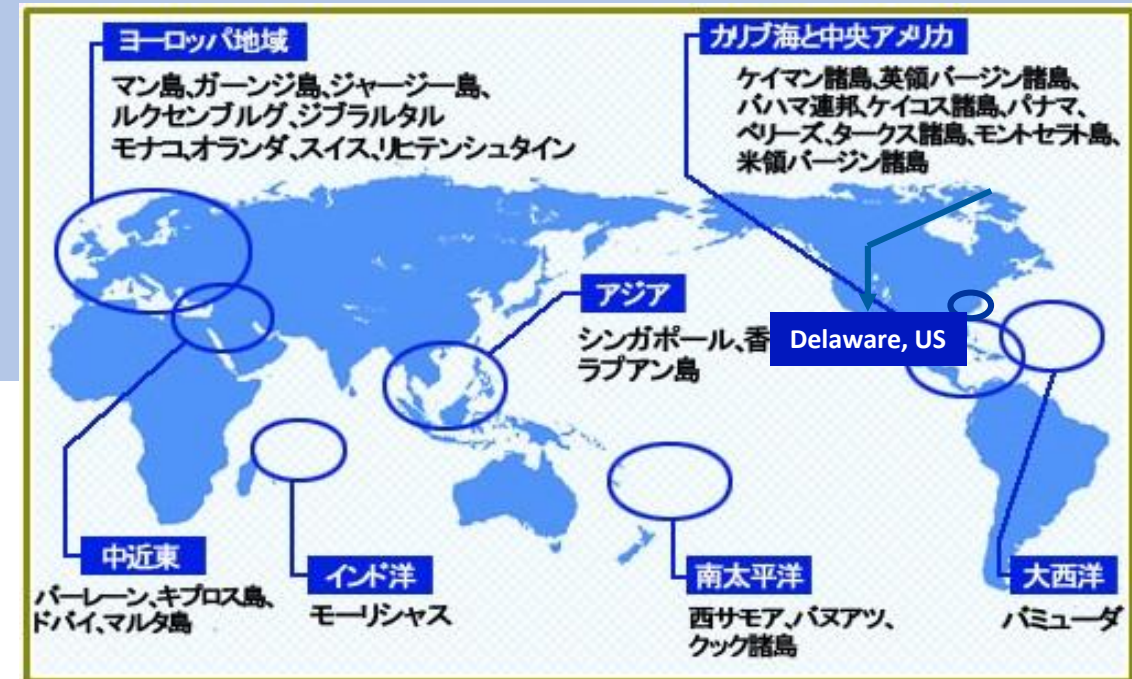

Unprecedentedly enormous records on business contents over the past 40 years of “Mossack Fonseca,” a law firm in Panama, were sent to ICIJ in Washington D.C. via “South Germany Newspaper” anonymously in 2015, and 149 cases were released on April 3<sup>rd</sup>, 2016.

After this, the Prime Minister of Iceland resigned with suspicion of hiding assets. Also, it has been informed that the law firm has been a hotbed for “money laundering.”

The Panama Papers is just one of the many examples of many tax havens, and how much tax of national leaders is hidden secretly in other companies is immeasurable. It is possible that more money than what is moved visibly is hidden.

### Tax Haven:

Countries and regions intentionally give preferential treatment to tax (no tax or extremely low tax rate) to gain foreign capital and currency, and attract assets of companies and the wealthy class.

Tax Haven Map

# The Darkness of Tax Havens in the US

## Upsurge of Dummy Companies in Delaware

There is a state which attracts corporations and sucks tax revenues of other states like a black hole. It is the state of Delaware located 160km away from the White House. In this small state in the Eastern US, more companies (public and private) exist than people. According to the latest statistics, 945,326 companies exist in the state with 897,934 people. The state law promises low tax rate and confidentiality.

In Delaware state, information on real owners is unnecessary at the foundation of dummy companies. The provincial government gains 300 dollars annually per company. 40% of its annual revenue is related to dummy companies, which has been revealed as a tax haven.

It is said that Panama in Central America which is the stage of the “Panama Papers” also imitated the system of Delaware. In the US, the tax revenue of 100 billion dollars disappears annually due to evasion of taxes in tax havens. An executive of an international organization said, “Most of illicit funds in the US are money laundered in Delaware, Wyoming, and Nevada.”

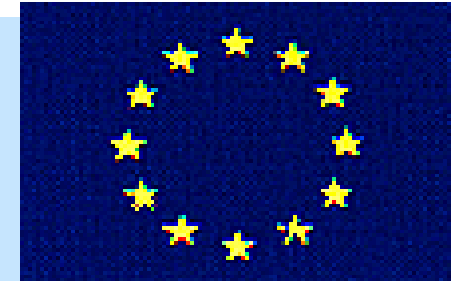

**A building for Tax evasion, with 310,000 Companies, is located at 1209 North Orange St, Wilmington, DE. Hilary Clinton, the former Secretary of State and candidate of the Democratic Party, and Donald Trump, a Businessman and candidate of the Republic Party also own corporations.**

# Crisis in the European Union (EU)

## Does Europe become one?

In 1993, the European Union (EU) was established out of the trauma of WWI and WWII, which reached an extreme of misery. The EU aimed to create a single Europe in order to not create anymore war. Currently, **27 countries** became a member of the EU. In 1999, the unified currency, the “EURO” was adopted. 17 countries introduced it, and formed the Euro bloc.

Last year, the **financial deficit of Greece which economically collapsed with a dole-out financial policy**, was covered by each of the member countries, as a result, it lowered trust in the Euro and the economic crisis came to the entire EU.

Moreover, the acceptance of 4 million Syrian refugees in Europe, and the rush of terrorisms by IS, opinions of each country have begun to disagree.

U.K. was an island nation and in a special category among EU, and its nation’s dissatisfaction was raised about employment and housing issues concerning European refugees from Poland and Rumania.

This past June, **at the national referendum, the “EU break-away” group wins the vote, and UK leaves the EU.** This stirs the waters in each country.

# Background of UK Leaving EU

In 1973, the UK joined the European Community (EC); however, it did not use the “Euro” which is a unified currency in Europe, and also did not participate in the Schengen Agreement, which allowed entry of people without immigration examination. Based on Germany and France, EU tried to “Unify Europe”, The U.K. as an island nation, kept at a distance, and often the possibility of leaving the EU had been discussed. The core of the immigration issue with the U.K. is not the Syrian refugees, who are “European Immigrants” who have been rapidly increasing after 2000 as the EU has expanded into middle eastern Europe. Within 11 years from 2004 to 2015, immigrants from Poland and Romania have increased from 1 million to 3 million, three times more. Because of the principle of free migration among EU countries, the U.K. cannot control these European immigrants. Also, European immigrants are entitled to equal employment and public housing, which has created a competition with the low income and working class UK nationals, has rapidly raised hostile feelings toward the EU.

“Remain Group”, Prime minister Cameron insisted “Losing” the EU common market.

“Leave Group”, Former London Mayer, Mr. Johnson appeal to bring back the sovereignty and solve the migrant issue and bring back the massive amount of contribution to EU.

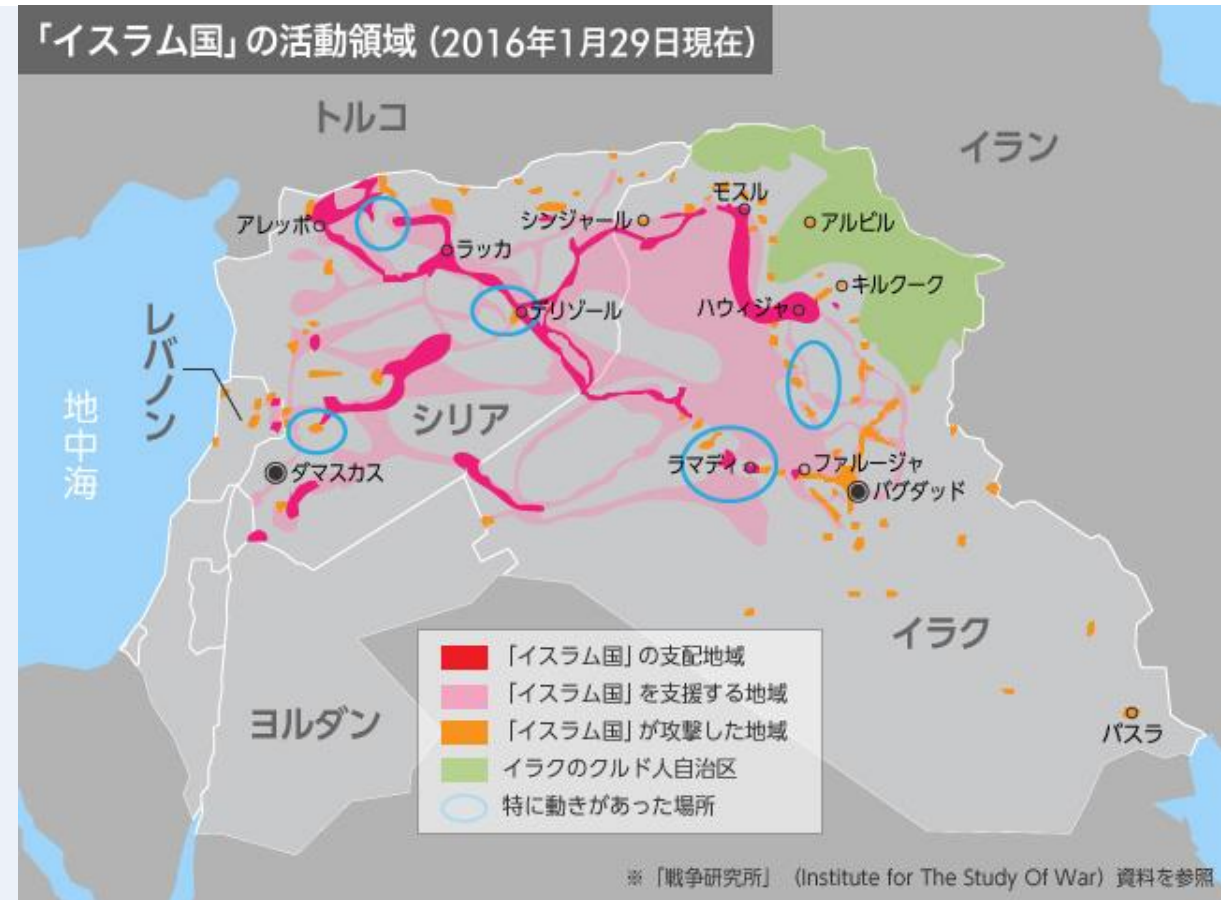

# What is the Influence and Meaning if the UK leaves the EU?

## ~End of Capitalism after 250 years ~

- After discovering the U.K. leaving, the Nikkei Stock Average at the first Tokyo Stock Market on June 24<sup>th</sup> dropped 1286 JPY compared to the previous day, and the largest one-day fall since the Lehman's collapse 16 years prior. This includes a drop in the world stock and the disappearance of 200 trillion JPY in one day. Also, the exchange rate of the USD rapidly dropped and became 99 JPY/1 USD.
- Among the UK nation, a regretful mood spread around, a petition of 4 million people petitioned was collected to review the decision. Some voices pointed out that it is possible that the government can legally ignore the result of the national referendum, so they do not leave.
- A look at history: There were phenomena that made and broke the mega countries of the past. A similar matter is happening in the world right now. A great migration, renovation of information technologies, an international financial collapse, saturation of markets, and so on are simultaneously happening.
- This uproar of leaving the U.K. is also said to be an event at the great turning point. The issues incurred from the UK break away--- decline of manufacturing, increase of immigrants, expansion of the socio-economic gap, backslides of the elite class, and the appearance of tyrants --- these are common issues in the world .

# “Islamic State,” the Transnational Terrorist Group

In June, 2014, a militant group, “Islamic State in Iraq and the Levant (ISIL)” declared the establishment of “Islamic State (IS)” and operates over Iraq and Syria. They called on young people all over the world on the internet, and international youth have gathered to join IS. They have utilized **clever propaganda tactics** such as the release of cruel executions on the internet, they have expanded their power, and have tried to control the world. Regardless of intense Coalition air raids from the willing, they have been expanding their power steadily.

People in the world who support IS have brought terrorist attacks in various locations, and have shaken the world. There is a theory that shady power structures such as the CIA in the US, NATO, and Israel are involved in supporting IS, behind the mysterious emergence of IS. It is very uncertain. What is behind the rise of IS?

# The Background of the Rise of IS

## ~ IS Continues to Affect the World ~

- Why do terrorist attacks occur? When we consider terrorists bad unilaterally, we cannot understand modern issues. The victims of terrorist attacks have reasons why they became victims.
- Why do young people join IS? Why does the number of people who support IS increase?
- During the rise of IS, confusion in Syria has expanded. By this, over 4 million Syrian refugees emerged, and were forced to make a dangerous and rough journey by land and sea. Europe has been shaken by the influx of refugees, and EU has faced a crisis, which has accelerated the end of the Western civilization, which has continued for 250 years.
- From a historical viewpoint, Judaism, Christianity and Islam all share the Holy land, and are brother religions which emerged under the same scripture in a different era. Religious conflict, which are considered as family quarrels, have brought confusion into the world. **The End of Religious Organizations**
- Islam is a teaching based on the spirit of supporting each other, and it has caused a stir in modern society, which has gone too far toward individualism and profits-and-losses, but they are severe to other religions.

# **The 4<sup>th</sup> Part:**

## **How should We Live in the Modern Era?**

**When we look at the social situation partially,  
it can be seen just as confusion.**

**However, when we expand our views,  
we can see it as a hopeful era  
shifting from “the era of darkness” to “the era of light.”**

**Things look completely different  
by where the position of our mind is.**

**What attitude should humans face  
the coming “era of light” with?**

Humans have sought happiness in an extension of gratifying their own desires, and formed and developed society under such a value.

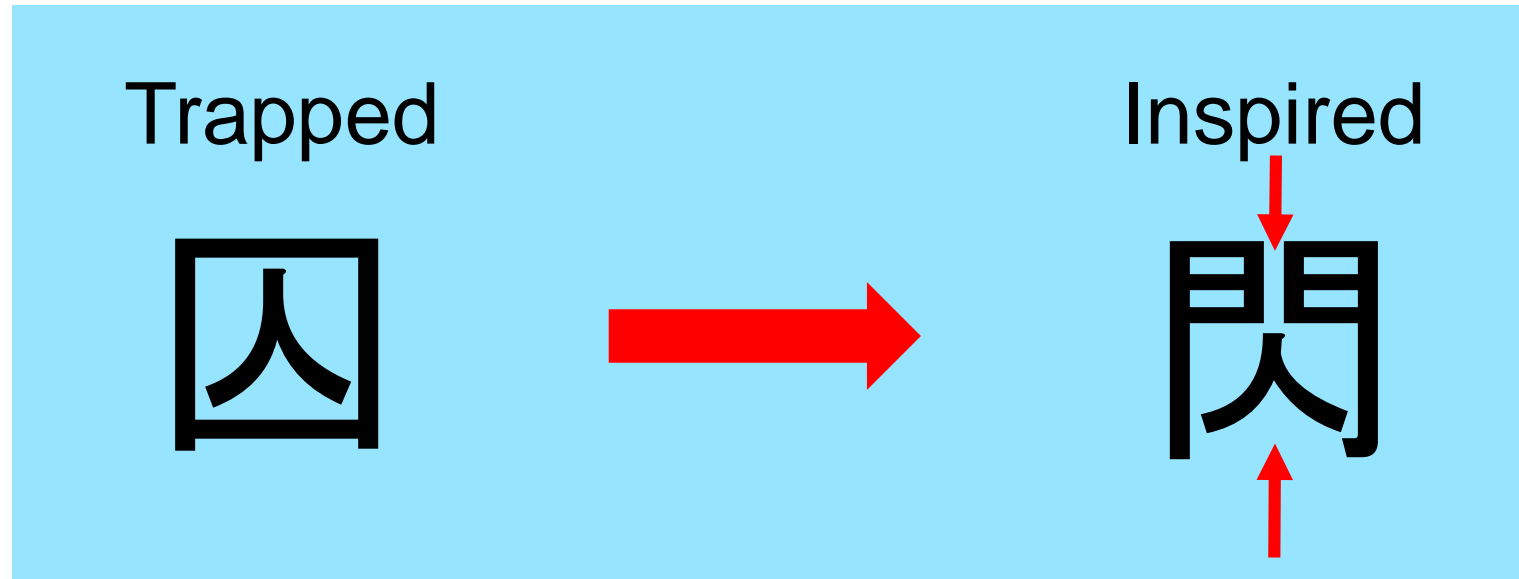

And now, a dead end has reached its peak in any aspect.

However, the universal law  
is sleeping inside of humans.  
If we are tainted by our ego,  
it cannot be understood.

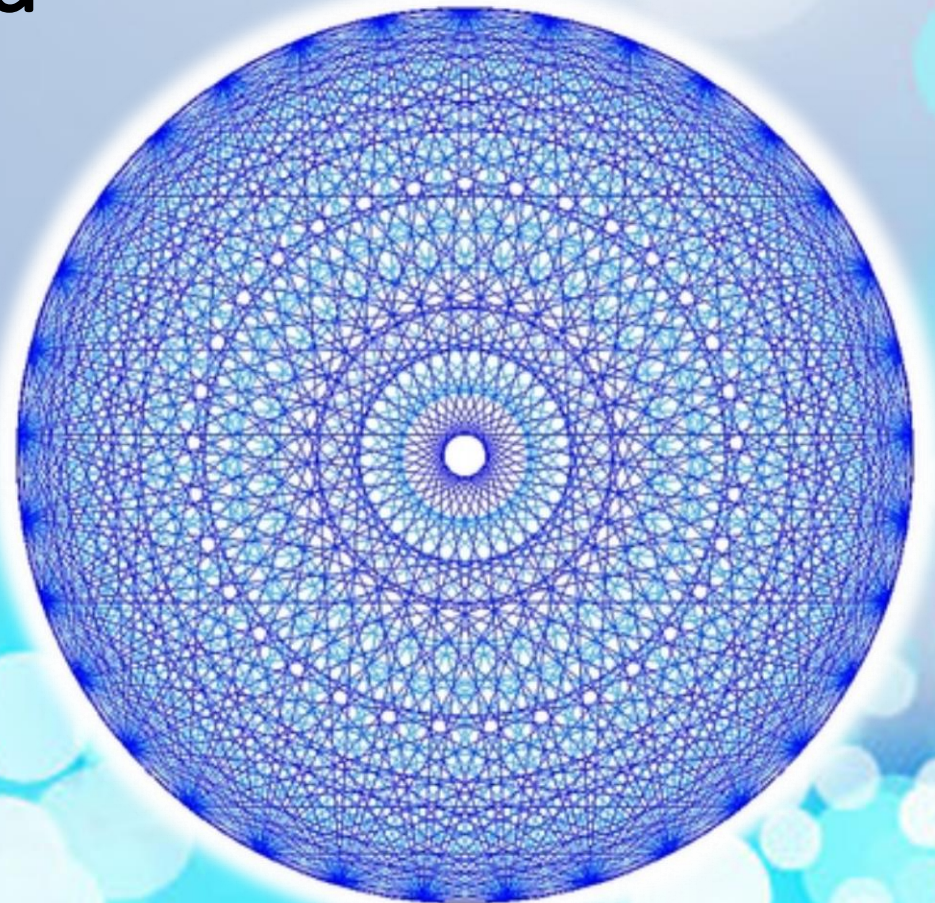

From ignorance of a trapped state  
to an awakened one

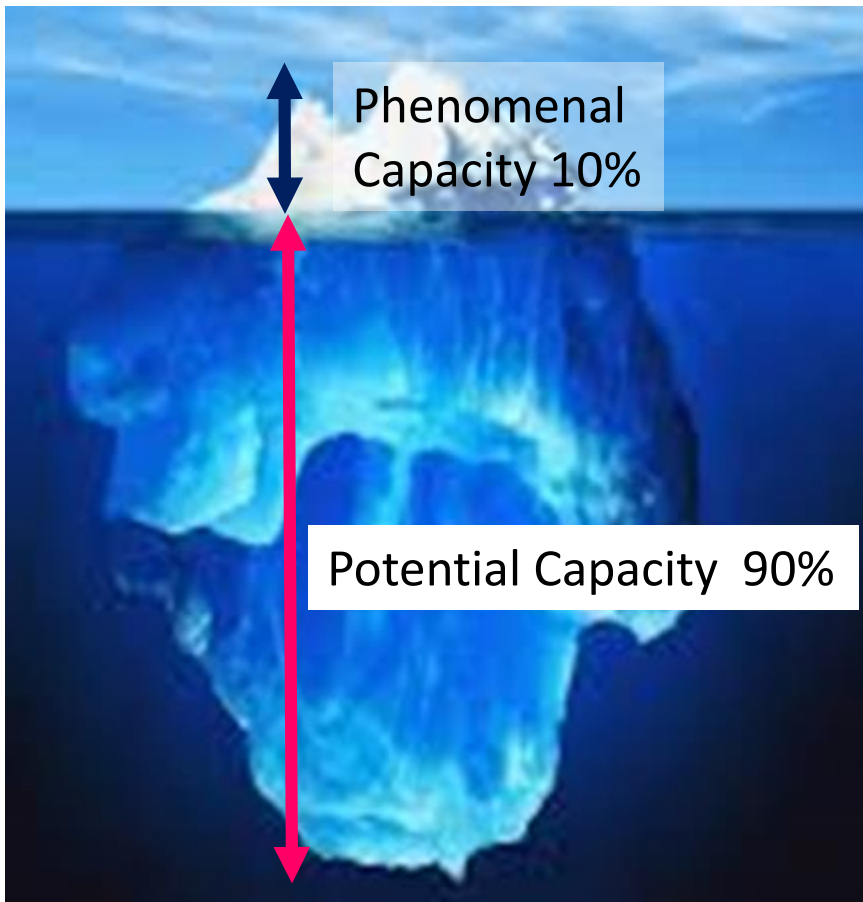

**If we release ourselves from our ego,  
we can even become a fountain of the universal truth.**

In order to do so,  
you should realize  
how the universal structure is and  
what relationship you do have  
with the universe.

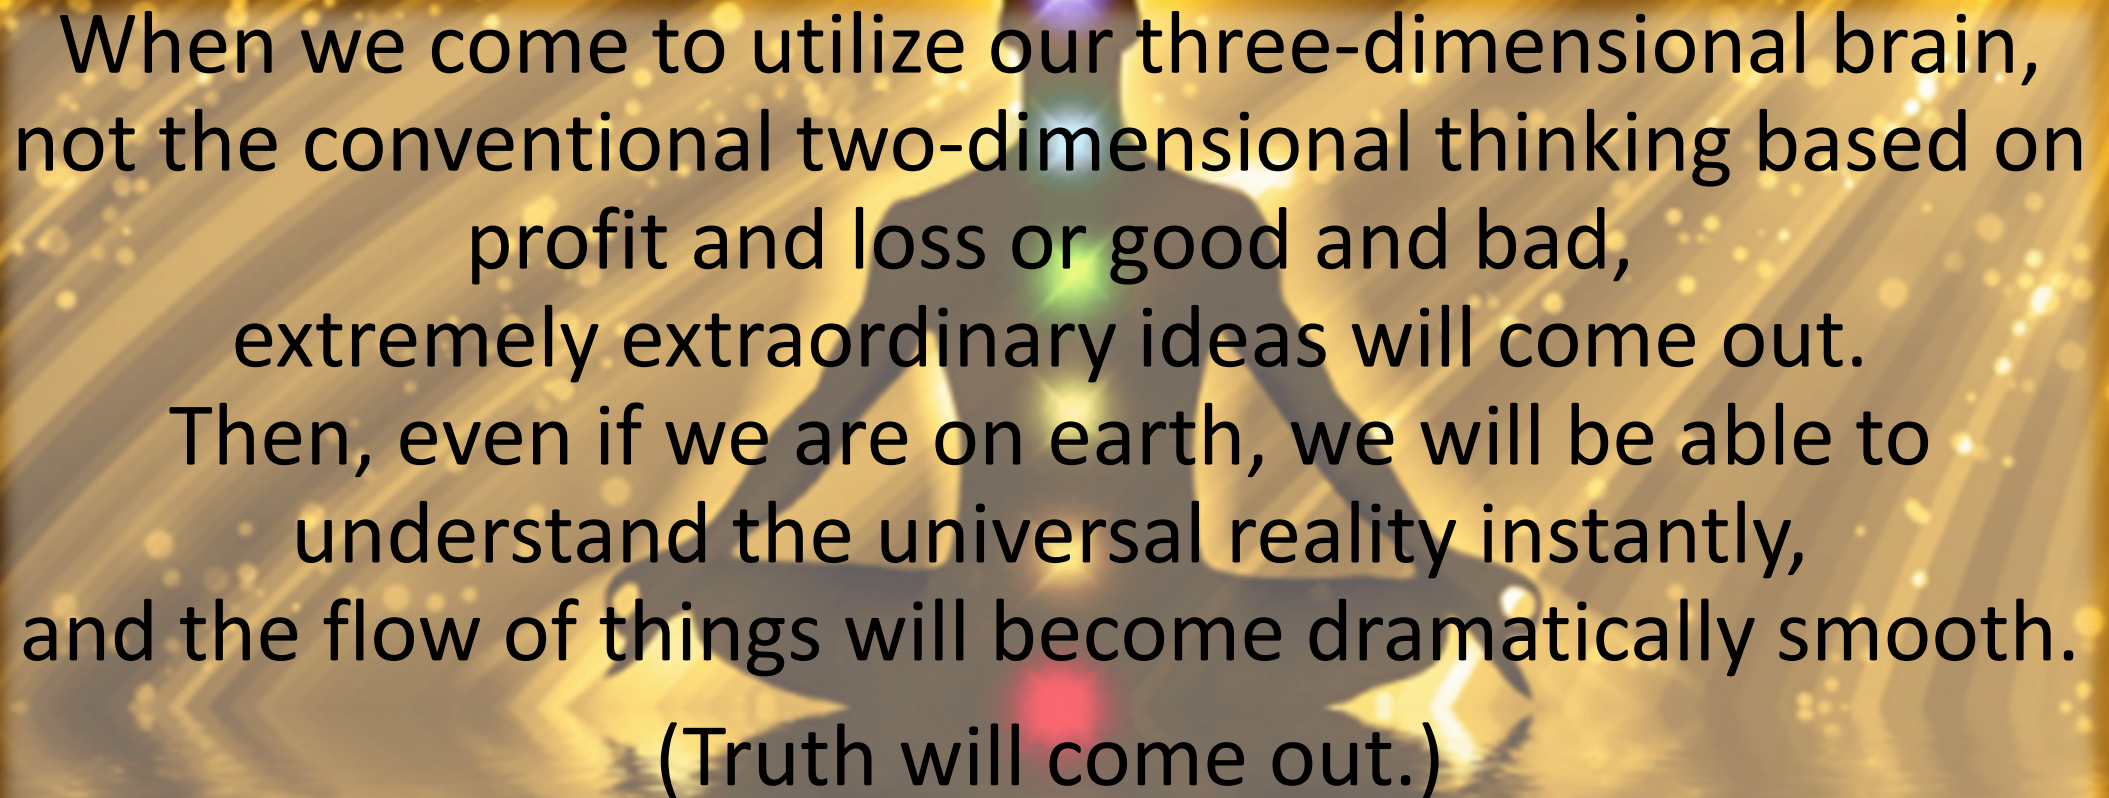

Becoming aware of this truth is the hurdle given to each one of us who lives in the 21<sup>st</sup> century.

When we shift from the era of physical-like, two-dimensional thinking into the three-dimensional one, 90% of our brain which has been asleep for such a long time will be utilized finally.

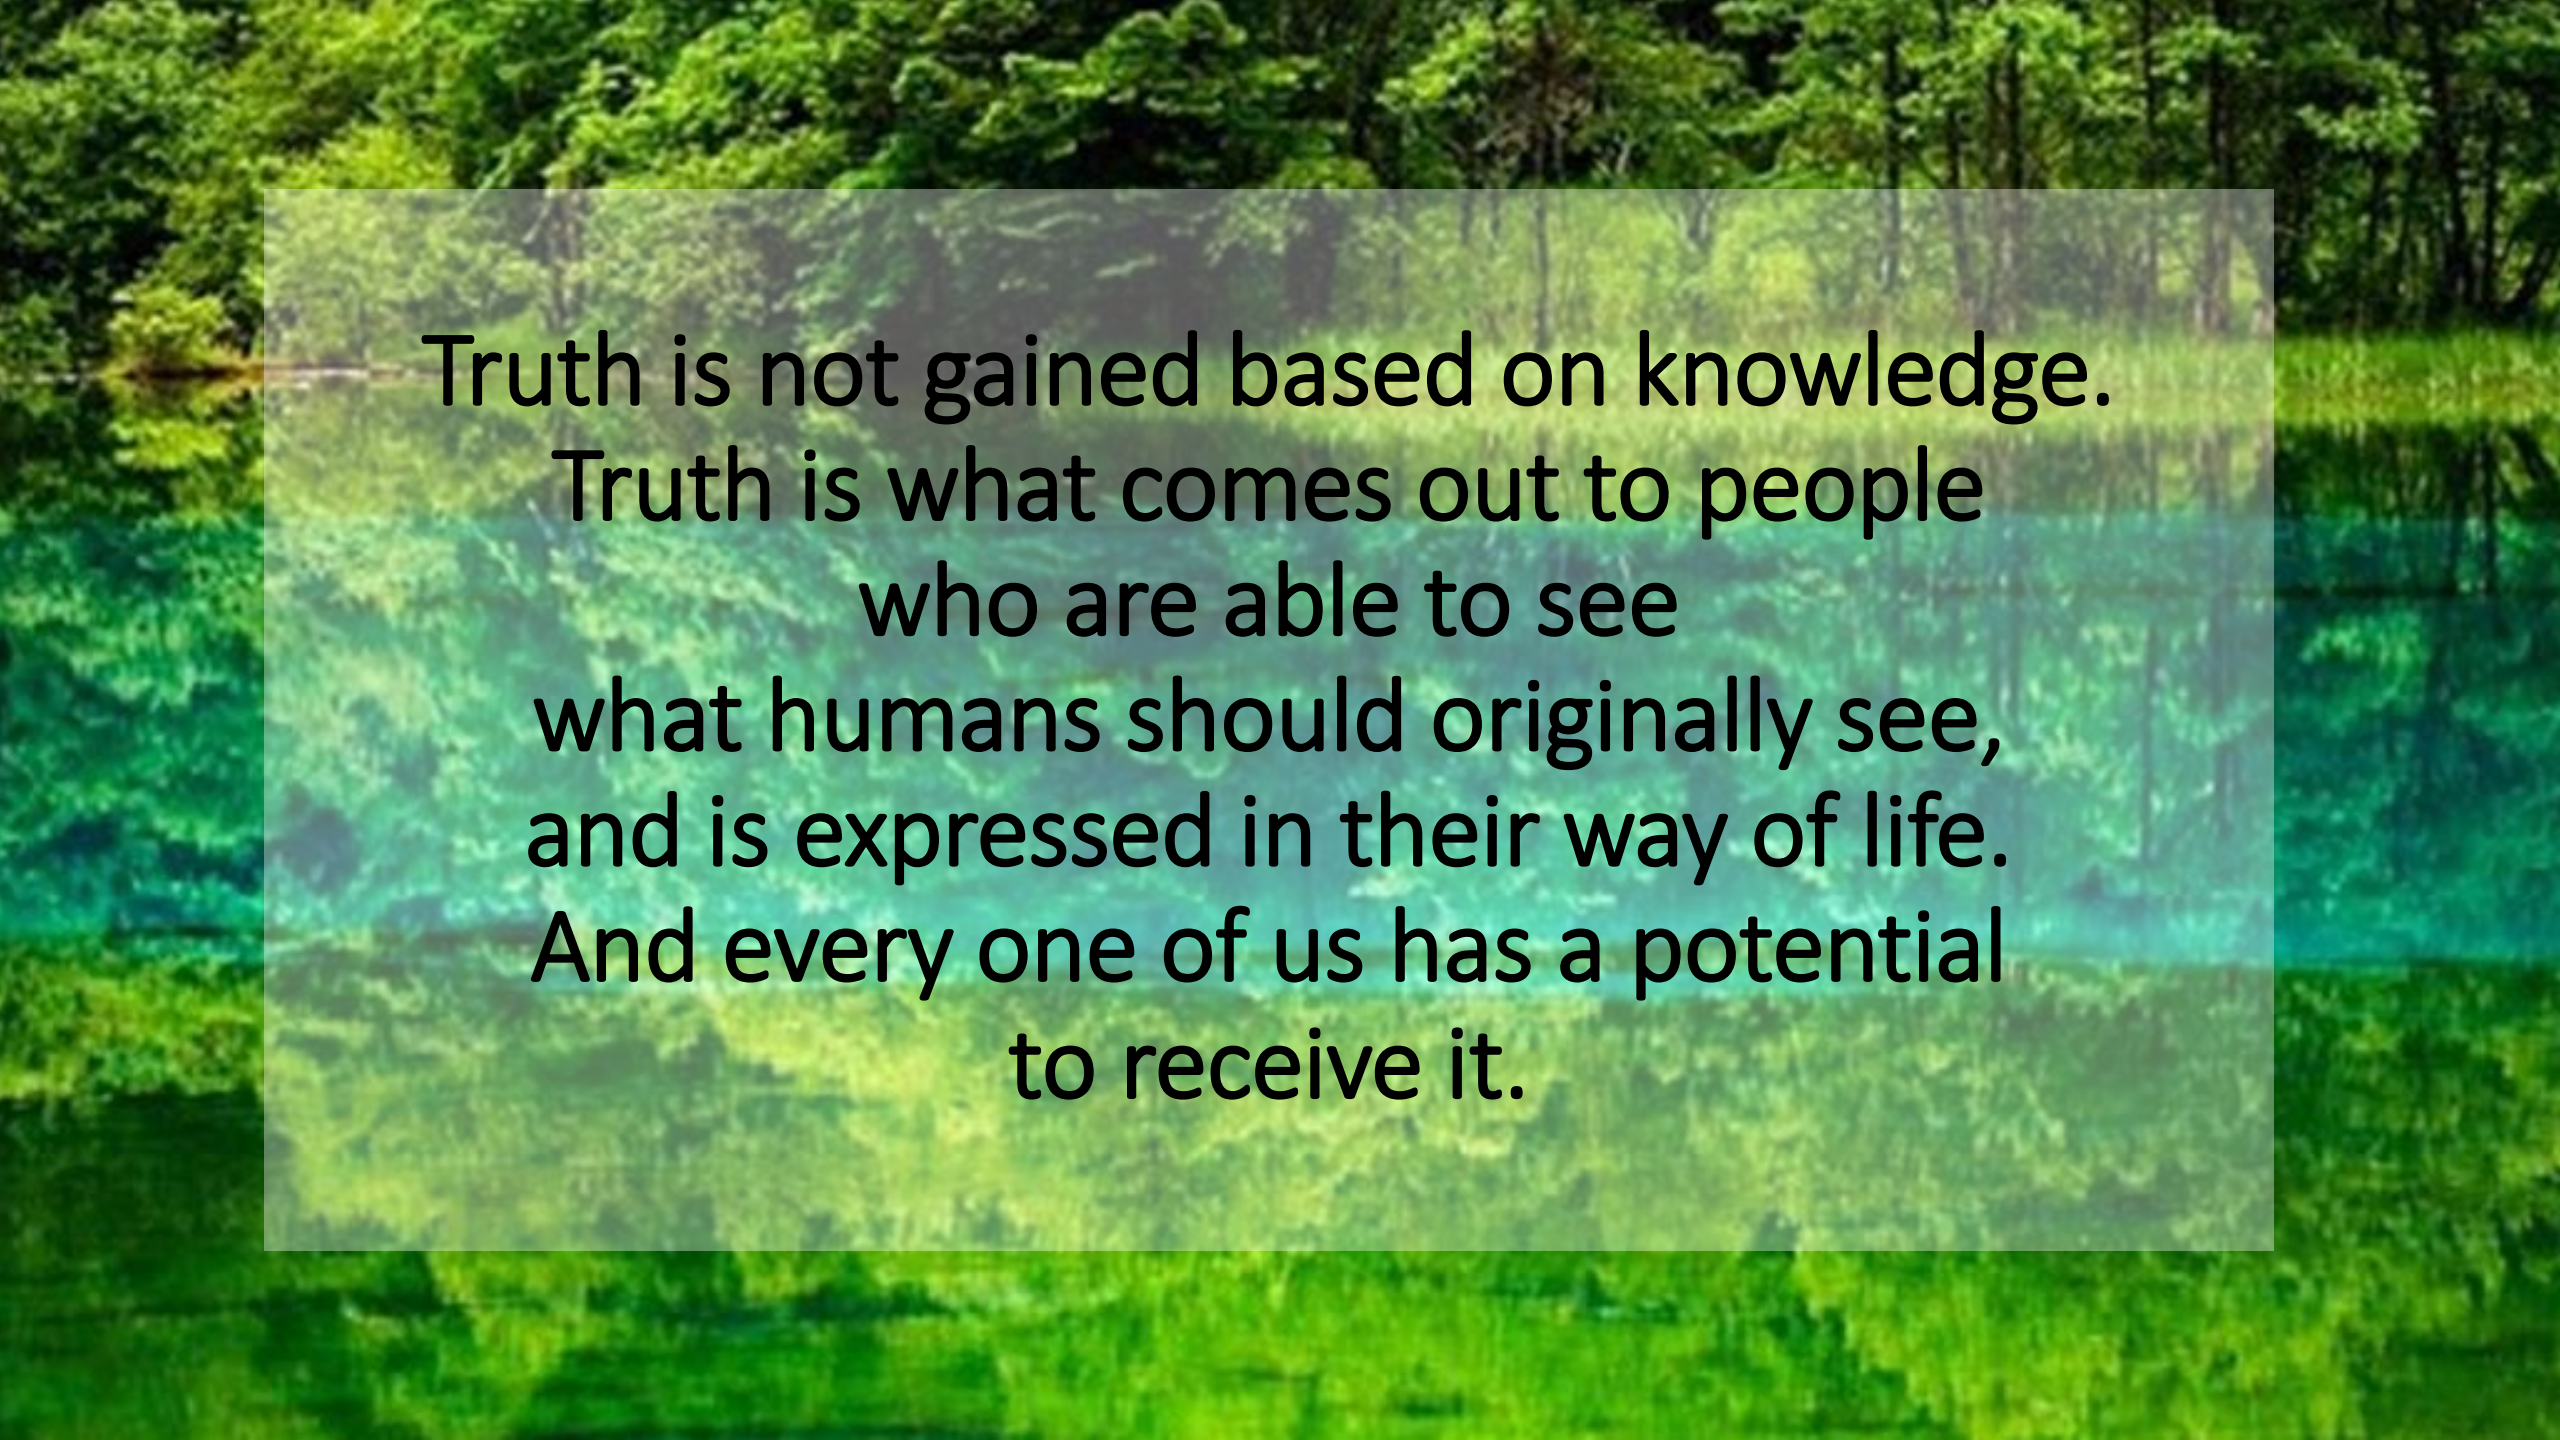

When we come to utilize our three-dimensional brain,  
not the conventional two-dimensional thinking based on  
profit and loss or good and bad,  
extremely extraordinary ideas will come out.  
Then, even if we are on earth, we will be able to  
understand the universal reality instantly,  
and the flow of things will become dramatically smooth.  
(Truth will come out.)

This is the society  
where humans living in the 21<sup>st</sup> century create.

Truth is not gained based on knowledge.  
Truth is what comes out to people  
who are able to see  
what humans should originally see,  
and is expressed in their way of life.  
And every one of us has a potential  
to receive it.

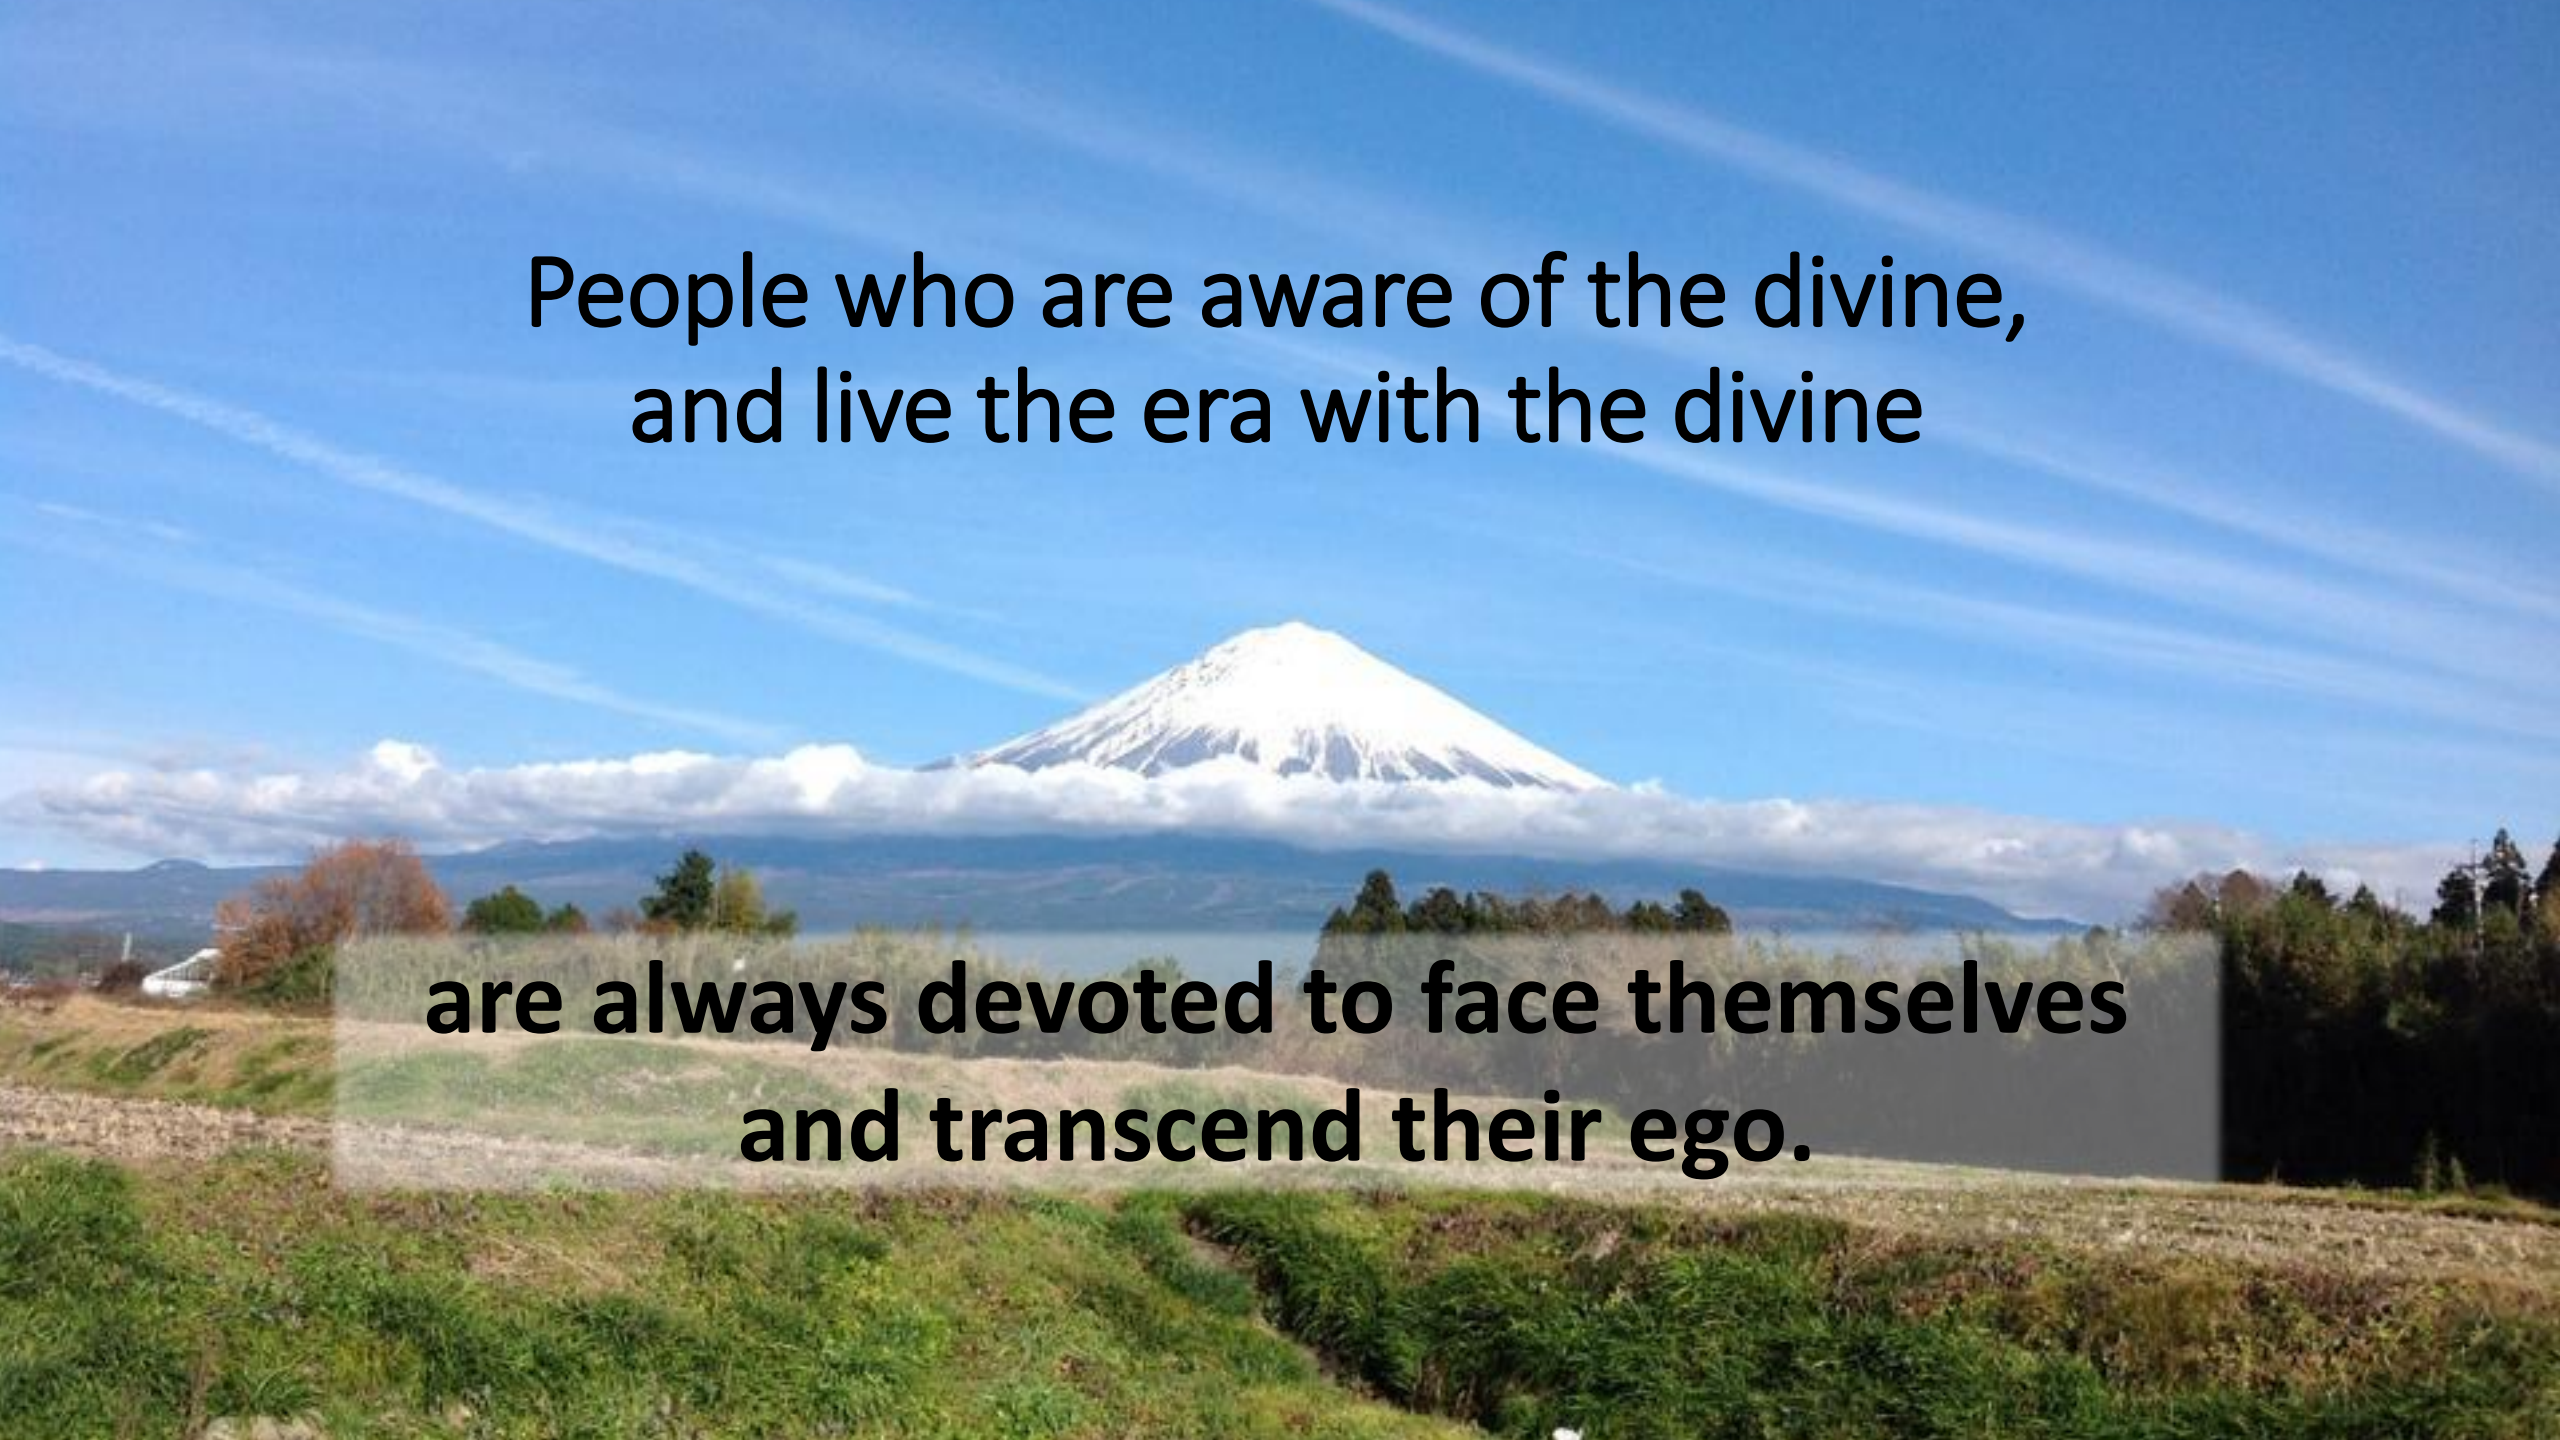

We molt from the mud of chaos into a different dimension, and will be reborn as a beautiful flower.

When each one of us blooms an individual (Kono) flower (Hana), it will become a big tree, and then a tree's (Kono) flower (Hana).

It is a utopia which will emerge in the next era.

**People who are aware of the divine,  
and live the era with the divine**

**are always devoted to face themselves  
and transcend their ego.**

**The daily life where everyone supports and loves each other and receives blessings from the divine, and lives with harmony, happiness, and joy,**

**This is very natural on this planet, originally.**

The 21<sup>st</sup> century is the era of  
human awakening.

Now, the time has arrived  
when the earth takes a new  
step into the universe along  
with human awakening.

Thank you for listening!
